The smart sunroof skylight

Ingenious Visual Enjoyment

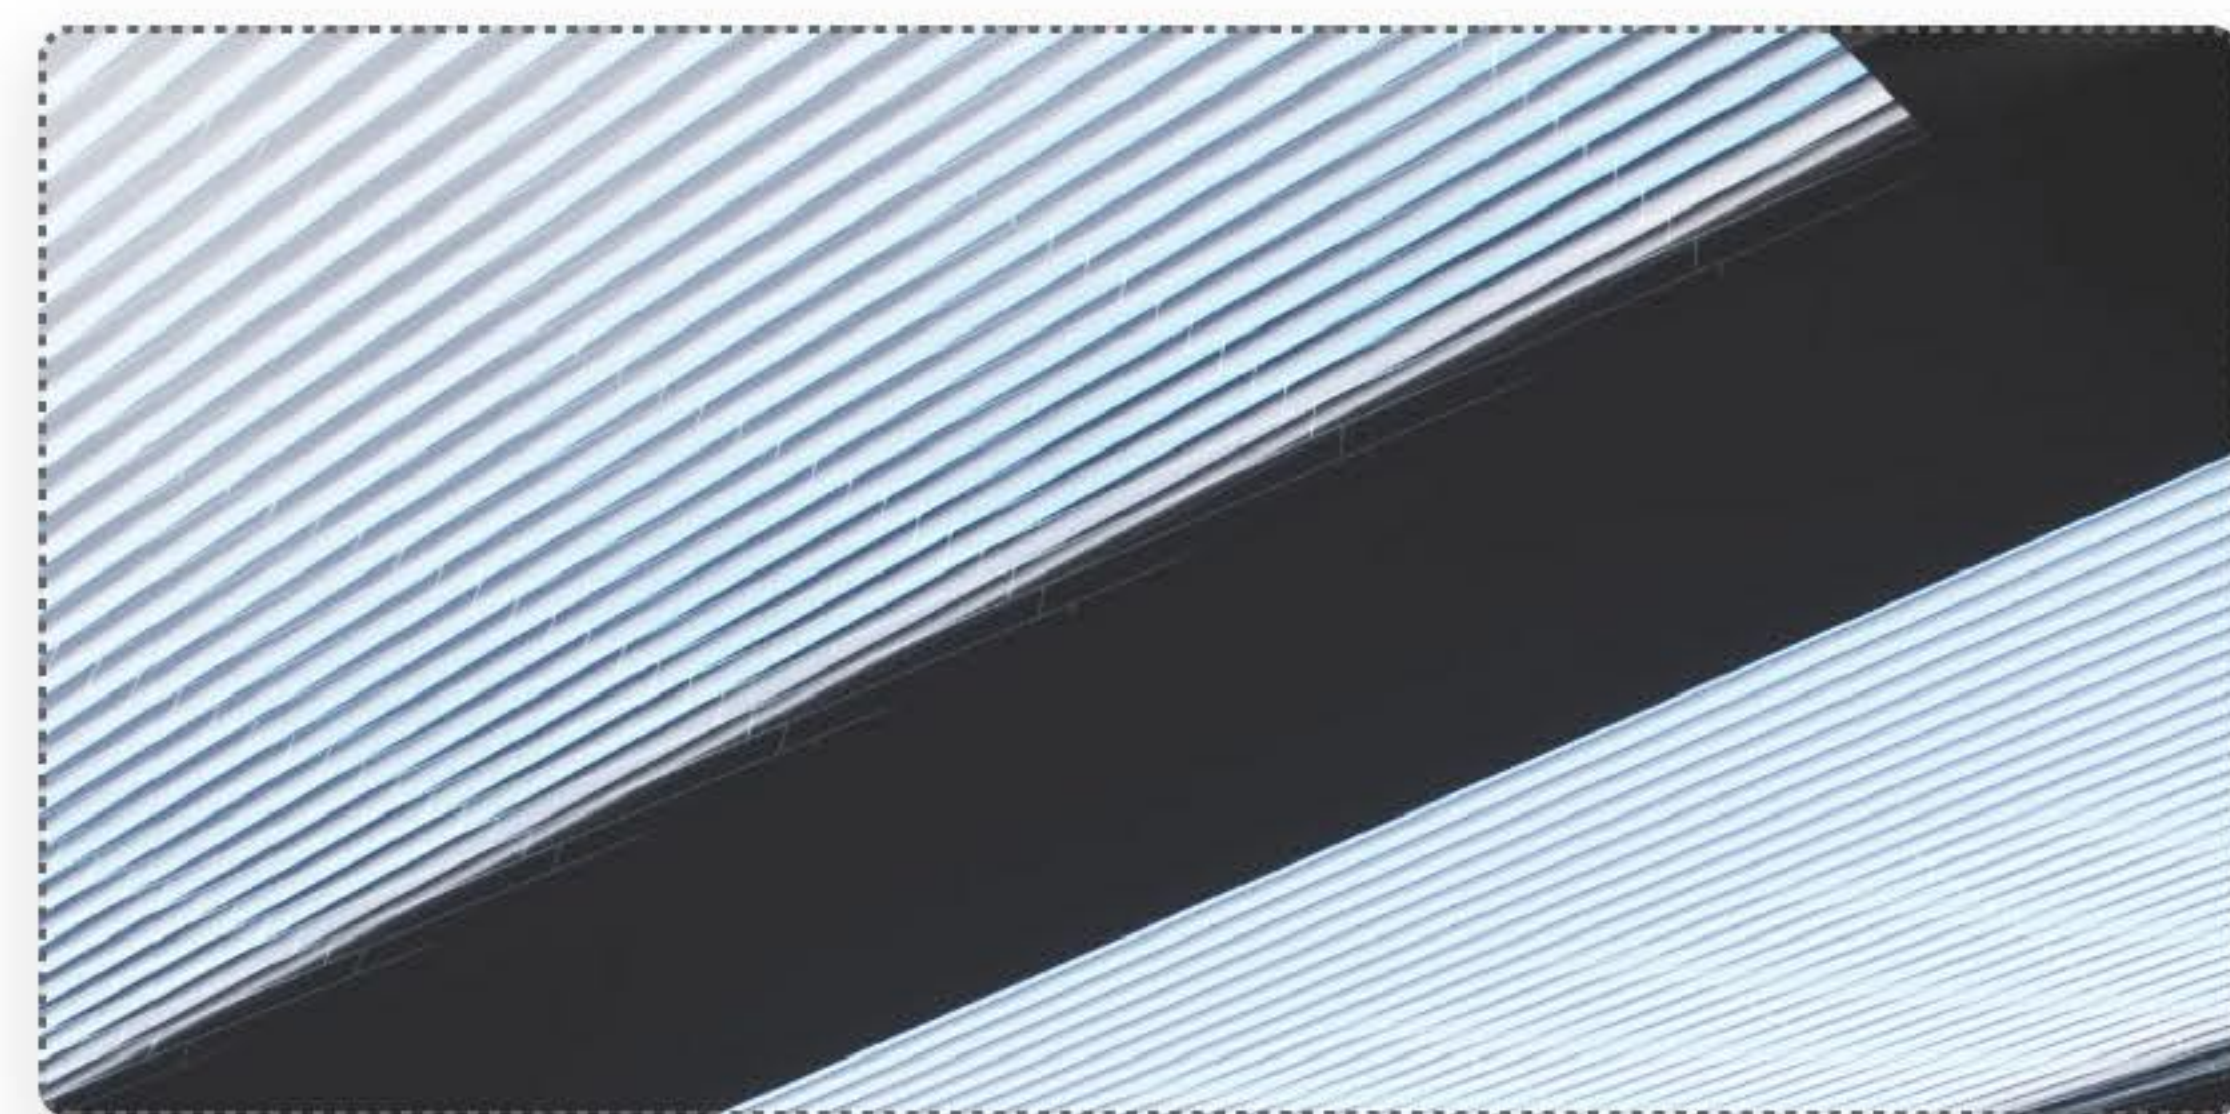

Through the perfect combination of transparent panorama appearance and smart-home lighting system, after nightfall, the inside dimming glass, the protective barriers with lamps and etc. will emit the brilliant light to illumine your life at night, so that you can find a pure land to share and enjoy the starlight and beautiful scenery with your family.

