

About Älskar

Älskar is a lounge chair made of birch plywood, preserving natural texture as much as possible. Through exploration, the shape of the back and seat started to express the form of leaves and petals wrapping, overlapping, and intersecting in nature. The smooth curves, heart shapes and round edges create a softer, friendlier, inviting comfort. The base of Älskar takes the form of a nest to have the leaves nestle in, thus giving the users a feeling of peace, belonging and security.
