

Space Porthole

A multifunctional illuminated mirror
that can serve as a mirror and a home
decorating ornament

Intelligent sensing function

- | The illuminated mirror can switch seamlessly between the "mirror" and the "artistic decorative painting". When the user approaches, the planetary pattern display automatically fades out and returns to the mirror mode; when the user is far away, the planetary pattern gradually fades in so that the illuminated mirror appears to be an artistic decorative painting.
- | This process eliminates the hassle of manual operation, providing a natural interactive experience that seamlessly switches between functionality and artwork.

Customizable shapes

The outer frame and planetary pattern display of the illuminated mirror can be customized to meet the needs of different room layouts and fit into a variety of interior decorating styles to achieve an integrated visual aesthetic of home decoration.

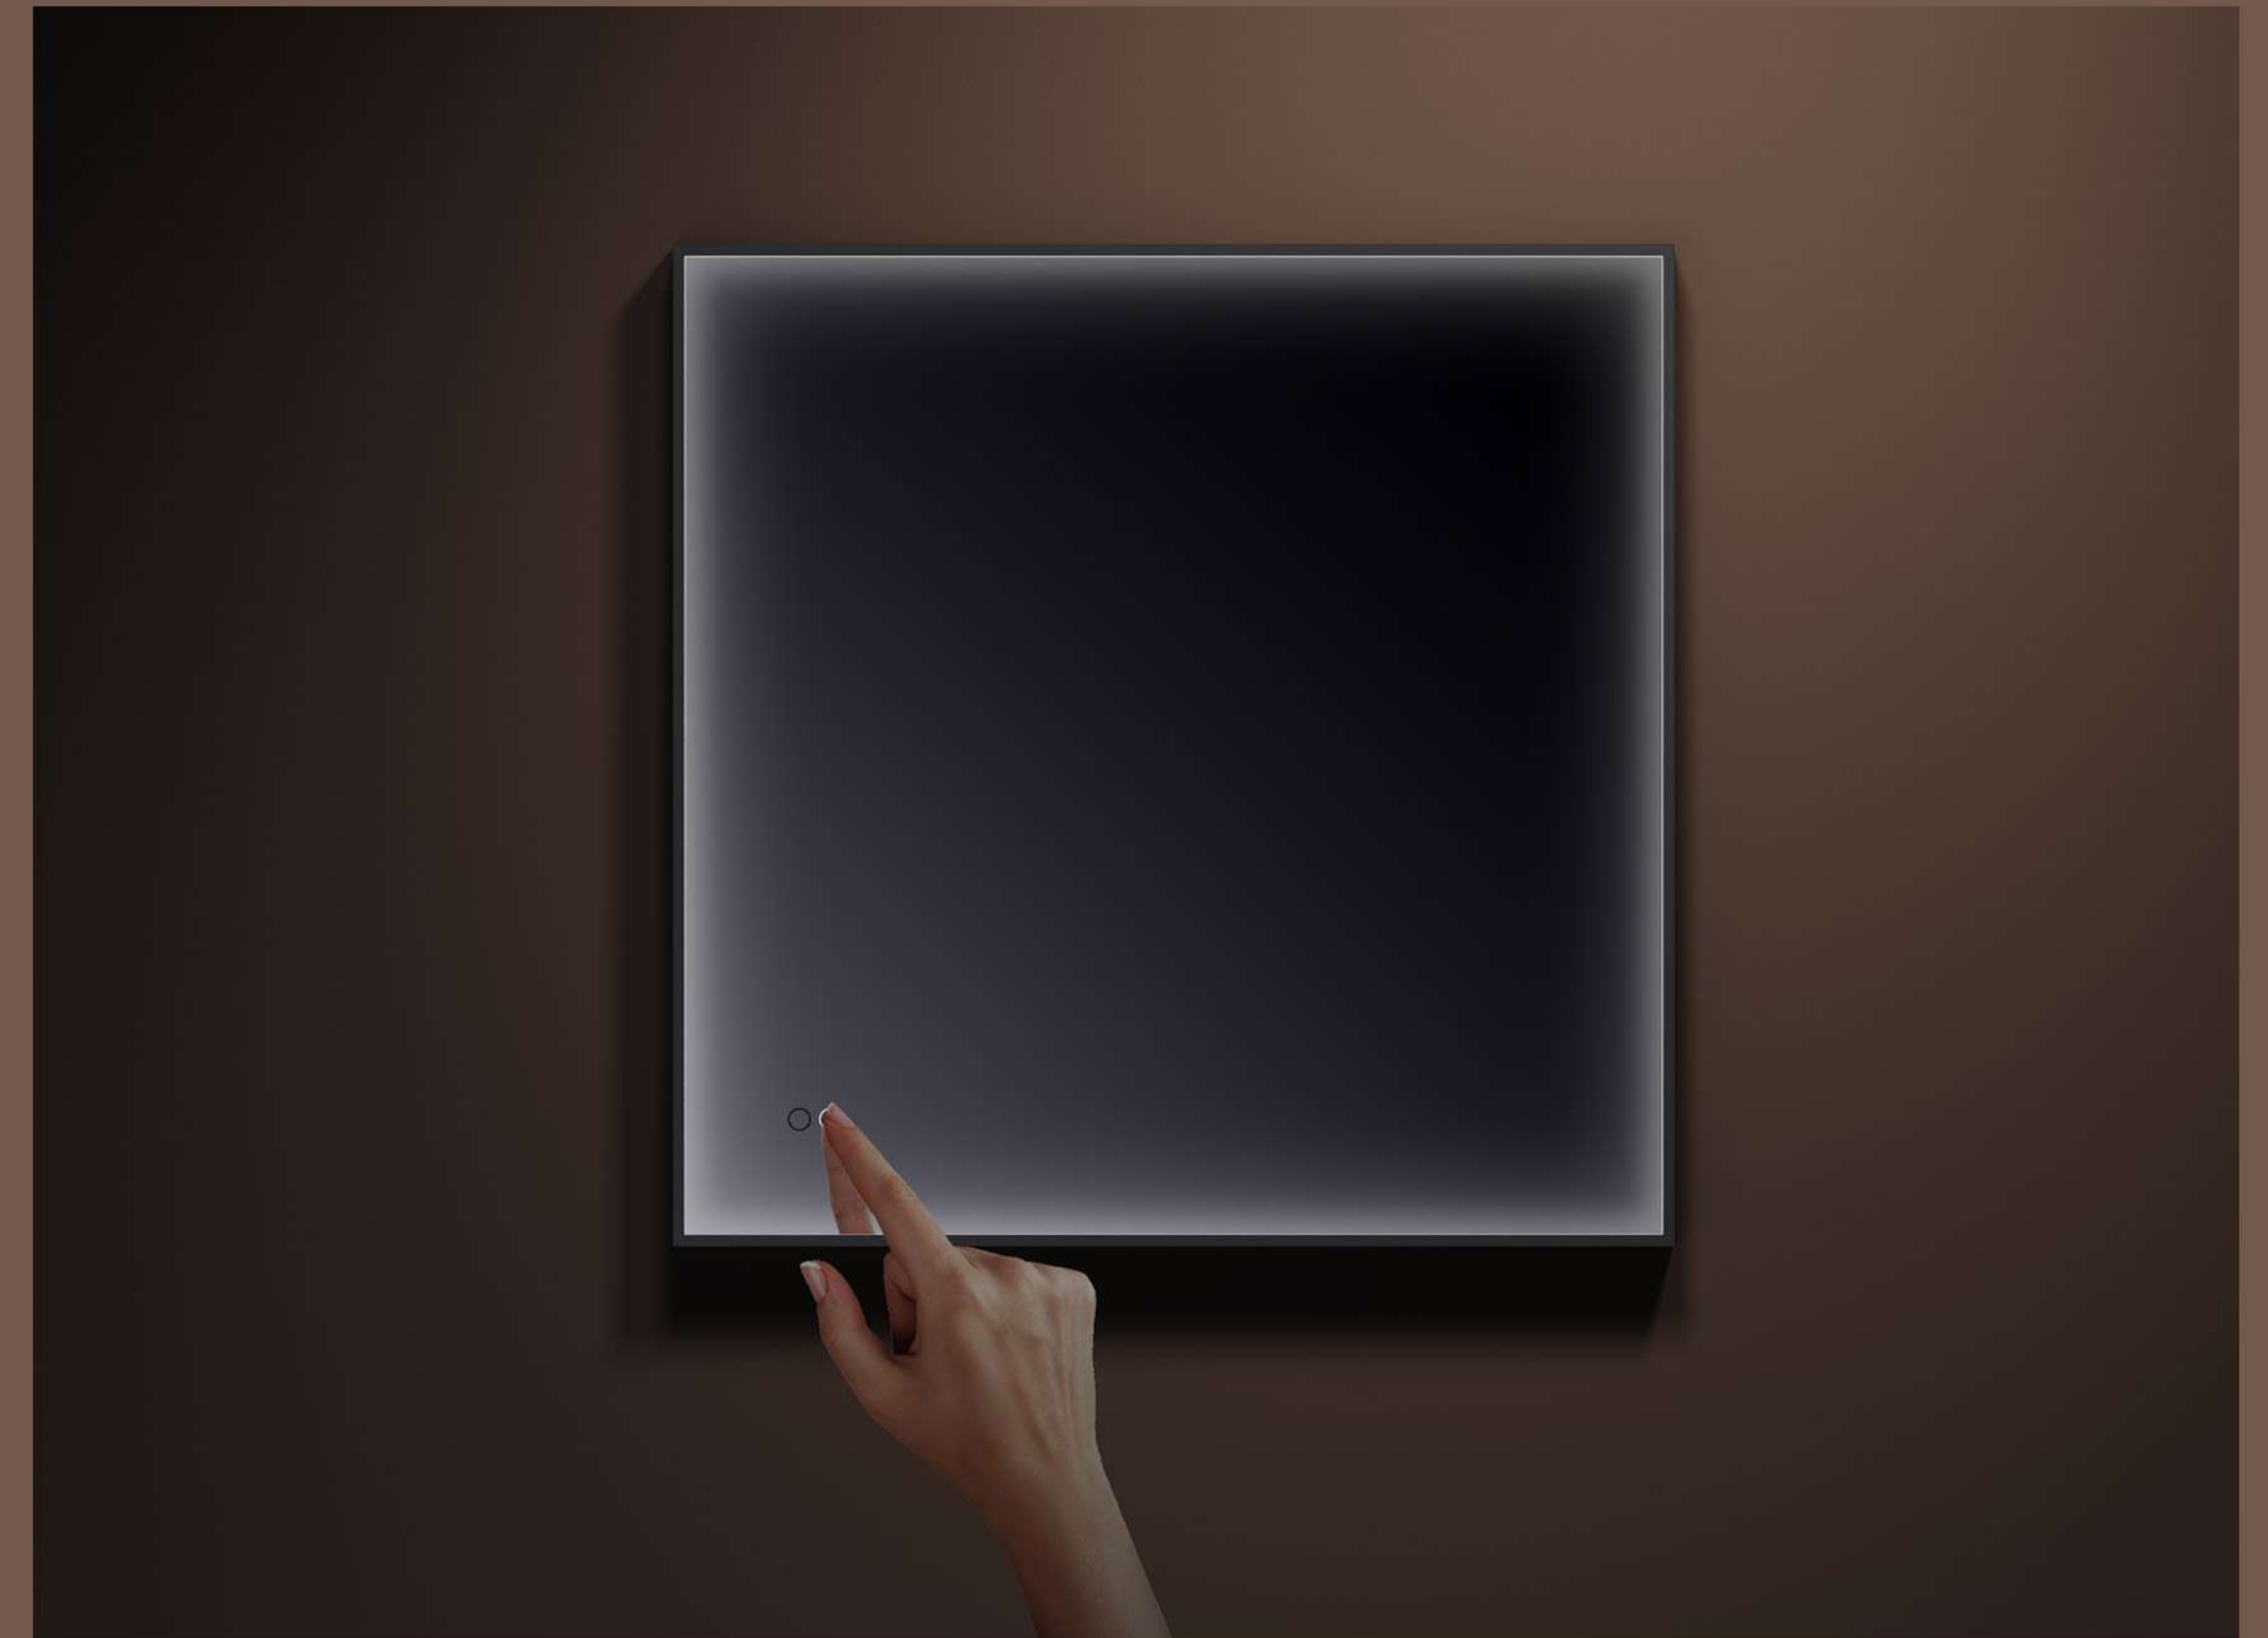

Customizable display patterns

The customization of the display patterns further enriches the user's visual experience. The display patterns are not limited to the planetary pattern, which brings pleasant visual enjoyment and surprise to the user. As a result, when not in use, the illuminated mirror can become an artistic spotlight in the home to enhance aesthetics.

