

# Arms Lounger

Outdoor Chaise Longue Chair

The Arms Lounger gains inspiration from the feeling of peace and relaxation. The design was conceived and sketched while overlooking the beach. The angled back legs relate to a human form reminiscent of a person sitting in the grass leaning back with their weight on their arms. The mood at the beach is energetic yet relaxed and social and the form of the Arms Lounger reflects those characteristics.

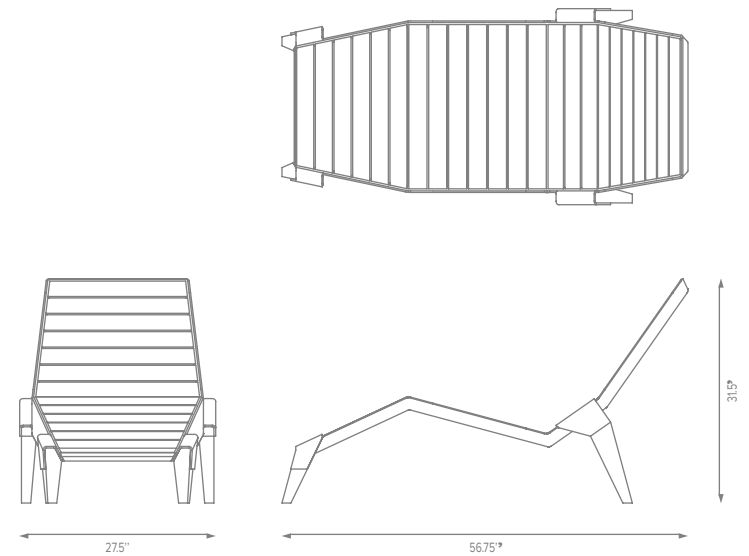

The use of powder coated aluminum and teak provide ample protection to the elements in an outdoor environment. Slots in the sheet metal frame allow captured water to drain and add ventilation for drying.

With teak finishes in natural or weathered and multiple color options for the frame, the Arms series provides flexibility to fit any outdoor environment. An optional fabric cushion provides added comfort and flexibility to create looks to match any environment.
