TicWatch E3

Sales Sheet

KEY FEATURES

Qualcomm® Snapdragon Wear™ 4100 Platform

Deliver faster and smoother performance and connectivity.

Blood Oxygen Saturation Detection

Use TicOxygen to automatically detect your blood oxygen saturation (SpO2). Enable 24-hour continuous monitoring to get a comprehensive view on how well your body can absorb oxygen.

24/7 Continuous Heart Rate Monitoring

View precise heart rate data during the day and even when you sleep. Receive heart rate alerts in real-time.

20+ Professional Workout Modes

Get moving with more than 20 professional workout modes pre-installed in the watch.

Respiration Rate Monitoring

See how you're breathing throughout the day, while you're at rest or during physical exercise.

Family Care

Allow you to track health data of multiple family members on the Mobvoi app and help you monitor the health of others you care about.
Sleep Tracking

Keep track of various stages of sleep and help you learn your sleep patterns and build healthy sleep habits.

Stress Management

Detect your stress levels and guide you to relaxation through breathing exercises.

Wear OS by Google™

Tap your wrist at checkout to pay. Ask Google Assistant for help with everyday tasks. Enjoy thousands of apps in Google Play.

IP68 Waterproof Rating and Pool-swimming Suitable

No need to worry about sudden spills or unexpected rain. Ideal for pool swimming as well.

ACTIVE LIFE IN STYLE

TicMotion™ (Proactive Workout Detection*)

Proactively detect your motion and provide your fitness records, all click-free.

GPS Navigation

Plan your new adventures and track routes accurately with its built-in triple navigation system of GPS, GLONASS and Beidou.

.

Stylish Design

Feature a 2.5D curved glass and an ultra lightweight body at only 32g. A variety of interchangeable band options for you to find the perfect piece to fit your look.

*The TicMotion Auto-Workout Detection feature can automatically detect an outdoor activity for walking, running, and cycling.

OPTIMIZE FOR BATTERY LIFE

Essential Mode & Battery Saving Screen

By default, the Essential Mode kicks in automatically when the power percentage drops below 5 percent. You can, however, expand the battery life of your TicWatch E3 by auto-activating the essential mode at any time. A uniquely-designed battery saving screen displays all the necessary information you want to see at a glance.

*Battery life varies depending on the device settings, usage pattern and operating conditions.
