

RHYTHM OF TIDES RUG

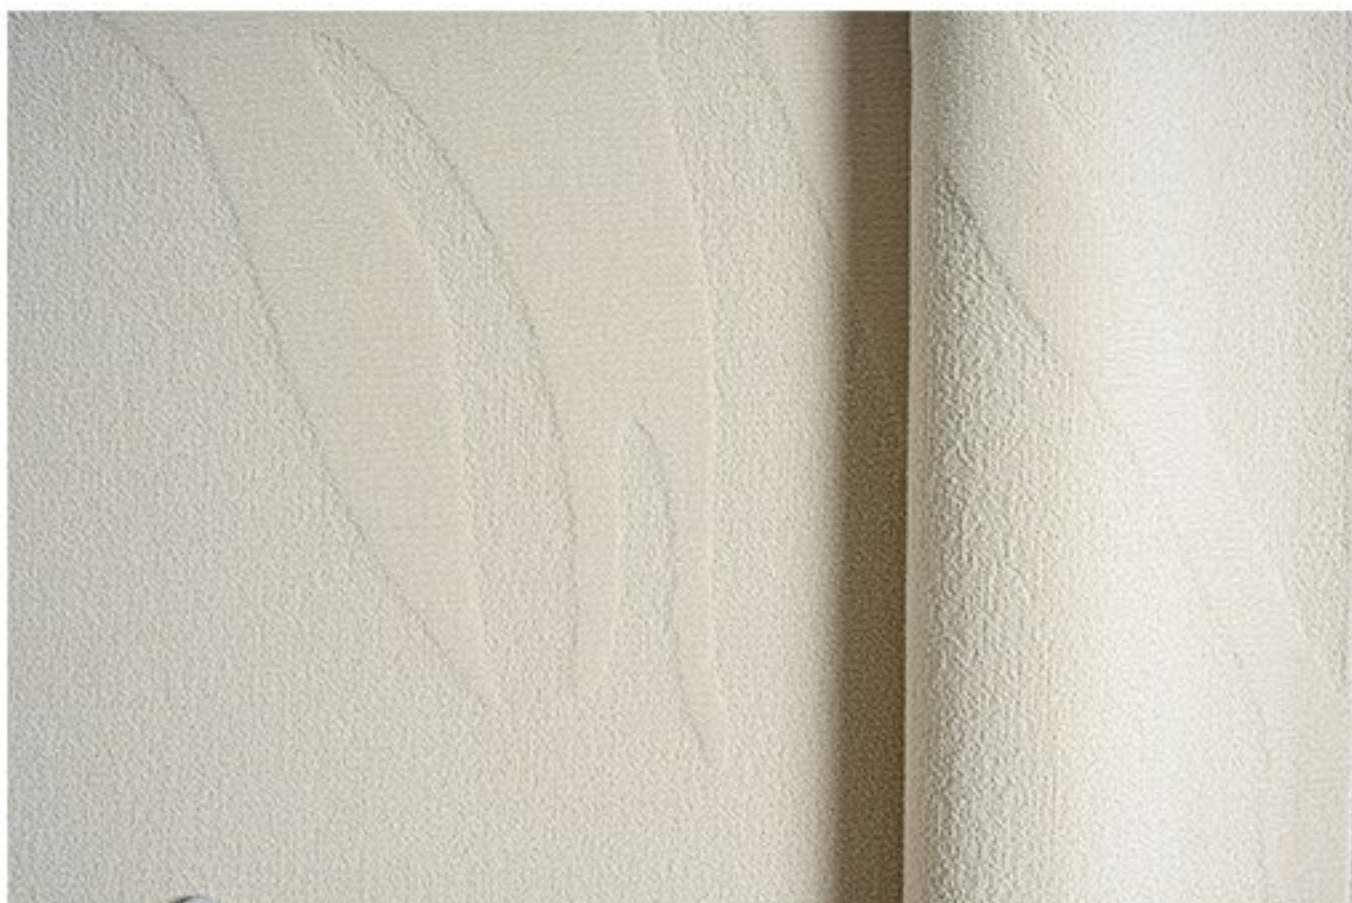

To deliver comfort
and tranquility through an
ocean wave texture

Micro Relief-like Ocean Wave Texture

This rug features an appearance inspired by ocean waves along the coast. Pile at varying heights mimics the undulation of ocean waves to deliver a stunning visual effect reminiscent of flowing ocean waves, infusing the space with a cozy and tranquil vibe.

Soft and Comfortable Foot Feel

The fine polypropylene fleece-twisted surface with dense piles feels soft and cozy, reminding you of the silky-smooth mousse. Walking on the rug is like walking on a beach, with the ocean wave-like pile massaging your feet, reliving your fatigue after a busy day.

The tufting process makes the rug present a pliable yet resilient sheen and premium aesthetic.

Innovative Waterproof Structure

Innovative original yarn waterproof material and polypropylene material are combined to form fine polypropylene waterproof yarn, which has super water repellence due to its innate molecule-grade waterproof structure, so the rug face enjoys a lotus effect, avoiding water penetration and enabling exceptional water and stain resistance. These features help save maintenance costs and allow you to enjoy relaxing leisure time.

Stain Resistant and Easy to Clean

The arch-shaped loop structure helps form a high-low 3D texture, preventing the rug from hiding dirt. Therefore, this rug is easy to clean via household vacuum cleaners/sweepers, providing a hassle-free care experience.

Elegant and Comfortable Ambiance

The color schemes of pure white and ivory white add an elegant touch to the interior space, showcasing the mildness of ocean waves from the visual and tactile aspects, creating a graceful and artistic atmosphere, and bringing users spiritual comfort.
