

# X3CE016 K-shield Protective Shoes

The X3CE016 K-shield Protective Shoes are designed for toddlers to guide them in developing a proper gait. Besides the excellent walking protection, the shoes have distinguished antibacterial performance for the feet health of toddlers.

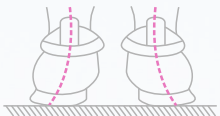

+152%

More stable  
feet support

**X3CE016 K:**

better supported by  
double insoles.  
Fix ankles with less  
shakes .

**Other toddlers shoes:**

No feet protection.  
walking shakes are prone  
to ankle twist.

## K Shield Protection

Safety is one of the highlights of the shoes. The "K shield" in the heel area forms a supportive structure resembling the letter "K" surrounding the ankles, heels, and shoes, effectively safeguarding and stabilizing the ankles to prevent falls caused by balance issues.

## Fully-wrapped Shoes Head

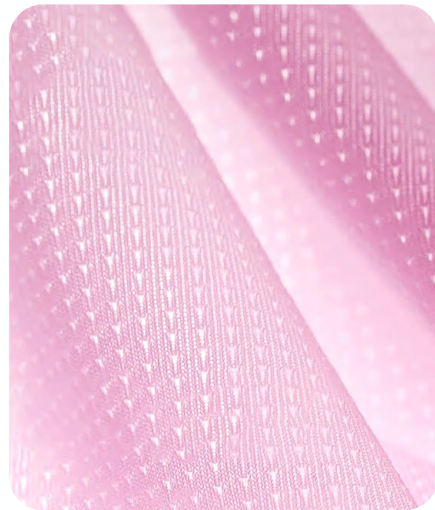

The Fully-wrapped design can provide comprehensive protection against kicks and collides for their toes and forefoot, reducing the risk of injury during learning to walk.

## Shoe upper: microfiber material

It chooses the easy-to-clean microfiber material for the shoe upper instead of traditional animal leather. This material surpasses animal leather in terms of resistance to abrasion, cold, aging, and breathability while being free of toxicity and eco-friendly for toddlers.

## Premium Materials

## Shoe inner: tencel

The shoes are lined with Tencel made of natural ultra-fine plant fibers for a soft, comfortable wearing feel with excellent antibacterial properties.

**HI-Poly insole:**

breathable and antibacterial,  
soft and comfortable.

**Soft-Hold insole:**

high resilience,  
strong support.

**Gait Stabilizer:**

Prevents foot inversion  
and outversion.

## AIR Tech 3D Insole

Featuring the 3rd generation AIR Tech 3D insole, the shoes provide excellent cushioning to effectively reduce joint impact for toddlers' joint health with enhanced comfort and less fatigue when walking.

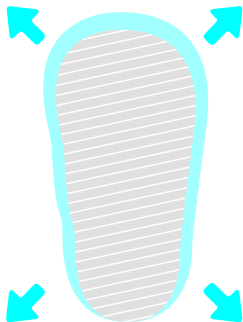

## Increased Sole +8%

Unlike traditional ones, this toddler shoe's sole area has increased by 8% with a larger foot contact area, which offers enhanced stability and better slip resistance for toddling. This guides toddlers to explore the new world with more confidence.

## 0.618 Bending Design

Turbo-assisted design can help children bend with ease for easy walking learning with less fatigue.

## Shoe Side Grooves

The specially designed shoe side grooves can provide extra support and stability for less walking resistance.

## Smoother Walking

The bending design and groove structure reduce the bouncing of the shoe when walking for toddlers' smoother walking.
