

CLOUD SMART SONIC FACIAL CLEANSING DEVICE

The industry-first to use graphene heating technology,
combining cleansing and LED light therapy beauty.

SOFT AND GENTLE CLOUD SHAPE

Featuring a light cloud-inspired shape, this device weighs only 205g, enhancing the visual lightness and comfort. The curved case and cloud-like arcs are not only eye-pleasing but also ergonomic, ensuring tight and stable grip in wet conditions.

In addition, it is equipped with a portable cloud-shaped storage box, which is attractive and practical. This exclusive storage box fits and holds the device well, reducing the impact on the device during bumpy journeys.

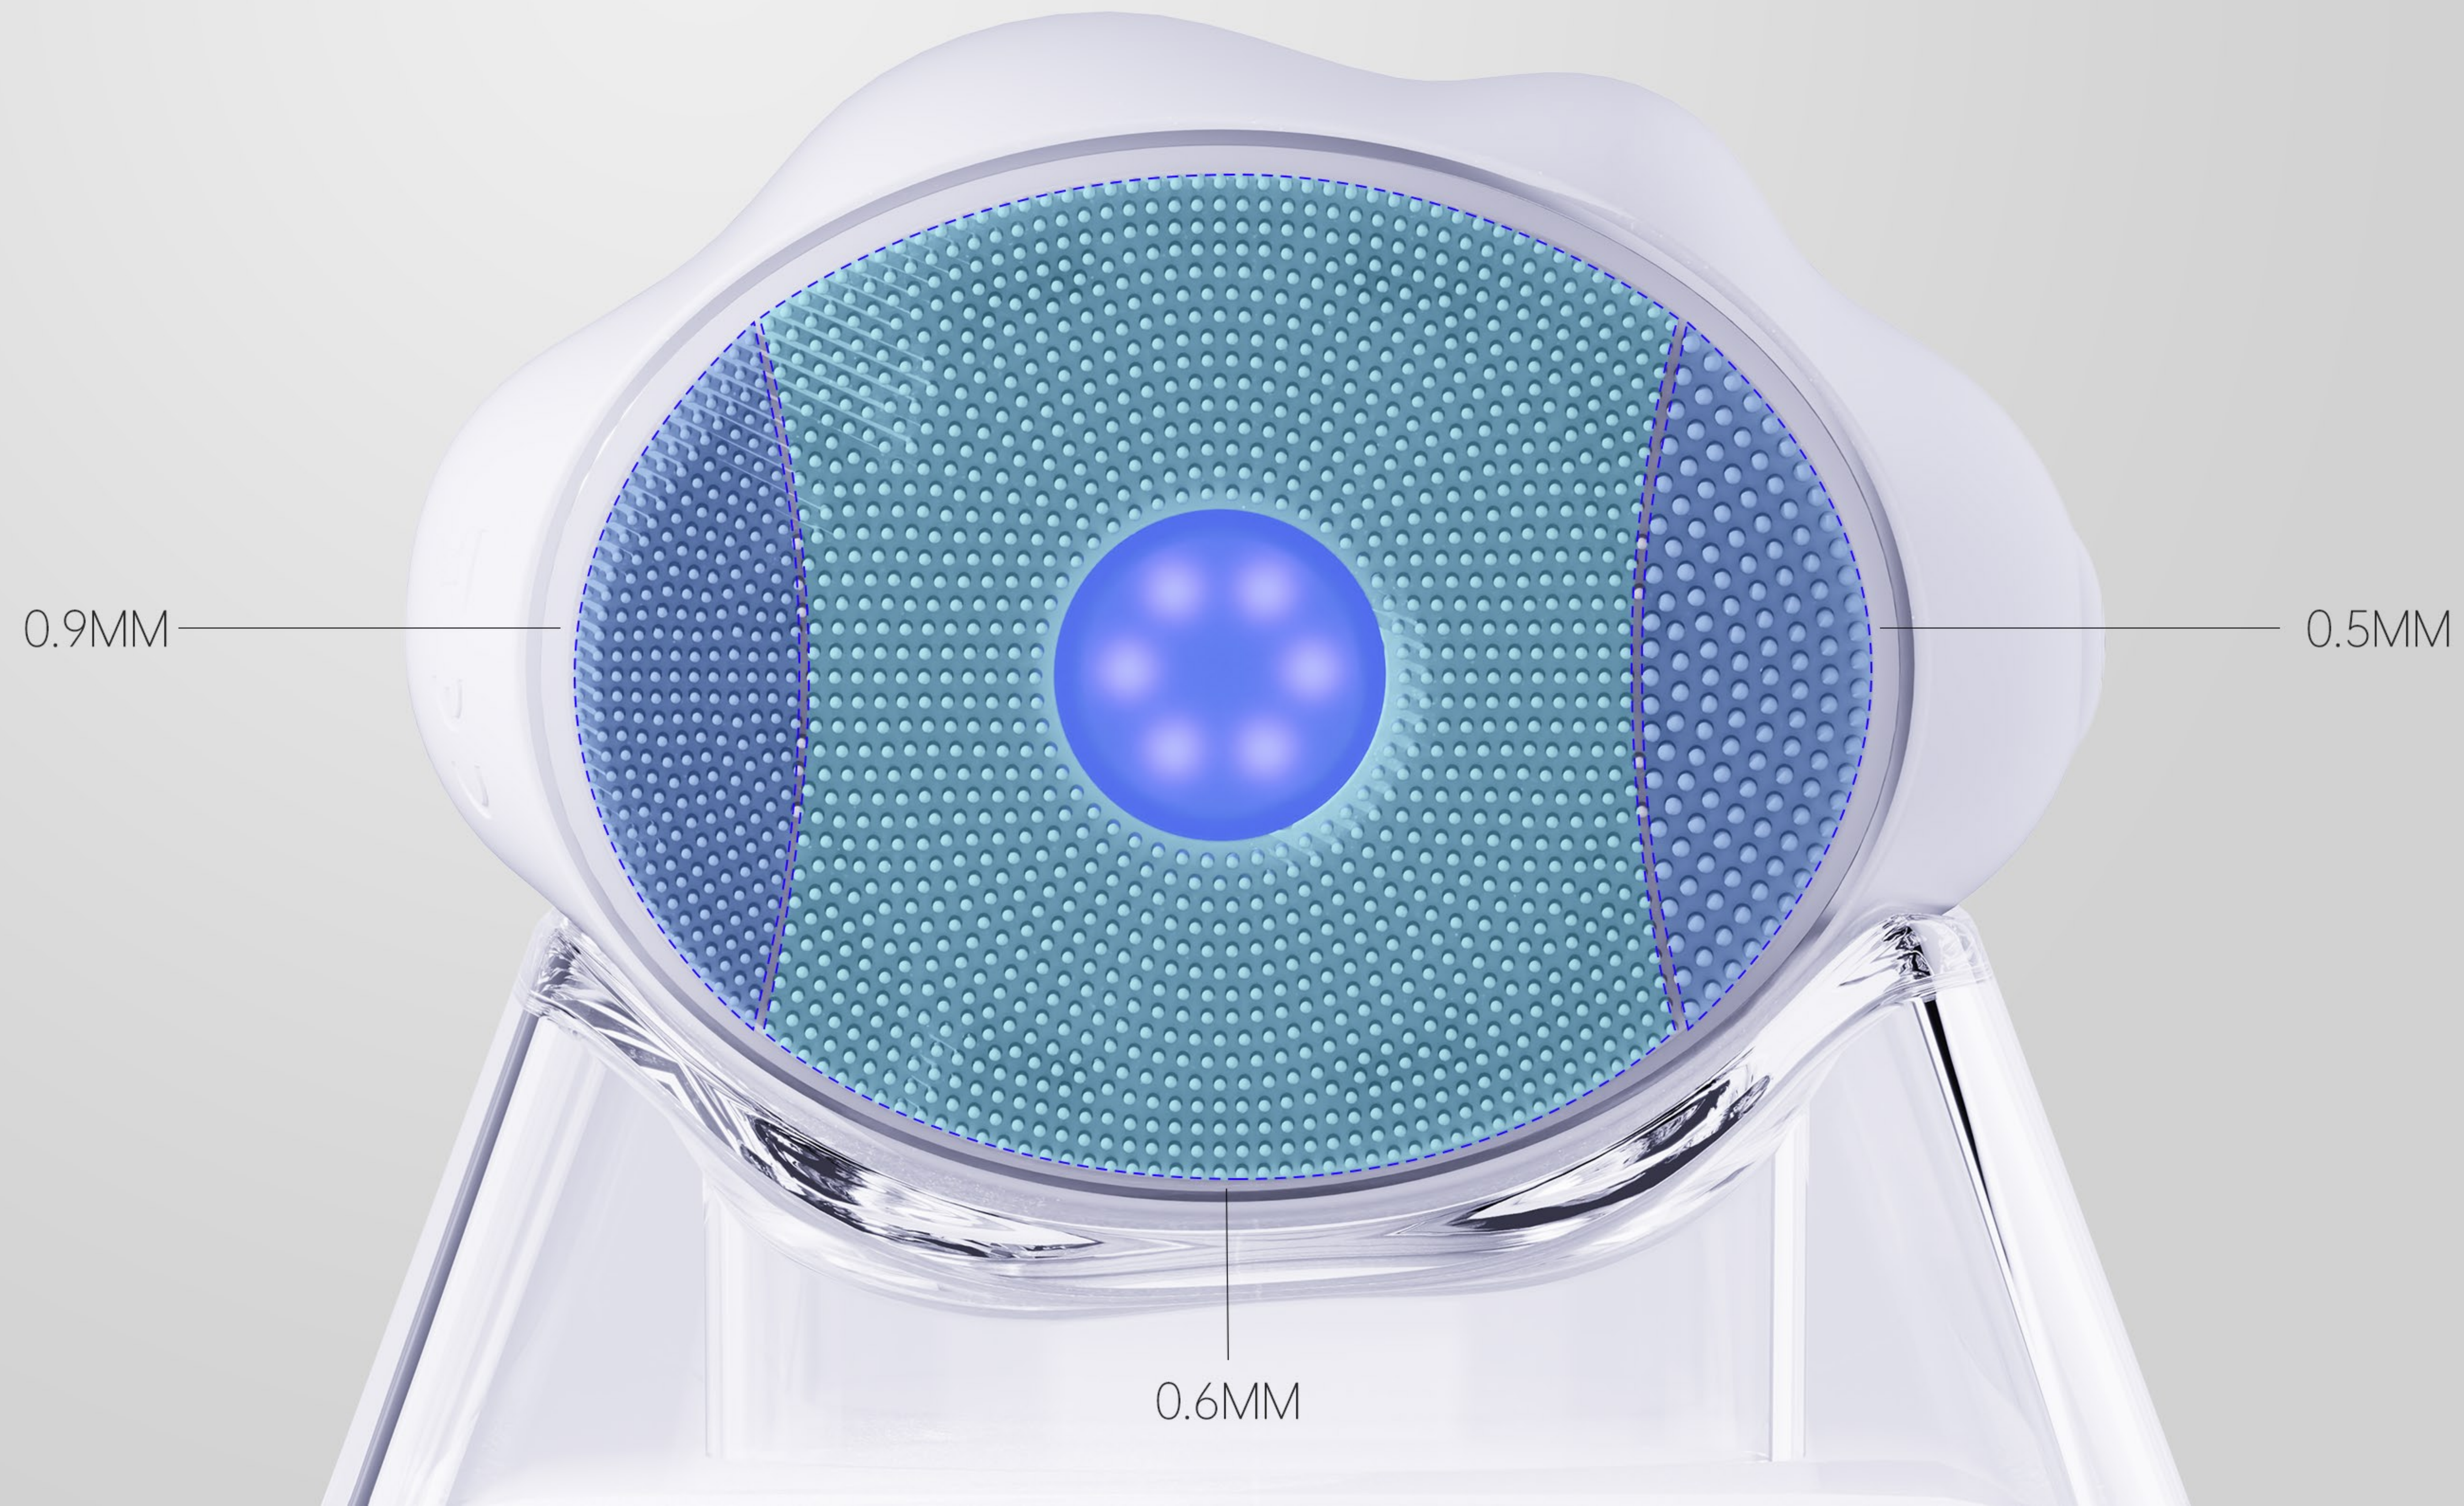

GRAPHENE HEATING TECHNOLOGY, 45°C WARM MASSAGE AND CLEANING

This device adopts graphene (with super thermal conductivity) heating technology, releasing far-infrared rays in power-on status to secure a 45°C warm massage, which helps deeply cleanse pores and promotes microcirculation. Additionally, it achieves an ultrasonic vibration frequency of 33,000 times/min (max.), facilitating blood circulation, removing acne, and reinvigorating the skin.

