NATURA REST

BED SET

With its soft contours, this design offers an elegant and calming aesthetic, combining natural materials and timeless style to bring a peaceful touch to your living space, perfect for those seeking minimalist sophistication.

The Most Natural State of Sleep

The Natura Rest mattress, crafted from sustainable materials obtained entirely through ecological methods, offers a peaceful comfort with the relaxation of its naturalness while utilizing different materials in its surfaces to provide both summer and winter use.

The Natura Rest mattress features a sustainable organic cotton surface that is free from harmful chemicals, preserving soil, air, and water. It uses Woolmark-certified wool for superior thermal insulation in winter and breathable cotton for a cool sleep microclimate in summer.

Instead of traditional foams, natural latex slabs are employed in the comfort layer, while coconut slabs enhance air circulation within the mattress. Recycled felt provides insulation between the coconut slab and pocket springs, which offer varying support levels for a comfortable sleep experience.

This thoughtfully crafted headboard is perfect for those seeking simple elegance, providing not only visual harmony but also functional support, making it an ideal focal point for creating a serene and inviting bedroom environment.

The breathable structure of the linen fabric adapts to the skin while its light color tones add freshness and tranquility to the space; additionally, the organic filling material provides natural comfort, enhancing sleep quality.

The wooden legs used in the bed design draw attention with their natural aesthetics and elegance, adding strength and an eco-friendly sophistication to the bed with their warm texture.

Balancing functionality with natural elements while offering large capacity.

This special bedroom set offers both excellent comfort and an eco-friendly sleep experience by using organic cotton, natural coconut felt, latex, recycled felt, cotton, wool, and recyclable pocket springs.
