

RARESEE

RARESEE Facial Atomization Device

# Transdermal Absorption

Ultrasonic diffusion

Ultrasonic atomization

Absorb precisely

Water-proof device

# Traditional Facial Mask

## ABSORPTIVITY

### Low absorptivity

Each facial mask contains about 15ml essence but the absorptivity is less than 2%.

## USER EXPERIENCE

### Limited using scenes

Traditional facial mask can only be used at home or limited indoor scenes.

### Complicated routine

Users need to wash their face before and after using traditional facial mask.

### Discomfortable experience

Users' experience may be affected by seasons and temperature.

# Surface Treatment isn't Enough.

Traditional facial mask cannot solve basal layer skin problems.

Redness and itching

Puffiness

Sagging

Wrinkling

# “Redefining Technology Skin Caring”

Micropore-ultrasonic atomization technology  
can target the specific skin concern and improve skin condition.

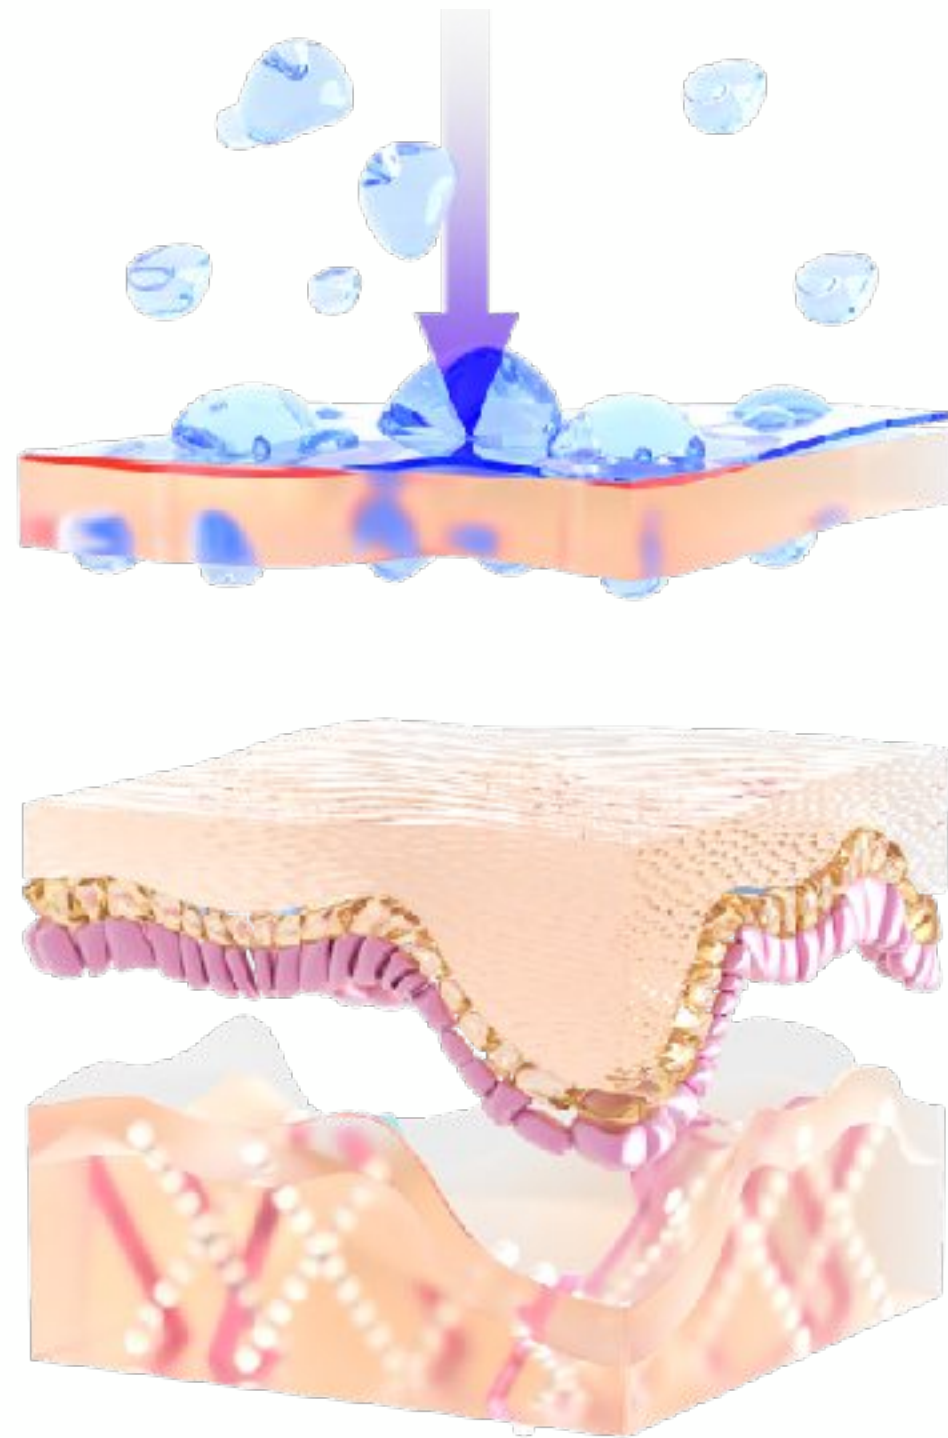

RARESEE Facial Atomization Device

RARESEE Essence Refill

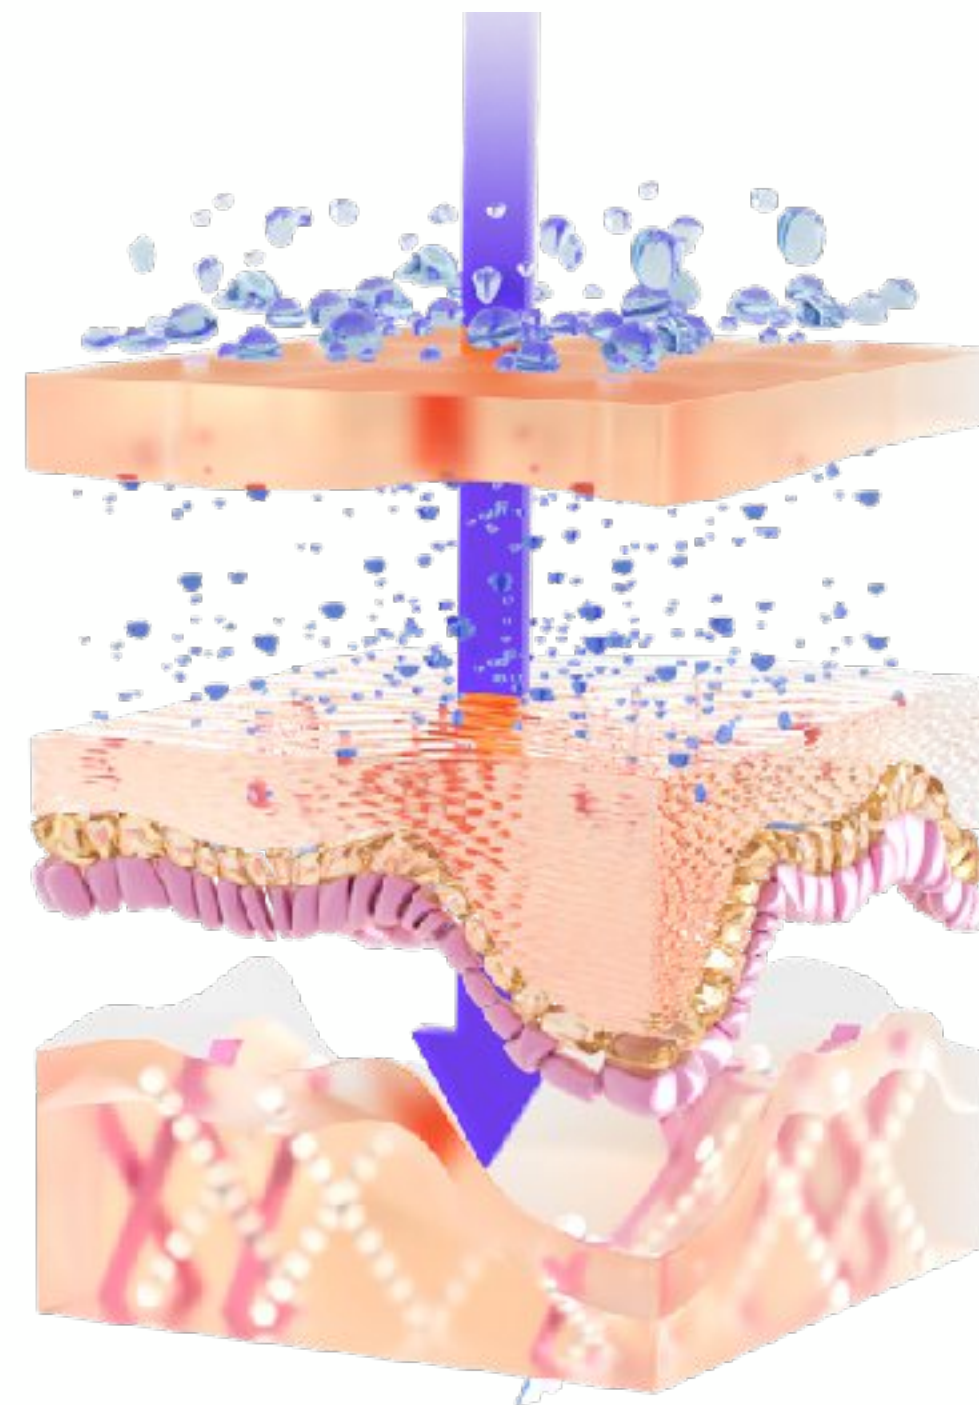

# “Transdermal Conduction”

Essence can be atomized into aerosol particles to reach basal layer of skin and enhance the essence absorptivity.

Traditional Facial Mask

Each facial mask contains about 15ml essence but the absorptivity is less than 2%.

RARESEE Facial Atomization Device

