

MOTA Z3

A streamlined, eco-friendly,
and practical electric motorcycle

SIMPLE DESIGN LANGUAGE

Pushing the design boundaries of traditional motorcycles, Mota Z3 features outstanding performance and a modern, stylish appearance based on a simple design language, ensuring user-friendly operation and exciting driving, providing a new choice for motorcycle enthusiasts.

DOUBLE ECO-FRIENDLY BATTERIES

- Mota Z3 innovatively applies two batteries that conform to the EU battery regulation. These batteries enjoy exceptional performance and long-lasting range aside from being rechargeable, recyclable, and carbon footprint-traceable (whole lifecycle), thus helping reduce Mota Z3's dependence on traditional energy and enhance users' awareness of environmental protection.
- In addition, each battery pack is one-size-fits-all, so they still work well even though the motorcycle is upgraded, providing a long-lasting, reliable, and eco-friendly energy supply.

*EU Battery Regulation: All collected waste batteries will have to be recycled and high levels of recovery will have to be achieved. All battery producers, importers, and distributors along the EU supply chain are obligated to report on their product's carbon footprint using a life cycle assessment (LCA) approach. All these are essential for supporting environmental impact reduction and decarbonisation strategies.

DUAL GEARS AND DUAL MOTORS

Mota Z3 provides a practical and personalized driving solution for urban motorcycle enthusiasts. Two gears (driving mode & sport mode) and two motors (wheel hub motor & mid-drive motor) are available, allowing for free switching based on users' needs and preferences.

CUSTOMIZABLE SADDLE

Mota Z3's saddle allows for personalized customization by changing styles (size, pattern, materials, etc.) based on the user's preferences. A storage box can be added if needed, which makes this motorcycle more convenient.

INTELLIGENT FUNCTIONS

Mota Z3 allows remote control via an exclusive mobile app. It integrates multiple intelligent functions, such as remote anti-theft locking, proximity-sensitive unlocking, online authorization of the rights to use, etc., delivering a new driving and interaction experience.

ENHANCED SAFETY AND STABILITY

Mota Z3 is armed with upgraded hydraulic dampers to keep stable driving on rugged roads, improving safety and comfort.
