

## Essonio Pro

At the forefront of modern audio technology with an innovative design and superior performance

ENC and ANC

## ENC and ANC technology

The product is equipped with ENC and ANC technology to minimize ambient noise and make for clearer, more natural conversations.

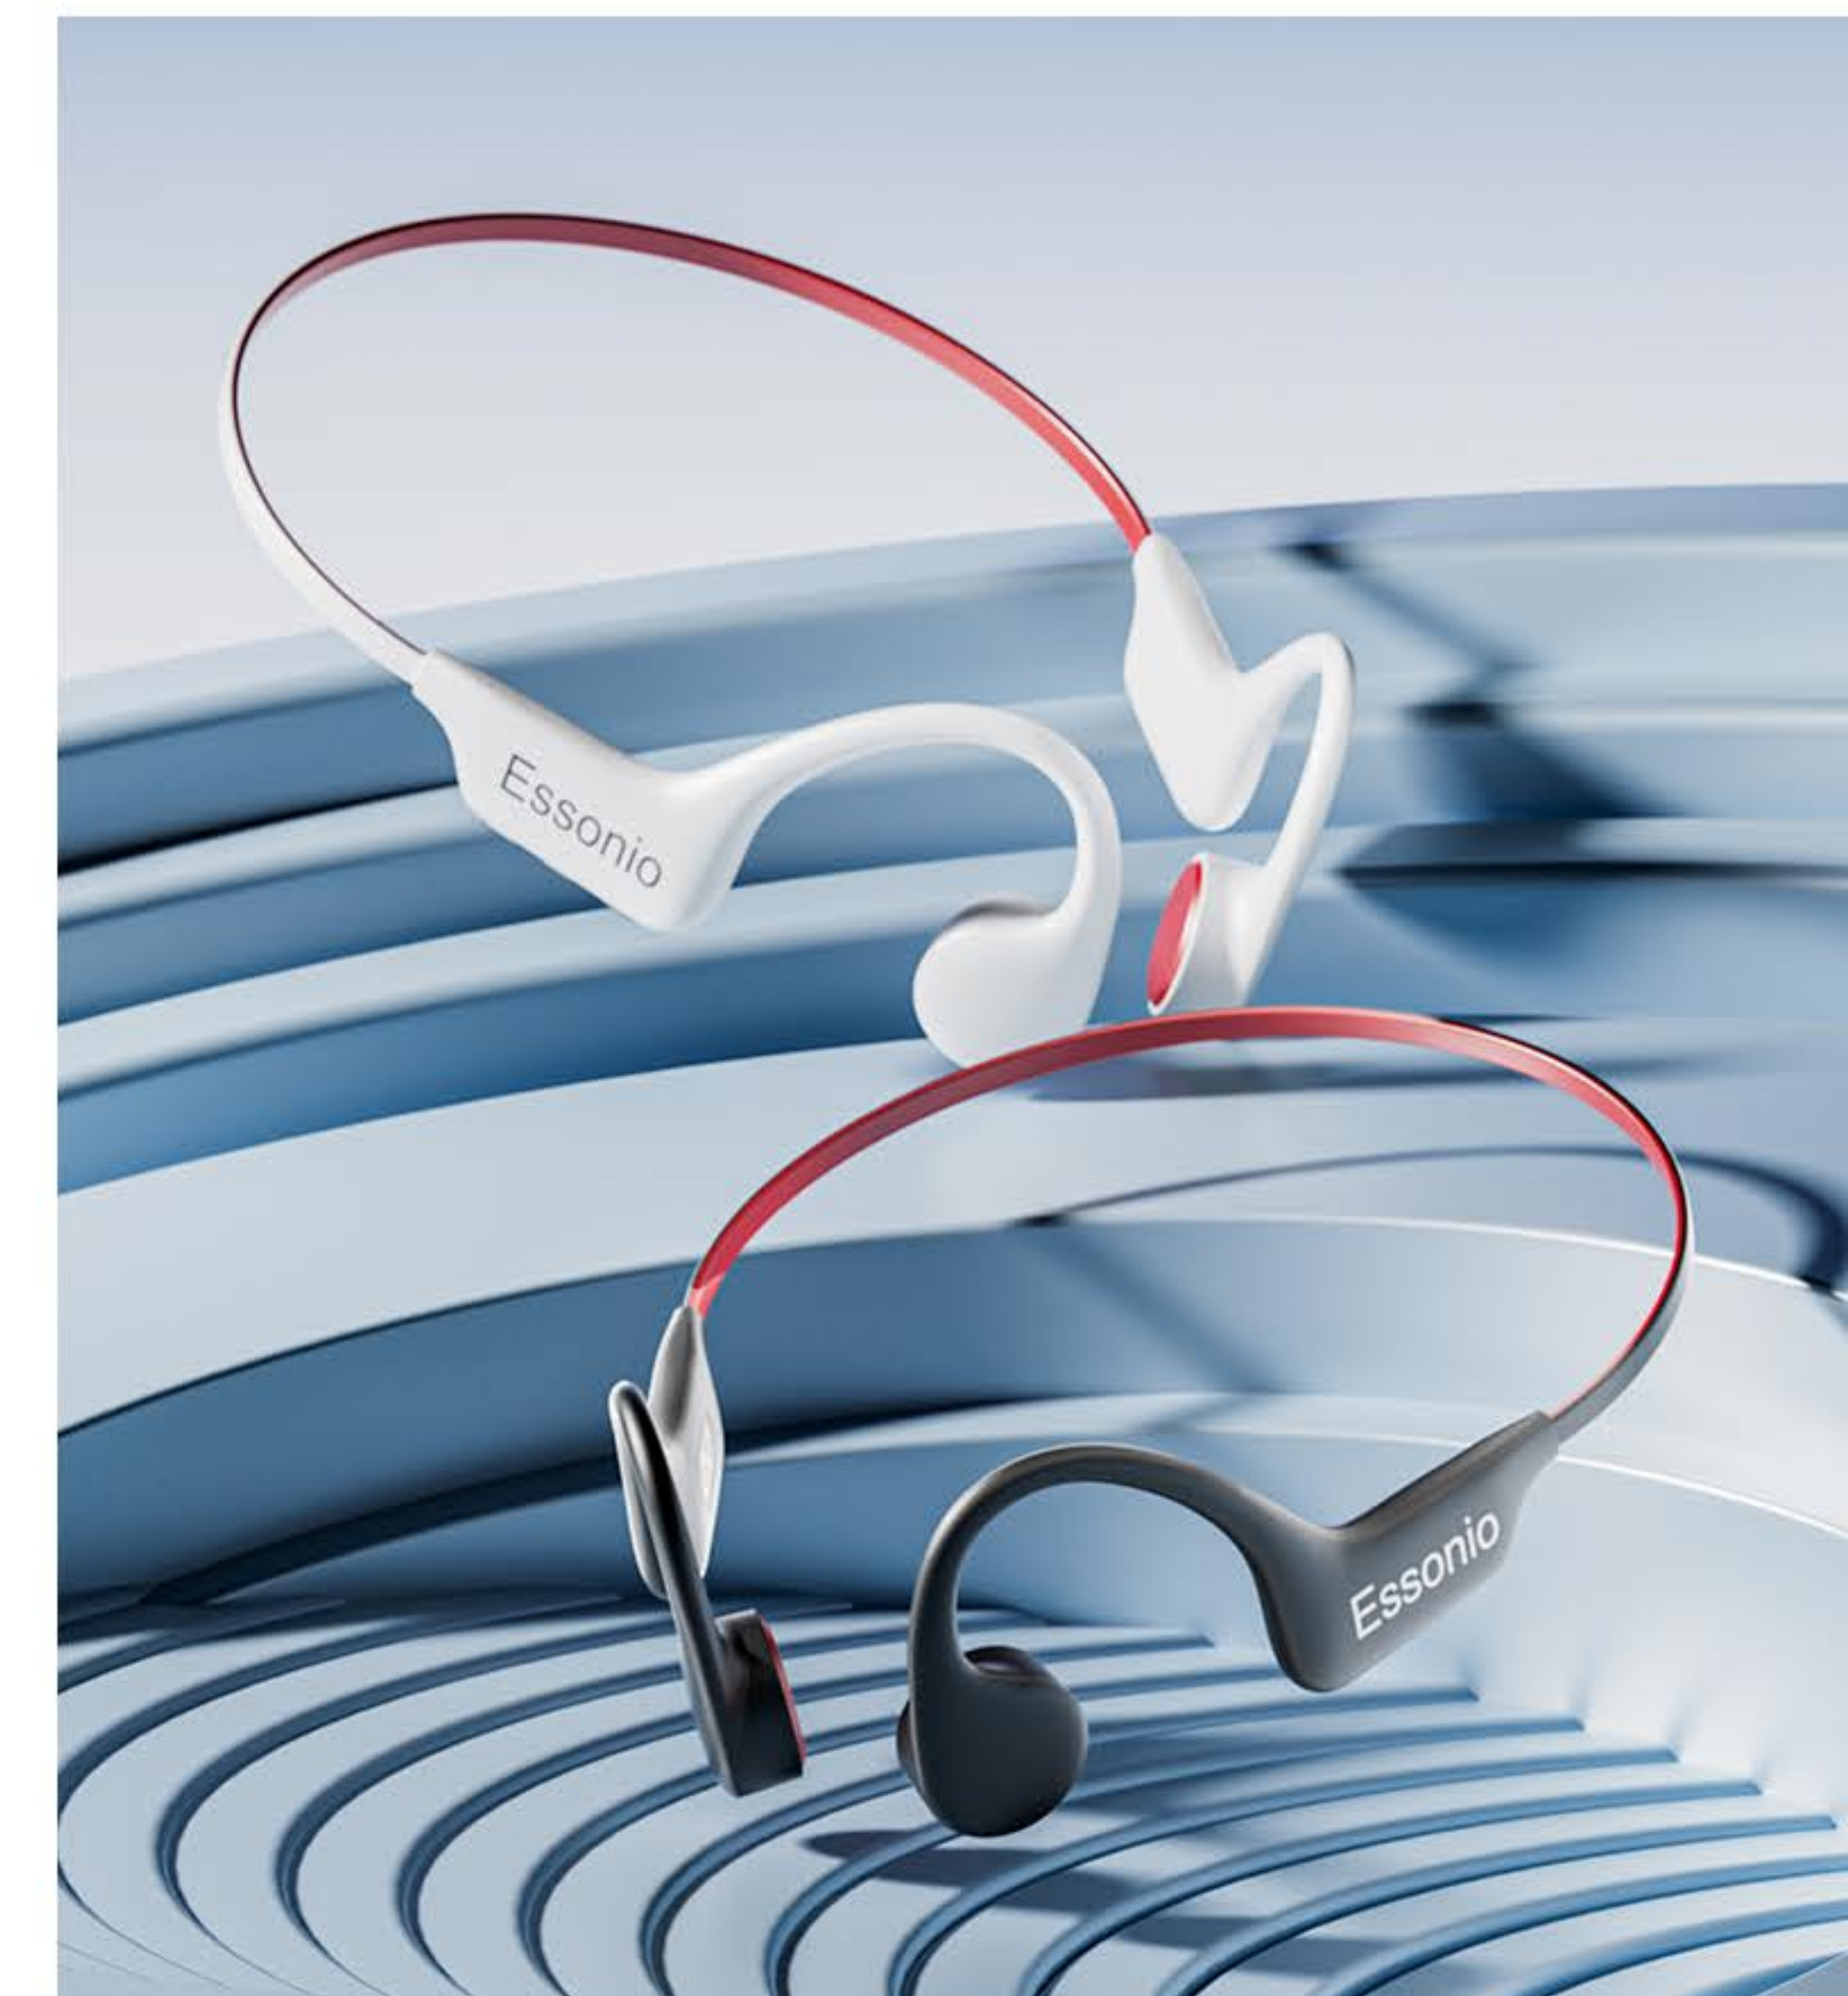

## Superior performance

The advanced bone conduction technology, combined with a dual audio power amplifier design, creates a stereo sound effect.

## Superior performance

With IP68 water resistance, the product exhibits outstanding water and dust resistant properties, ensuring normal use underwater.

## Superb materials and craftsmanship

The Essonio Pro is ergonomically designed to be soft, light, and stable, causing no fatigue even after prolonged use. The point of contact is made from silica gel for a more comfortable experience.

# A wide range of usage scenarios

Boasting exceptional stability and protection, the Essonio Pro is suitable for most sports scenarios, allowing the user to enjoy wonderful melodies during intense exercise.

## Commitment to sustainability

The Essonio Pro is made from over 90% recycled materials such as TPE, ABS, and silica gel, contributing to sustainability.