3-IN-1 HIGH-DENSITY CLEANSING BRUSH

This device applies a triple-zone cleansing brush with up to 1768 ultra-thin bristles: 0.5mm-diameter zone for gentle cleaning off of the makeup, 0.6mm-diameter zone for regular cleaning, and 0.9mm-diameter zone for deep cleaning, enabling finer and softer cleaning for all types of skin, especially for sensitive one.

4-MODE LED LIGHT THERAPY

This device employs four modes (green/red/blue/yellow) of LED light therapy for cleansing and beauty, allowing for free switching based on diverse needs, thus offering an efficient and soft skincare experience.

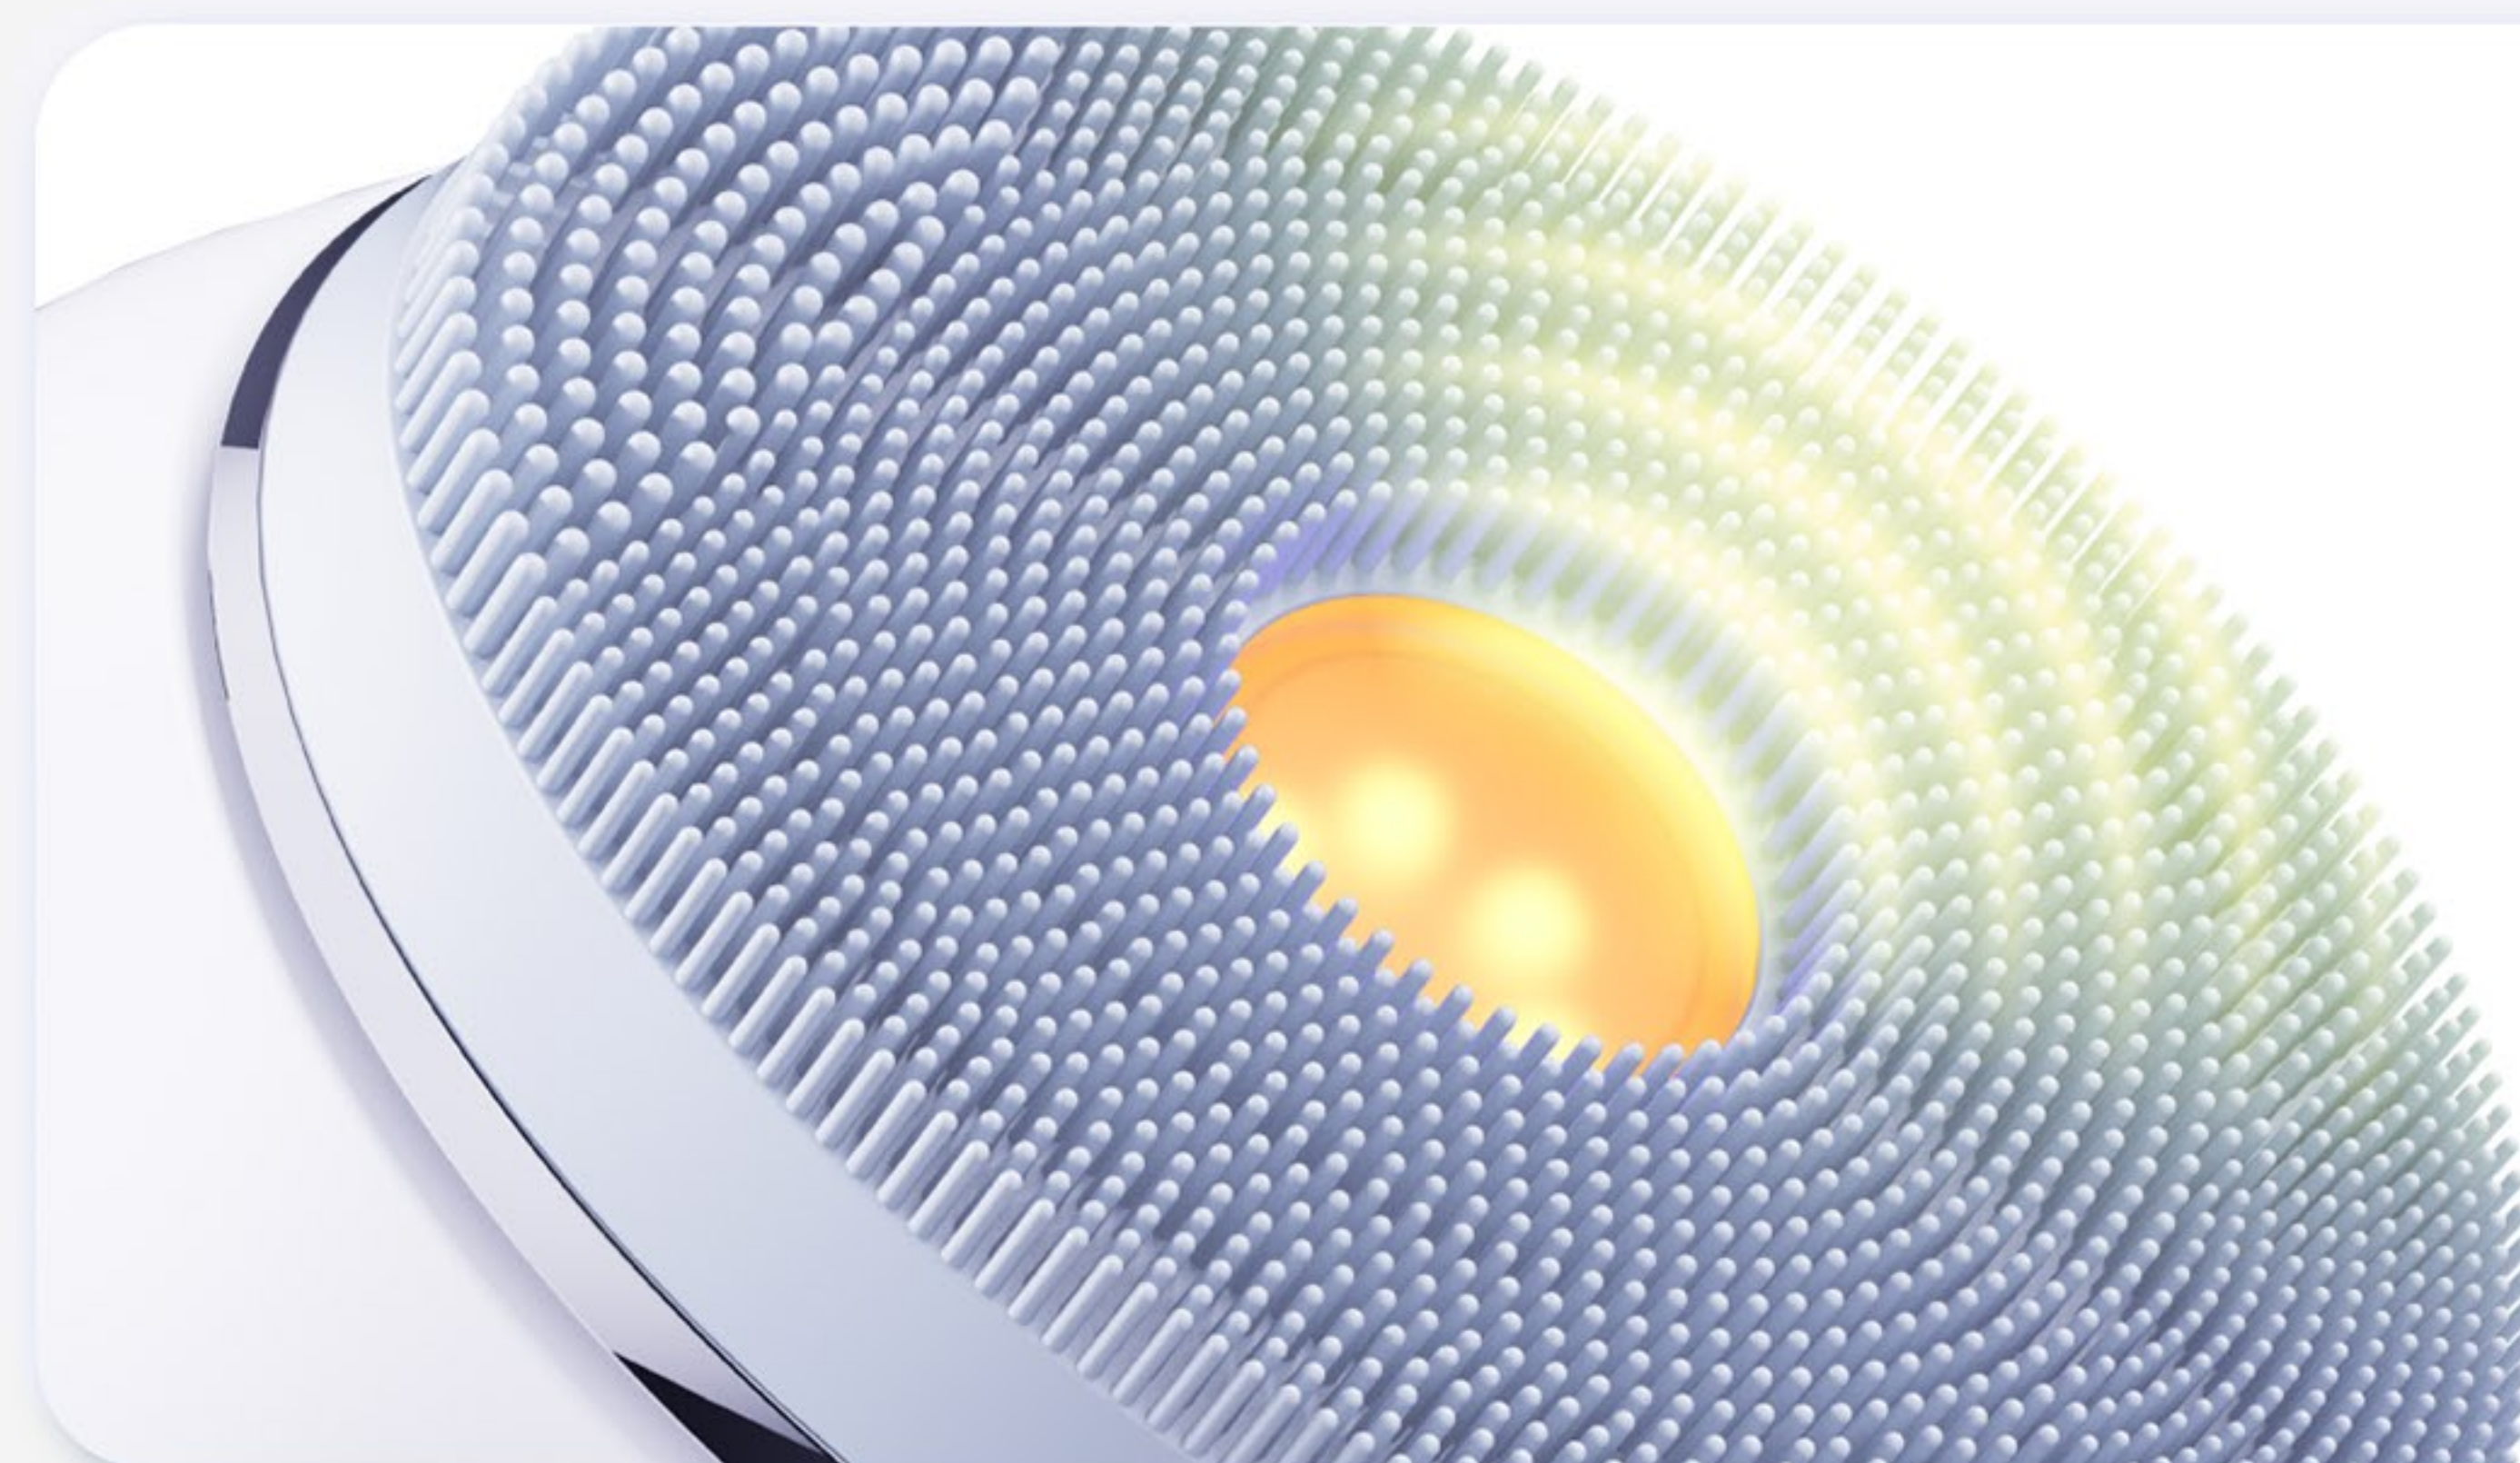

Blue

Deep cleansing
Condition oily skin

Green

Soft massage
Moisturize and soothe

Yellow

High-frequency vibration
Brighten skin

Red

Moderate cleansing
Improve skin elasticity

IPX6 WATER RESISTANCE

This device is waterproof (IPX6), so just wash it with flowing water after use. It also comes with an exclusive drain rack to help drain water, effectively preventing the growth of bacteria.
