

Sanag Open-Ear True Wireless Earbuds

- The Sanag G9S AI is an open-ear, non-in-ear earbud designed for comfort and convenience.
- Utilizing advanced comfort and acoustic technologies along with a non-in-ear design, it provides a lightweight, all-day wearing experience.
- With active noise reduction, smart touch controls, long battery life, and fast charging, this headset seamlessly fits into daily life, allowing you to enjoy music, sports, and communication.

Innovative Design of Open Comfortable Headphones

- The Sanag G9S headset effectively avoids the discomfort associated with in-ear earplugs while ensuring full awareness of the surrounding environment, allowing users to enjoy high-quality audio while remaining aware of their surroundings.
- This product combines multiple leading acoustic technologies and a comfortable ergonomic structure to deliver exceptional sound quality and a lightweight, effortless wearing experience.

Open ANC and Ergonomic Design for Superior Sound and Stability"

- The Sanag G9S features open active noise-canceling technology, providing ANC functionality with a comfortable fit. Its secure ear-hook and semi-in-ear design ensure stability during activities like running, cycling, or intense workouts, without causing discomfort
- A key highlight of the G9S is its innovative micro-sound cavity design. The smaller front sound outlet optimizes airflow to enhance sound clarity, reducing distortion typically found in larger traditional earphone cavities. This results in richer music details and a layered audio experience.

Excellence in Innovative Audio Technology and Comfortable Design

- The Sanag G9S is an open-ear, non-in-ear earbud designed for comfort and convenience.
- Utilizing advanced comfort and acoustic technologies along with a non-in-ear design, it provides a lightweight, all-day wearing experience.
- With active noise reduction, smart touch controls, long battery life, and fast charging, this headset seamlessly fits into daily life, allowing you to enjoy music, sports, and communication.

Futuristic Fashion in Open-Ear Earbuds

- The Sanag G9S AI provides users with a high-quality open audio experience while enhancing the headset's value with its trendy look, making it more than just an audio device but also a fashionable accessory.
- The glossy finish, achieved through advanced coating techniques, enhances visual appeal and protects against scratches and wear, thereby extending the headset's lifespan.
