WEDON: The Best Application for Job Hunting and Recruitment

WEDON APP is a vocational education ecological service platform oriented to talent industry application, providing the whole chain of services from the demand side of industrial talents to the supply side of the vocational education industry for the upstream and downstream industries, colleges and universities, government associations, and other parties of vocational education. With the core of "vocational education + employment", the platform provides online education and training services, and provides information dissemination, display, and communication matching services for job seekers and recruiters through the online platform.

Talent Referral System

WEDON can meet the needs of enterprises and job seekers in real time to release recruitment information and job search information display services, but can also precisely recommend talent, which is conducive to both parties to save more time in improving the recruitment organization management and candidate filter efficiency, while also improving the user experience with data resources.

One-stop Solution for Educators

WEDON's one-stop solution specially designed for education and training users can not only help with the construction of online colleges, strengthen teacher management and promote online course development, but also provide education and training parties with a steady stream of students, and easily complete enrollment, registration, and classes, graduation, employment and a series of processes. Additionally, this solution can not only identify the first-time employment requirements of large and medium-sized businesses across a range of industries, develop enrollment training plans on a regular basis and quantitatively, and guarantee the employment rate of students, but it can also encourage appropriate training cooperation between customers and organizations, increasing multi-economic and market brand recognition, enhancing influence, and gaining social recognition.

Customized User Services

WEDON provides a full set of customized solutions for users with different needs, whether it is an industry association, a corporate employer, or even an institution. WEDON will highlight the advantages of the user, drawing traffic and improving the recruitment conversion rate, and meeting the recruitment or enrollment needs.

WEDON offers a comprehensive range of user-friendly support via APP, applet, H5, and other multi-end platforms. It integrates the entire market, customer service, platform, sales, operation, after-sales, data analysis, etc. process in order to produce an overall talent application ecological closed-loop solution.

Outstanding Integrated Performance of Talent Application Ecological Closed-loop

Diversified Social Section

WEDON provides a social section for users to learn and communicate. Users can learn about the latest employment news in the industry information-gathering section, view short videos on vertical industries to stimulate interest in learning or participate in live broadcasts by industry experts to facilitate decision-making.
