

Alaska

S U S P E N S I O N

Alaska is a jewel of suspended light. A magical sphere of solid glass with a magnetic and inexplicable appeal. To include it in the interior design is to give it an icon, warm and seductive. Its optical glass globe of great purity encloses a teardrop of light and is a work of craftsmanship that is polished by hand to create a unique piece as a whole.

Its shape and light are a modern reinterpretation, through technology and design, of the classic incandescent filament bulb. Its connection system to the ceiling plane is also an opportunity to express creativity in interior design.