Smart-home lighting

With Good Heat Radiation & Ventilation – No Fear of Hot Weather

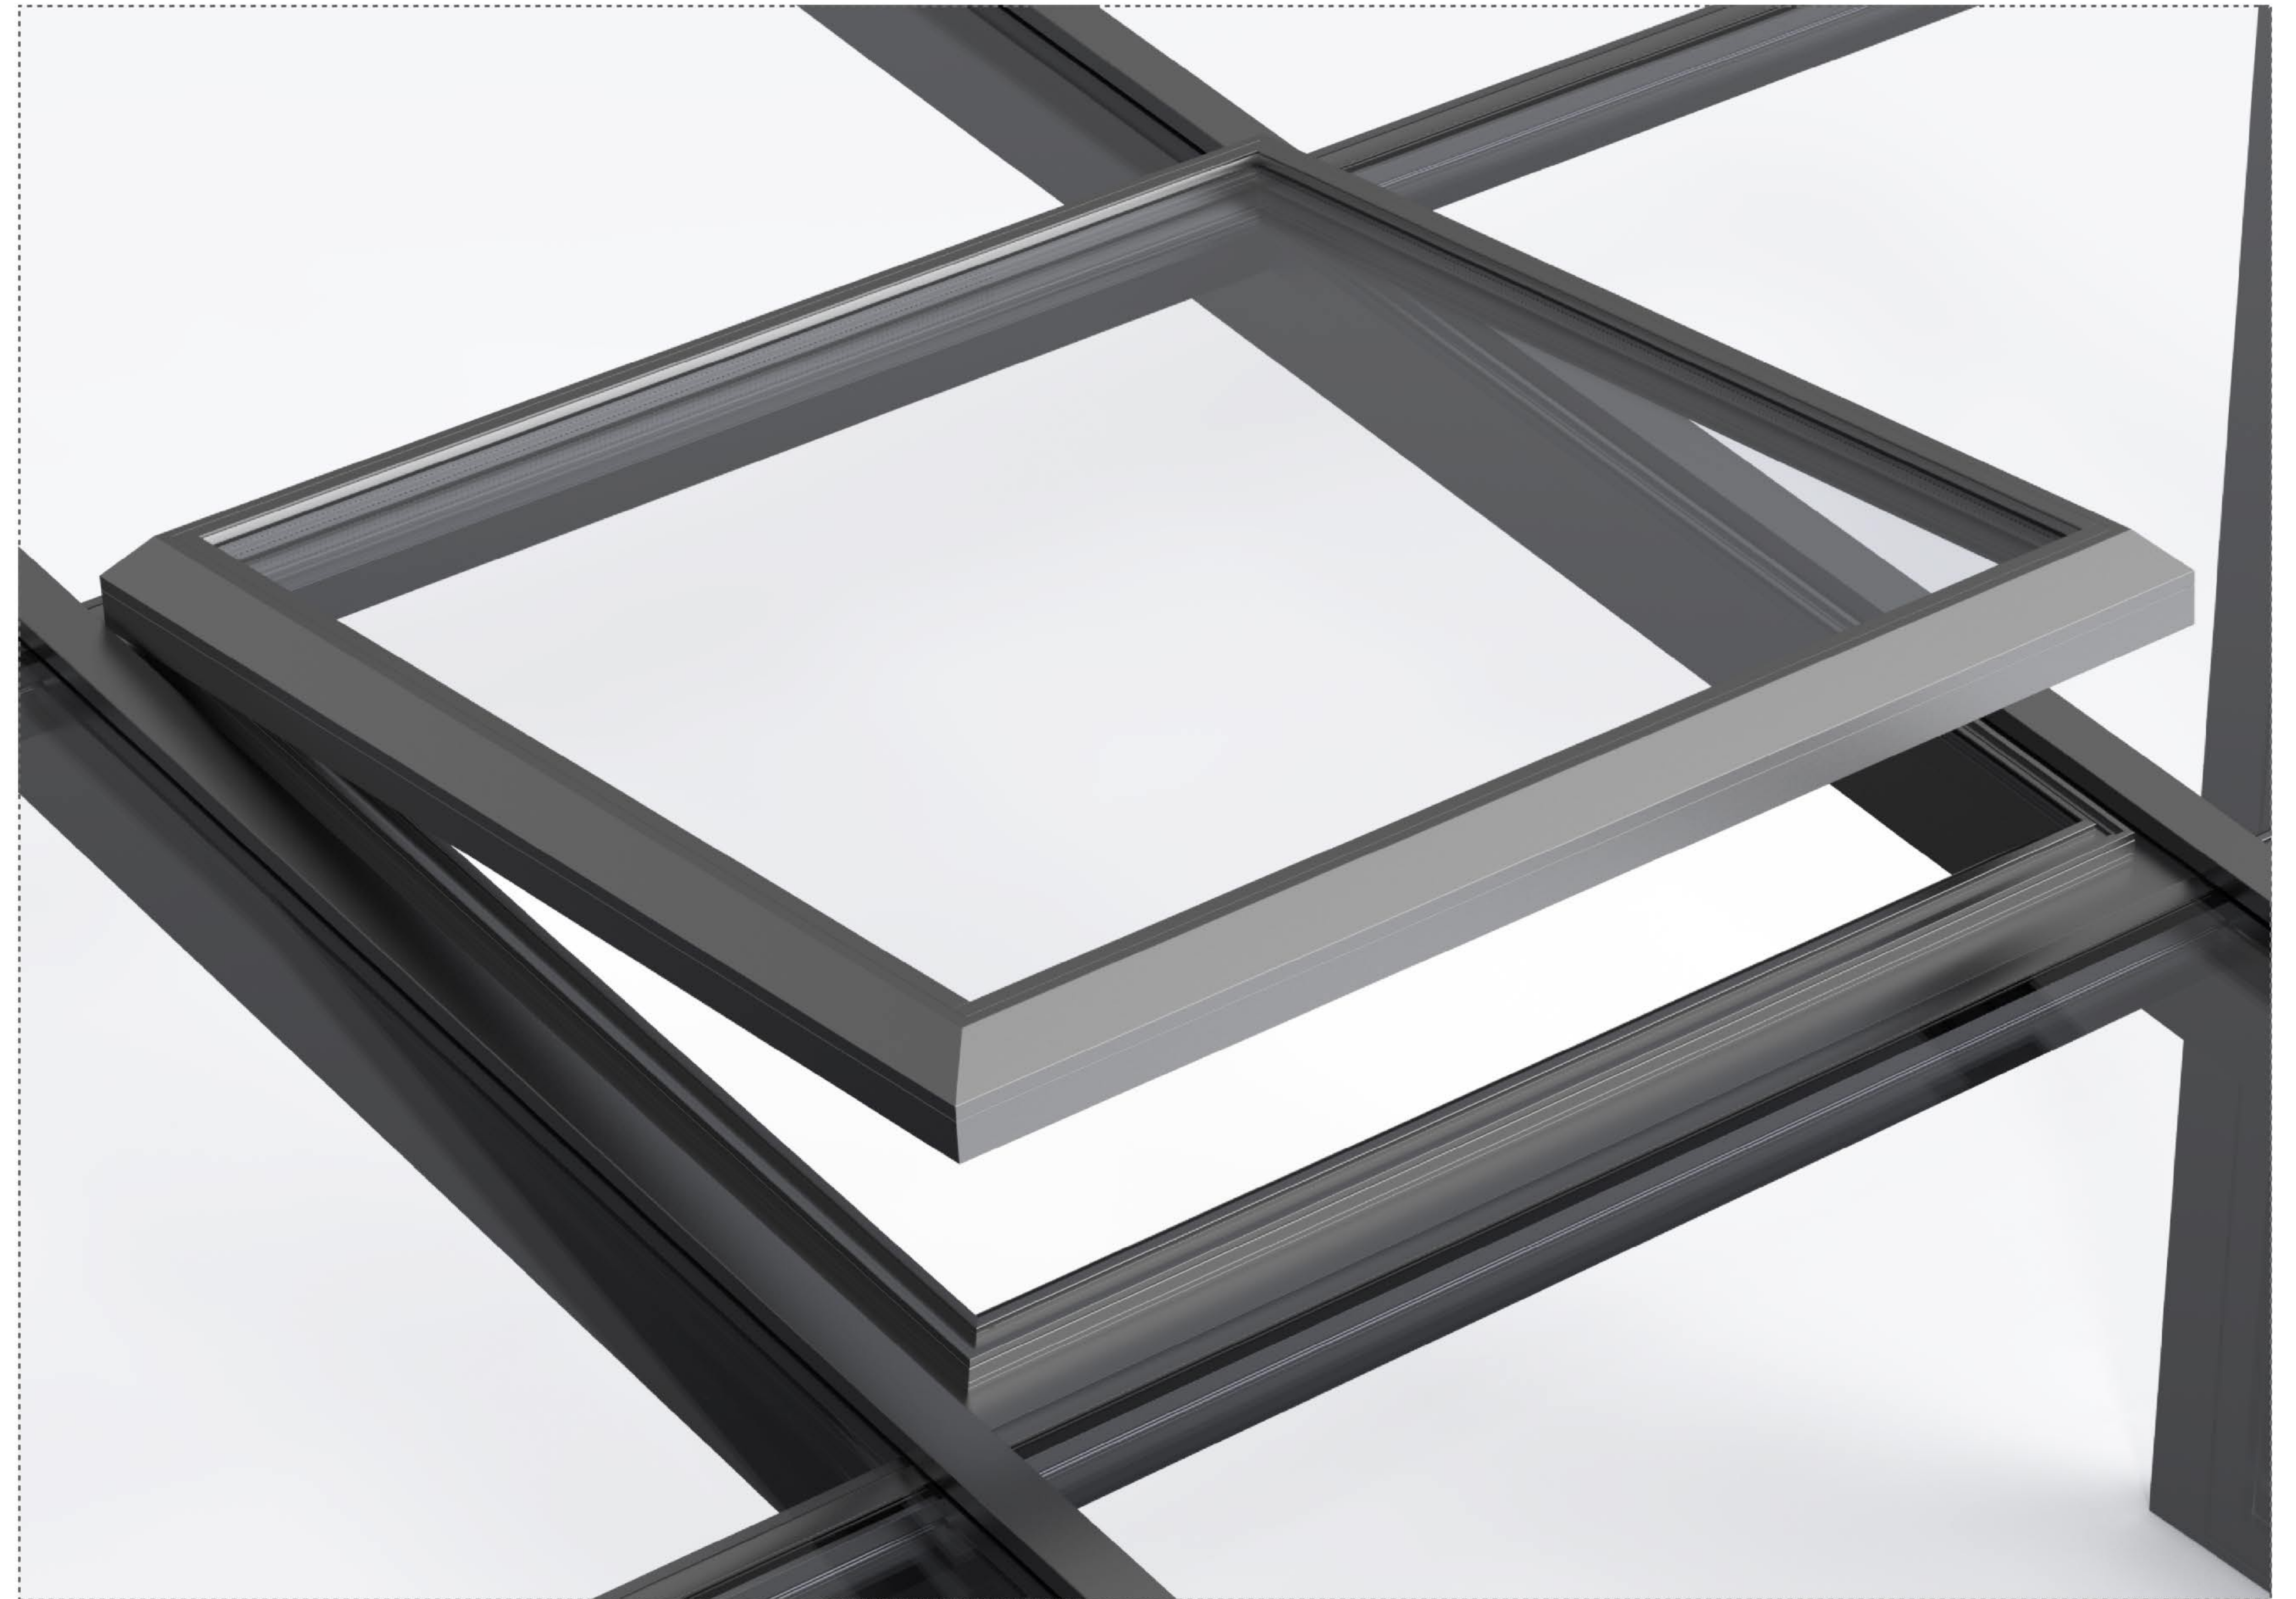

The smart sunroof skylight and lifting window can be customized. When it is hot, the skylight can be opened remotely, and can quickly cool down the room temperature by air convection. It adopts internal sunshade curtains, built-in louvered glass, external roller blinds and etc, also combine with the light induction smart shading system, so that it can be automatically adjusted according to the angle of outdoor light to efficient heat dissipation and ventilation, and ensuring the pleasant indoor temperature to a great extend.

