

Lei light
reflection

Lei Light Reflection is a lighting product combined
with aroma diffuser and a mirror.

Each feature's form and function relates to each
other to provide an artistic and emotional scene.

Light

As a desktop light or lantern

Aroma

Relax with enriching scent

Mirror

Softly illuminates your face

| Features of the product

Innovative design pursuing sophisticated light

The light source surface thoroughly rotates around the handle, or the central axis, and illuminates things directly below, the desktop, or ceilings and walls as an environmental lighting. It is an innovative design that utilizes reflected light inside the oval-shaped frame, creating a soft and beautiful light that does not beam strongly when viewed from any angle. The central mirror part reflects and emphasizes light to the surrounding area with sophisticated brightness. With 3 color types and 4 levels of dimming, the light can be customized to various scenes throughout the day, from bedrooms to workplace.

Qualified minimalist design

The entire design is based on an oval silhouette. The handle which connects all parts of the product, apparently seems as if the vertical side is linear, which actually consists of a subtle curve that could only be crafted by advanced technique. The aluminum body is coated with elaborate anodized coating which is also a testament to superior craftsmanship, actualizing refined appearance. The design aesthetic is reminiscent of traditional Japanese lighting, or could also be described as an embodiment of the well-honed sensibility towards Japan's delicately transitioning season and the time within it.

Aroma diffuser using special technology

Though the protagonist of this product is the light function, the aroma diffuser is also a noteworthy point which uses an international patent pending technology. By setting a few drops of aroma oil upon the aluminum plate matrix, it will spread over the entire plate surface through capillary action and efficiently diffuse the scent to the air, assisted by heating operation.

| Specification

Product name	Lei Light Reflection
Function	Lighting, mirror, aroma diffuser
Size	W201×D78×H355mm (Package size: W219×D89×H378mm)
Color	Brut Gold / Black
Accessories	USB Cable (TYPE-C, charging only)
Design	SOL style
Efficiency	Charging time: Approx. 5-6 hours Dimming: 4 types Color temperature: 3 colors (2400K, 3800~3250K, 6000K)
