

KAADAS K-Series Smart Lock

Evolutionary Global Innovation in Anti-Pinch Smart Locks

The KAADAS K-Series smart lock is a revolutionary innovation in smart door lock technology, featuring the proprietary K-AI security algorithm framework and a range of advanced functionalities. With a user-friendly design that separates the handle from the panel, the lock offers flexible left or right handle installation, while the one-sided handle design prevents hand pinching during door operation. Equipped with advanced recognition technology, it reliably handles fingerprint, facial, and palm vein identification even with wet hands, dirt, or low lighting, delivering a smart, safe, and convenient experience for every home.

Detachable metal handle

Rotate and install to change the direction of the handlebar

Interchangeable handle materials

The detachable handle can be customized with various eco-friendly materials

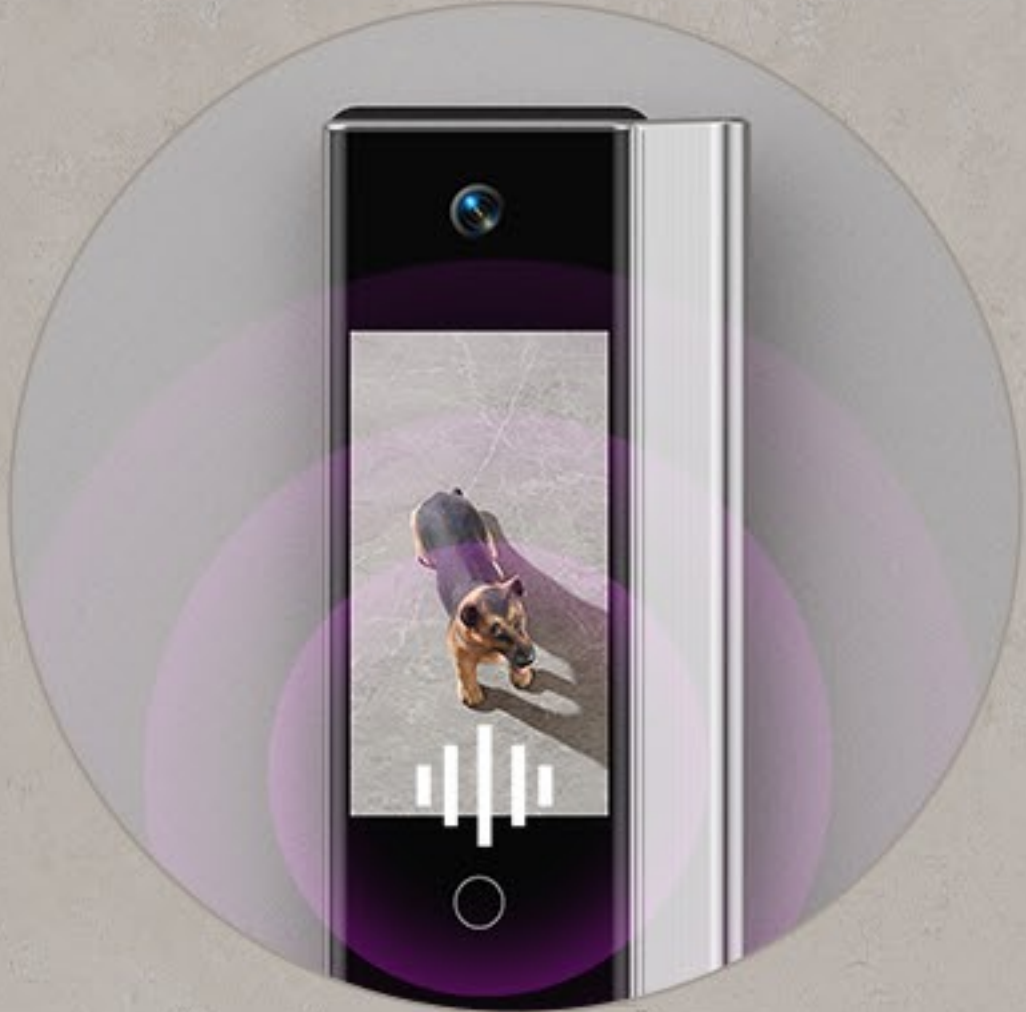

KAADAS K-Series Smart Lock: Bringing Convenience and Warmth to Your Pets Too

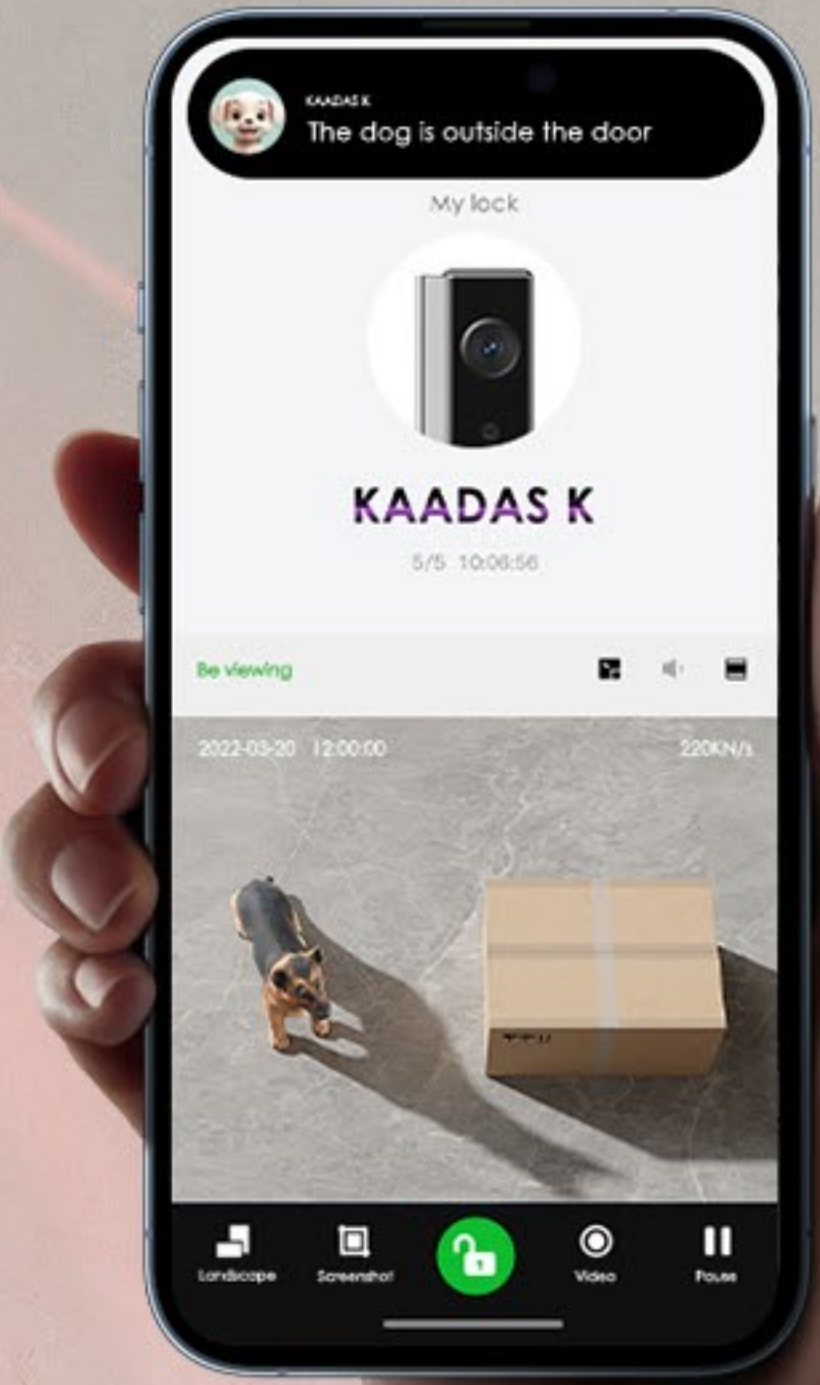

Traditional smart locks typically focus only on facial recognition for humans, overlooking the needs of beloved pets. The KAADAS K-Series smart lock, however, introduces an innovative pet recognition doorbell feature, allowing pets accidentally locked outside to alert their owners via the smart doorbell. Additionally, advanced technology significantly reduces energy consumption, extending battery life and minimizing the environmental impact of frequent battery replacements.

The Most Powerful Smart Lock

This series integrates industry-leading AI 3D facial recognition technology, boosting recognition speed by 250% and achieving an impressive accuracy rate of 99.999%. With AI-enhanced adaptive learning, the system continually optimizes the recognition algorithms, enabling faster, more accurate, and more secure identity verification.