Simple operation

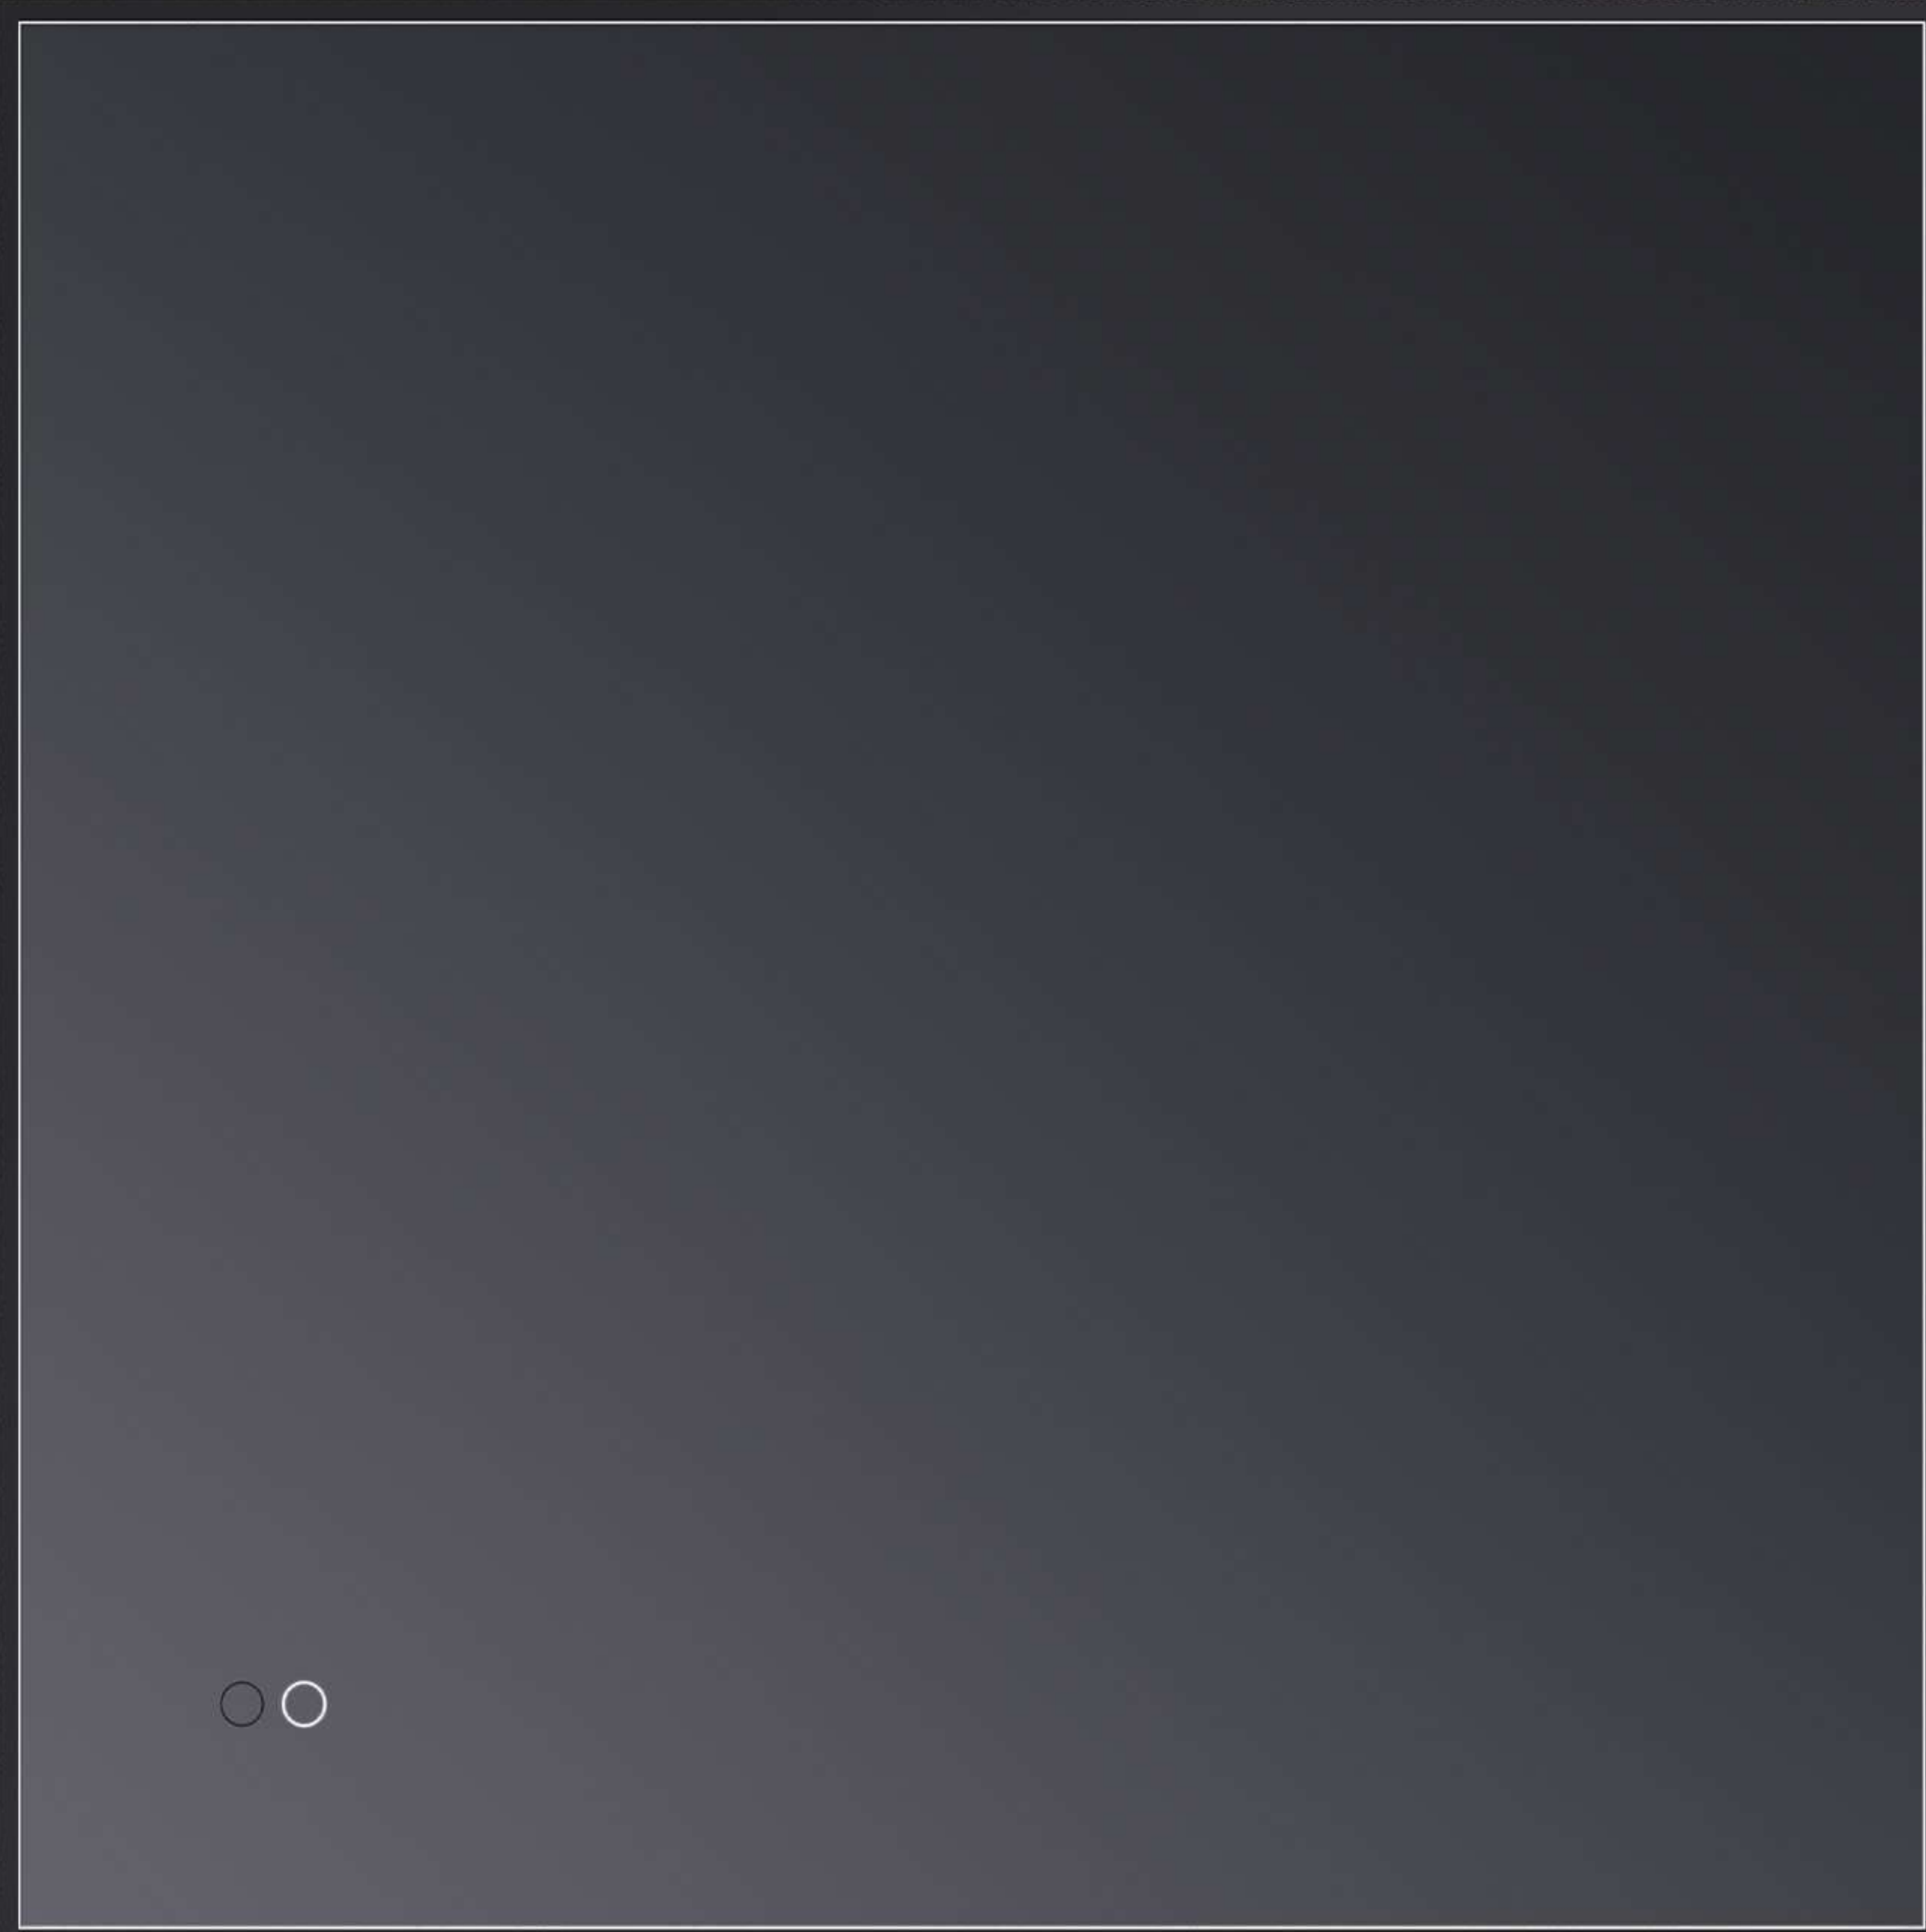

The Space Porthole has two rounded touch areas to control the light strips and display patterns. Tap once to turn on/off related functions, tap twice to create a seamless transition between white light and warm light, and tap and hold to enable brightness variations. Intuitive operation reduces the learning curve and enables natural interaction without having to think

Excellent user experience

The Space Porthole is treated with a coating process to possess anti-fogging, anti-glare, corrosion-resistant, and other superior properties, adapting to a variety of environments. The light strips adopt a hidden design to ensure soft rays that are easy on the eyes even in the brightest mode, offering a friendly user experience.

Modern intelligent home aesthetics

The Space Porthole combines artistic design and practicality to reflect the way the user lives. It features intelligent sensing and personalized customization, providing the user with multifunctional artwork that can serve as a mirror and add visual appeal to the space when not in use. It gives an exclusive meaning to this everyday activity and interprets the modern intelligent home aesthetics.
