

In the post-epidemic period, people are increasingly aware of the importance of disinfection. Taking express parcels is an indispensable part of people's lives, but it is easy to ignore the disinfection aspect of taking parcels, and the spread of many epidemics is also caused by express delivery.

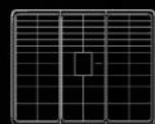

"Touchless Modular Express Disinfection Cabinet" is designed to an infection-free and express pickup equipment for users. It is equipped with an ultraviolet disinfection lamp, which provides effective and automatic disinfection and sterilization for incoming expresses. Users are enable to open the cabinet door through APP. It can also be customized to assemble the disinfection cabinet according to size of those express stations.