Bottom Camera: Innovation and Care Redefined, Transforming Your View

The bottom camera provides 24/7 real-time 360-degree monitoring, ensuring package surveillance, online signing, and detection of unfamiliar visitors or pets. The mobile application promptly notifies users, allowing them to grant or revoke access to their home from anywhere in the world. This feature enables convenient temporary access for pets, guests, service personnel, or delivery drivers, ensuring safety and flexible management.

One Lock, Connected: Building a Smart Home Ecosystem

The KAADAS K-Series smart lock seamlessly integrates with smart home ecosystems, enabling smooth collaboration with cameras, doorbells, lighting systems, and voice assistants. This allows users to conveniently manage their smart home systems when entering or exiting. The smart lock communicates with the doorbell to send live visitor video directly to the user's smartphone. Integrated with voice assistants like Amazon Alexa, Google Assistant, and Apple Siri, users can control the lock with voice commands, enhancing both convenience and ease of use.

**Enable seamless connectivity
for all smart home devices**

○ Indoor Camera: Enables real-time video intercom for remote communication

○ Fall detection, fire alarms, and other emergency alerts

○ Real-time remote SOS function

○ Large LCD display

Minimalist Design

With a minimalist design philosophy and exceptional aesthetic appeal, users can customize its color to match various interior styles or personal preferences. Its surface is smooth and sleek, free of any unnecessary adornments, and the under-screen keypad opens effortlessly via sensor activation, ensuring a clean and streamlined design is perfectly presented.