External roller blinds

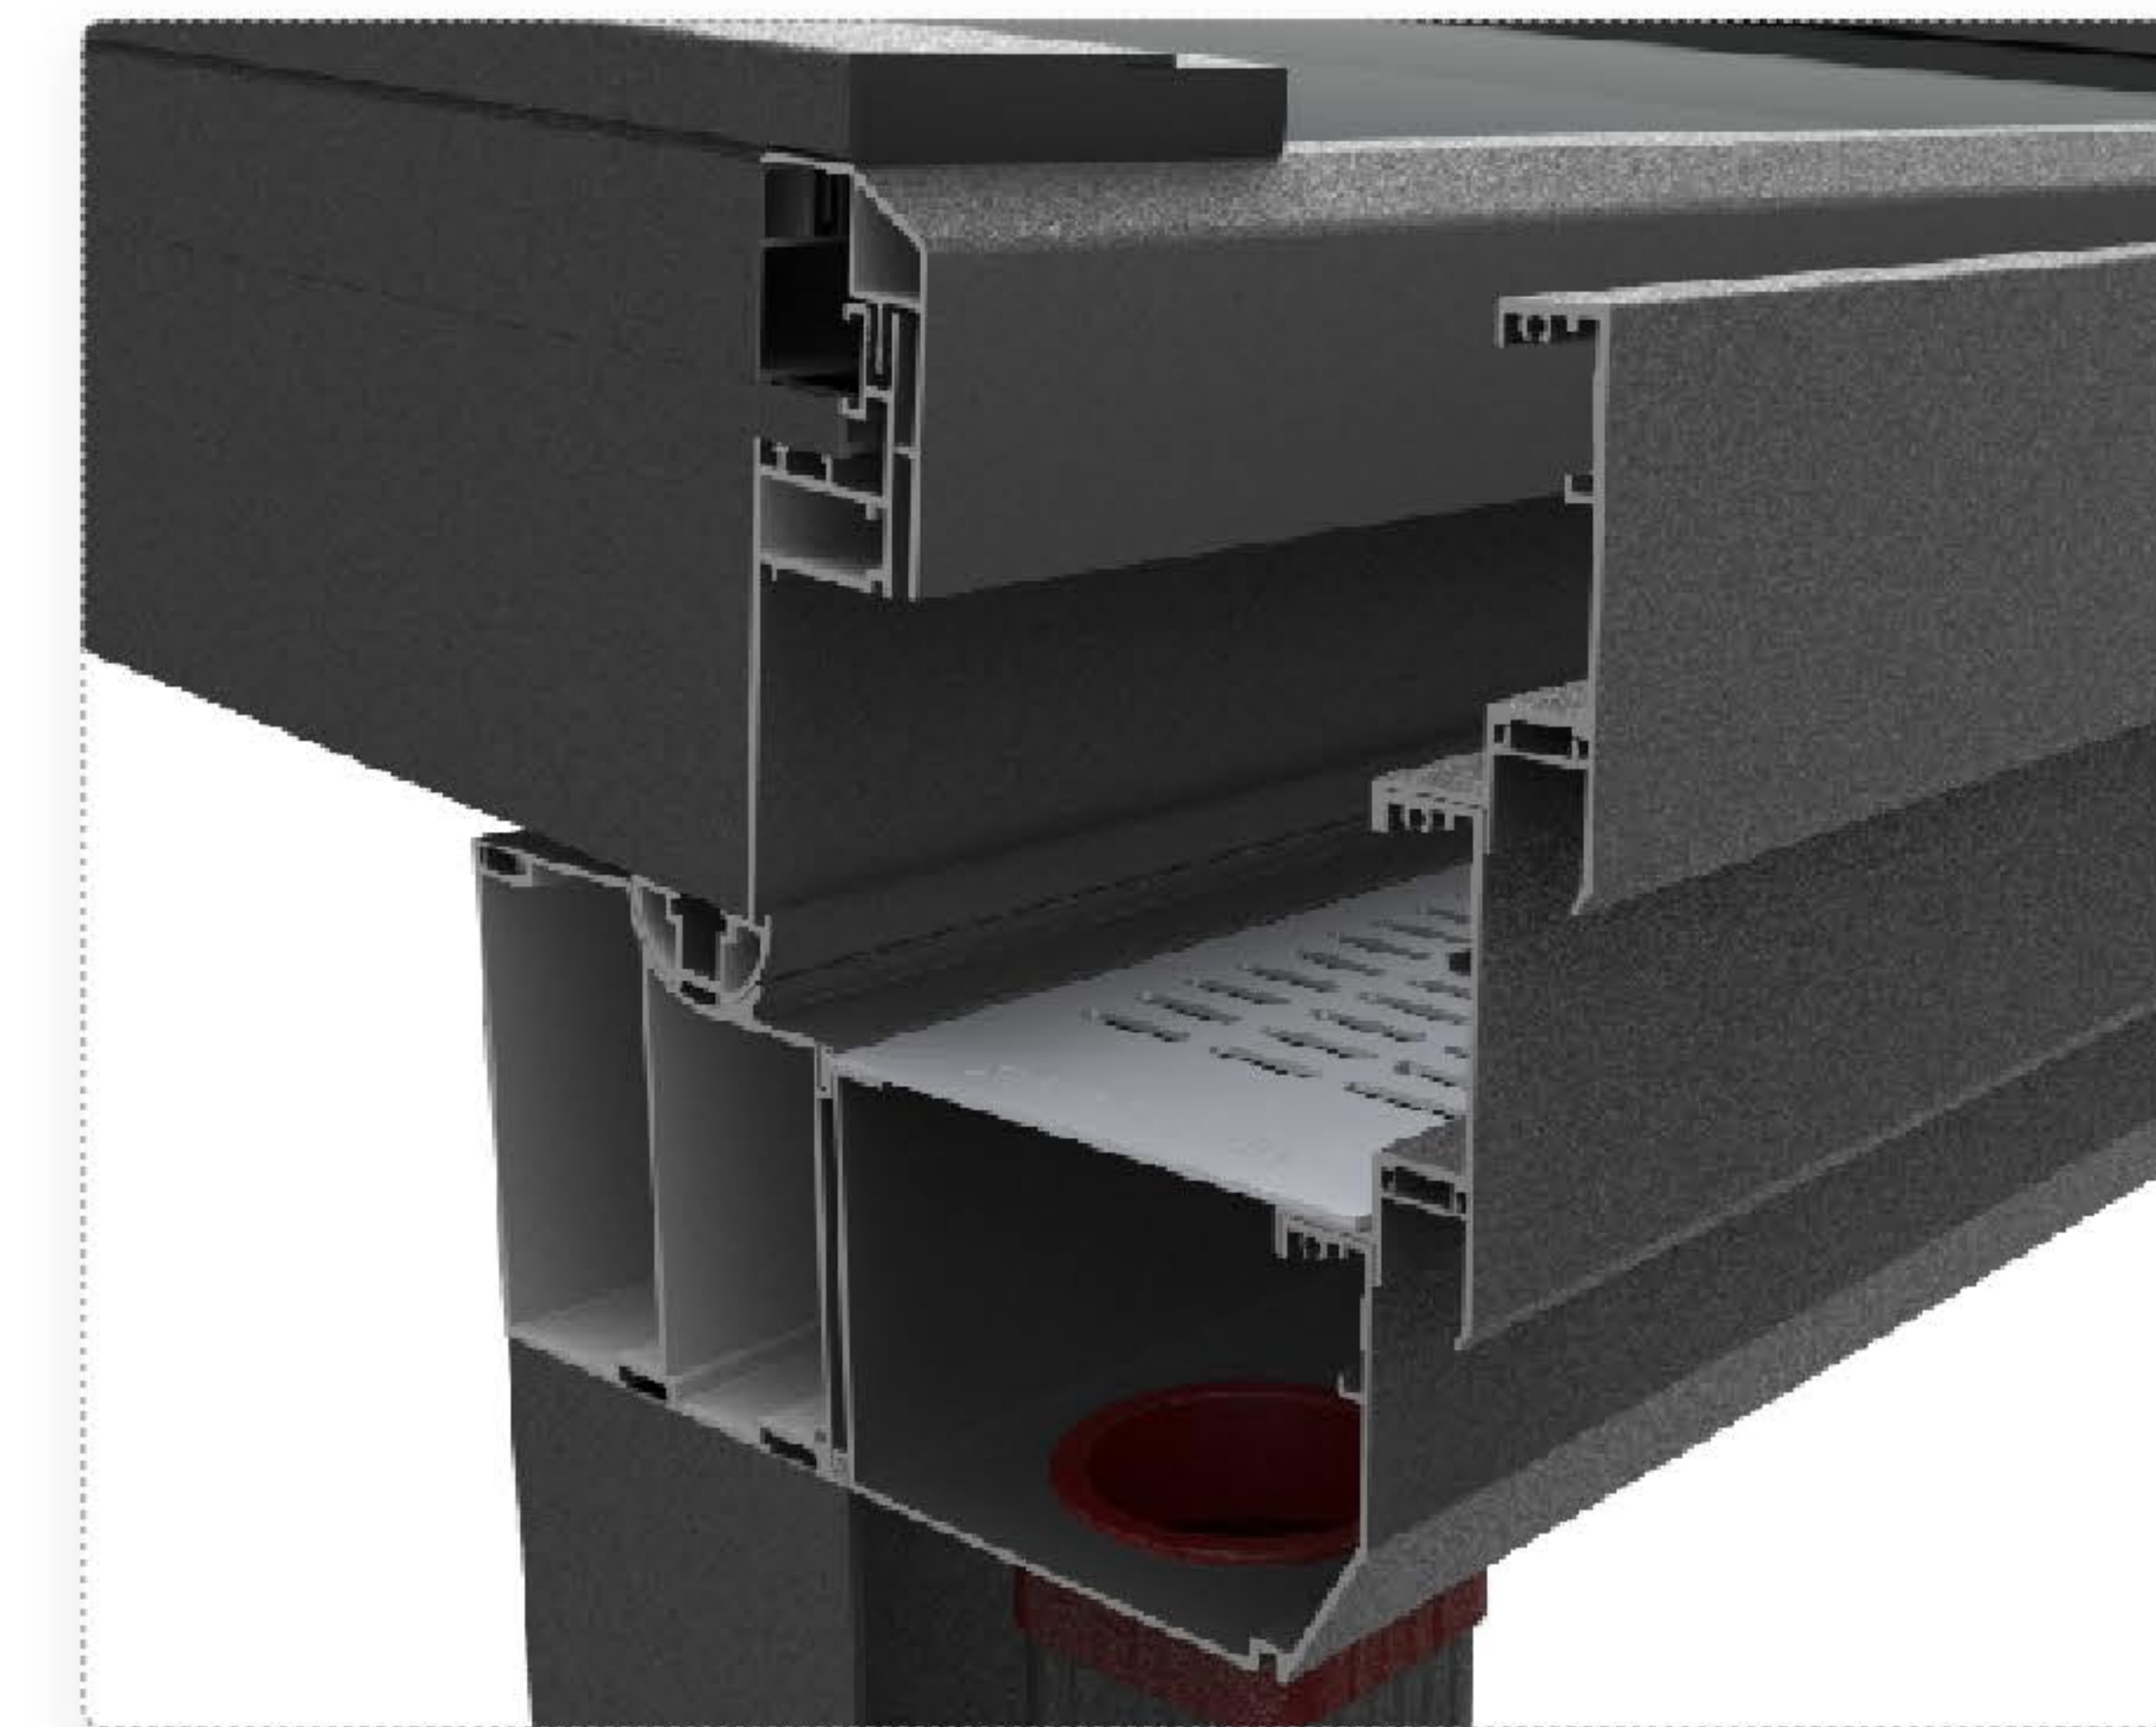

Prevent Leakage & Debris Blockage - Unafraid of Rainstorm

Before the rainstorm, the equipped weather monitoring system can close electric sunroof skylight automatically. Moreover, the accumulated water can be separated and discharged through the layered organizational drainage system adopted at the top to effectively prevent leakage or debris blockage. There is no need of you to be worried even if there is a rainstorm.
