

# SMWS

Perfect combination of design aesthetics  
and experience aesthetics

## OUTSTANDING SILKY TOUCH

SMWS utilizes ultra-fine Lyocell and long-staple cotton (the fiber length is greater than 36mm), ensuring an outstanding silky touch while securing comfort, breathability, and durability.

## ANTI-BACTERIAL AND ANTI-MITE

In addition to great comfort, SMWS enables exceptional anti-bacterial and anti-mite performance in non-irritating ways, creating a clean and skin-friendly sleep environment.

## CONTRASTING COLOR DESIGN

SMWS takes a grey-orange contrasting color design, infusing the tranquil bedroom with warmth, energy, and a positive vibe.

## ENJOYABLE VISUAL EXPERIENCE

The duvet cover is embellished with finely stitched geometric embroidery in the middle, which is full of order but in freestyle and appears to be the starry sky, enhancing the 3D visual effect and artistic sense.

## GREEN AND ECO-FRIENDLY

Aside from excellent comfort and texture, Lyocell is hailed as green fiber. It is more eco-friendly, non-toxic, and recyclable compared to traditional viscose fiber, embodying the idea of being green, low-carbon, and eco-friendly.
