

8°

8° helps you to correct
your sitting posture

Maybe you sit in a distorted posture after working or studying for a long time.

Maybe you are suffering from cervical and lumbar spine diseases but can't correct your sitting posture.

8° can help you

When sitting in a standardized posture
When the center of gravity is normal

When sitting is not standardized
When the center of gravity is tilted forward

When sitting upright with the
center of gravity at the back

When sitting in a tilted position
with the center of gravity in front
