

Quotes from User Testing

From user testing, 4/4 participants (who have diabetes or are diabetes' caregivers) validated that forecasted glucose level and glycemic index are the top 2 priority information that they need after they log their meal to confirm or suggest their eating behaviors.

Having the information always there and the easy access is life changing. It can help diabetics to manage their diabetes.

from a diabetic

The design of the camera is convenient and amazing, which can help the diabetic control the diet. However, it will be great if the wristband can record daily exercise data. If the wristbands are on sale one day, I will buy one for my farther who suffers from diabetes!

from a diabetic caregiver
