-Bespoke Eyewear-

Freely match and replace the lens ring color and material
Customized overall frame size as required

Bespoke and Stylish Eyewear for Children

Bespoke and stylish, the eyeglasses from PIPIDOG are designed for children. By using professional tools to measure childrens' facial parameters and head size, the eyeglasses are custom-made based on the measured dimensions and personalized needs of the users. This ensures a perfect fit when worn. Additionally, the frame color and material can be freely matched and replaced. The R&D team continuously designs diverse frame styles, materials, and colors based on market demands and fashion trends, creating eyeglasses that are both fashionable and personalized. This allows each pair of eyeglasses to have a unique frame, satisfying the individualized needs of children.

High-quality Material for Durability and Comfort

It is made of WAGNER steel material that is known for its strong flexibility and lightweight quality. It possesses characteristics such as pressure resistance, wear resistance, non-fragility, colorfastness, and corrosion resistance. The special coating process enhances its durability, ensuring a longer lifespan. Moreover, the hinge adopts a patented screwless structural design, and the integrated design of the temple reduces pressure points on the frame according to ergonomic principles, providing a lightweight and comfortable fit that does not exert pressure on the bridge of the nose. These design details are aimed at ensuring a comfortable and unrestricted wearing experience for children.

DIY Custom Graphics for Fun and Personalization

PIPIDOG's eyeglasses also offer one-to-one DIY custom graphics, allowing each pair of glasses to be customized with the child's name or pattern on the temple. This personalized customization method makes the wearing experience more interesting and unique. In addition, the integrated screwless structure also ensures that the temple is stable and not easily loosened.

Name and pattern can be engraved
on the temple

Having the ability to solve special pupil distance problems

Protect Eyesight, Develop a Good Habit of Eye Use

In addition to playing with functional lenses to achieve myopia prevention and control, radiation protection, blue light protection, etc., this children's eyewear also addresses fitting issues for children's eyewear, such as large interpupillary distances, small interpupillary distances, high and low ears, a high degree of myopia, or a special head shape. Children can quickly customize the right size to address these issues and enjoy accurate vision protection. so that the lens correction function can be used. Children can wear the frame easily and form healthy eye-use habits thanks to the light material and accurate frame size that lessen pressure on the nose bridge.

Environmentally Friendly Material Boosts Sustainable Development

This product focuses on futuristic, ecological, and human-centric, and it is made of recyclable metal material to minimize wastage during production. Meanwhile, it pays attention to the electroplating process, improves the surface cleaning process, reduces the generation of industrial wastewater, and realizes environmental protection.
