

Puff Snow Boots

Soft and cozy snow boots inspired by melted fluffy puff

Fluffy and Cute Appearance

The shoes feature a fluffy and melted puff-inspired appearance. This product takes puff color as the main tone, dotted with cream white. It boasts a fluffy bow and a three-dimensional melted cream pattern embellished outsole periphery, creating a soft and waxy visual effect.

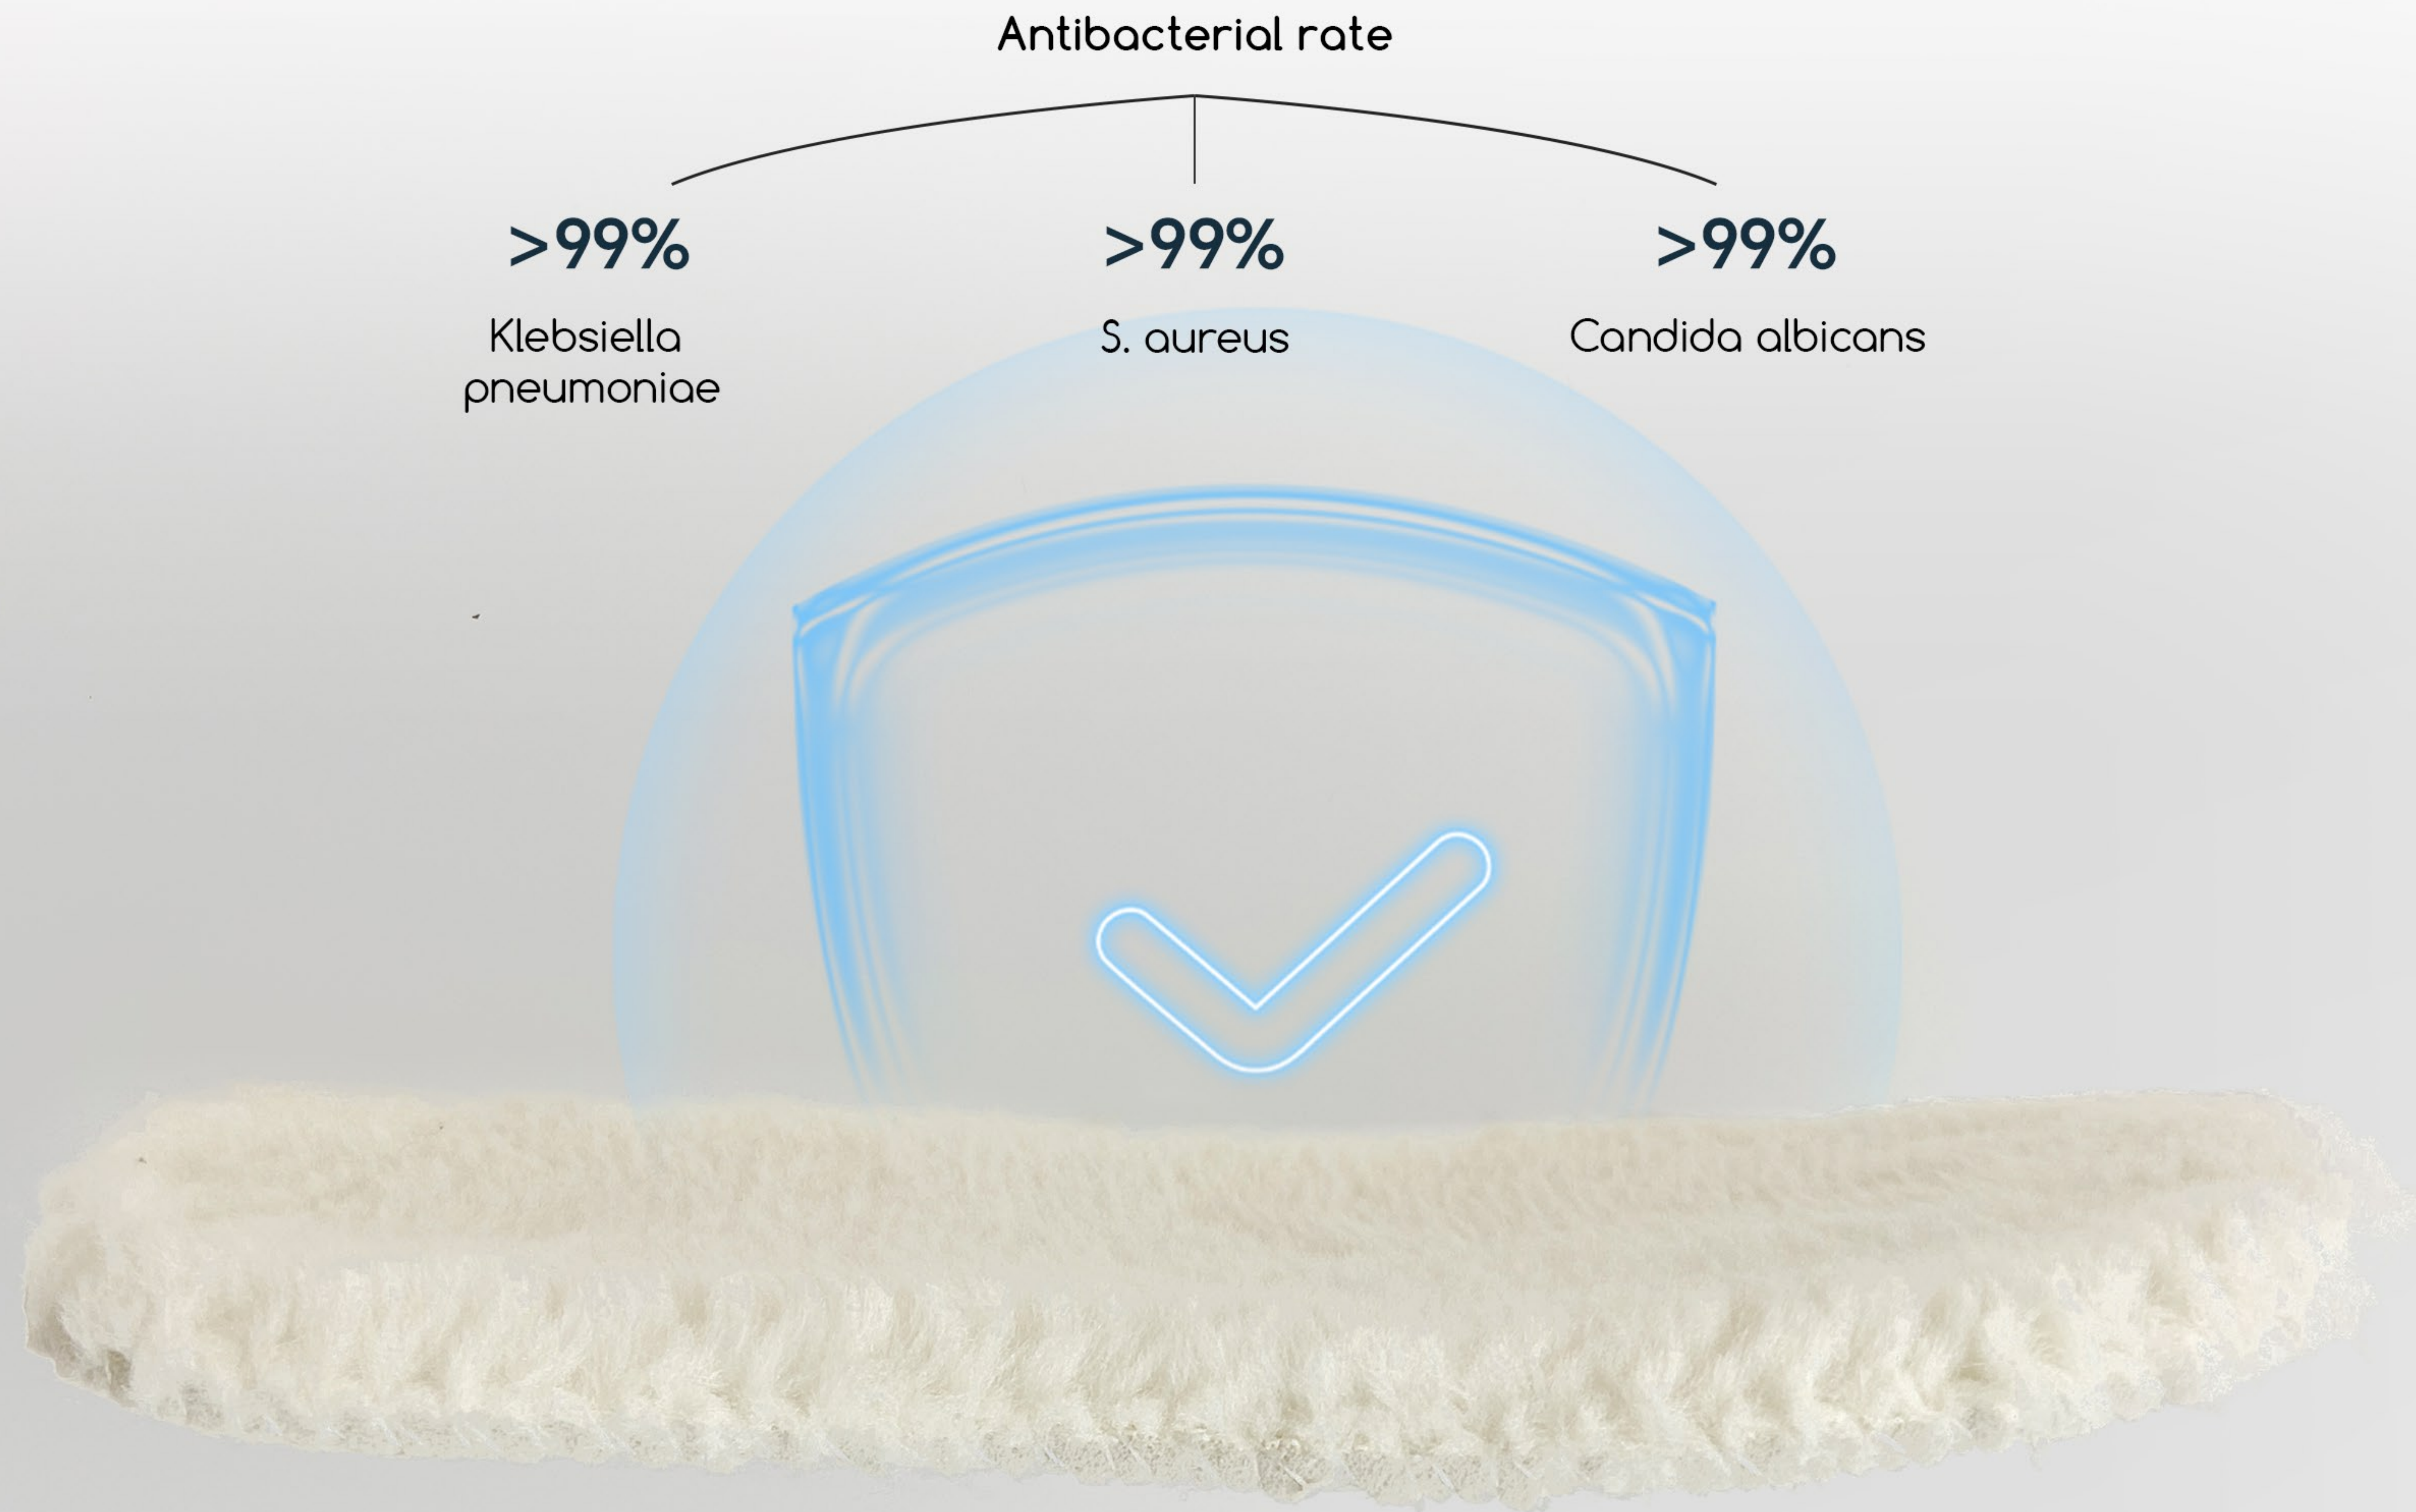

Soft and Cozy Wearing Experience

The inner adopts high-density **800G** temperature-locking volcanic plush for excellent warmth and softness, making feet seemingly wrapped in soft clouds. The anti-mold and anti-bacterial insole further improves softness and cushioning.

Pioneering Anti-mold and Anti-bacterial Insole

The pioneering anti-mold and anti-bacterial insole and plush ensures outstanding warmth and bacteria- and odor-resistance, with a sterilization rate of **99%**, to protect children's foot health.

Lightweight Design

The outsole utilizes polymer foam to be **40%** lighter than regular rubber and TPR material, reducing the burden on feet for a more comfortable wearing and walking experience.

Superb Water Resistance

The upper applies a **0.6mm** protein leather microfiber and a water-repellent structure to enjoy superb water resistance, avoiding being soaked by rain and snow compared with regular UGG suede snow boots. Eco-friendly raw materials help reduce plastic pollution.

Enhanced Safety

- | The toe cap is higher than the upper, coupled with the three-dimensional melted cream pattern decorated outsole periphery, lowering the risk of getting toes injured due to bumping.
- | The alternating zigzag patterns and wave textures on the bottom of the outsole strengthen the grip for better slip resistance.