The instrument adopts microporous ultrasonic atomization technology, the working principle of which is to use piezoelectric wafers as transducers to generate megahertz-level ultrasonic waves. The directivity of ultrasonic waves and their cavitation fields is very good, so the essence can be sprayed into the basal layer of the skin in a targeted manner. At present, the atomizing beauty instruments on the market can only atomize the essence into a particle size of about 30um, while our ultrasonic atomization technology can atomize the essence into a particle size of only about 10-20um, making more effective mediums penetrate deep into the skin, and it takes only 30 seconds to achieve the effect of applying a mask, so as to obtain the maximum and fastest skincare effect.

# DISPOSABLE TANK

## MAGNETIC ADSORPTION

Atomization tank uses vacuum process, safe and clean  
Pick for your own skin, 8ML serum, dispose after use,  
minimalize pollution to the serum.(Compared with similar  
atomization instruments:their tank are reusable, which  
may lead to secondary pollution and blocking problem)

# 1 ATOMIZATION TANK =16 MASKS

Ultrasonic diffusion

Absorb precisely

disposable serum tank

# Portable Size and Variable Scenes

RARESEE Facial Atomization Device is small and light enough to put in the handbag and carry out.

## Features

Comparing with other beauty misting devices in the market, the Luna has the following features:

1. Portable size with only 135g, along with fashionable outlook;
2. Disposable **Half Moon** to prevent the breeding of bacteria and clogging pores. (Competitors' products are reusable, which may lead to secondary pollution.)
3. Comparing with traditional facial mask, it has the following advantages:
  - A. It only takes 30 seconds to reach the effects of 30 minutes facial mask
  - B. Thanks to the portable size and no-wash feature, it supports any scenes including office, airplane and train.

# ANYTIME ANYWHERE

## 15s TOP SPEED SKIN CARE

We also focus on sustainable development. The shell of the instrument is made of 100% recyclable aluminum and PLA with a complete recycling system. Compared with traditional masks, we not only reduce the pollution of non-woven fabrics and plastic packaging, but also the pollution caused by the plastic film supporting the mask. The appearance of the Eclipse is relatively feminine (inspired by air cushion), so it looks very natural when being placed together with other cosmetic and skincare products. It is easy to carry, so most of the time, it is like ladies' air cushion and Eye shadow box samples, an inseparable part of life, the ladies can put it in a bag when they go out, allowing them to have skincare at anytime and anywhere to keep the skin in the best state.
