

A Fusion of Futurism and Fashion in Ear Cuff Headphones

- The Sanag S9S AI ear-cuff headphones are designed with a sense of futurism and fashion, offering a high-quality open audio experience and a comfortable, secure fit.
- The innovative round ear-cuff design ensures that the headphones fit snugly against the ear and are not prone to slipping off. Additionally, they feature dynamic spatial audio, AI simultaneous interpretation, and support for over 140 languages. With patented panoramic acoustics and Bluetooth technology, these headphones deliver an immersive sound experience, blending technology and style seamlessly.

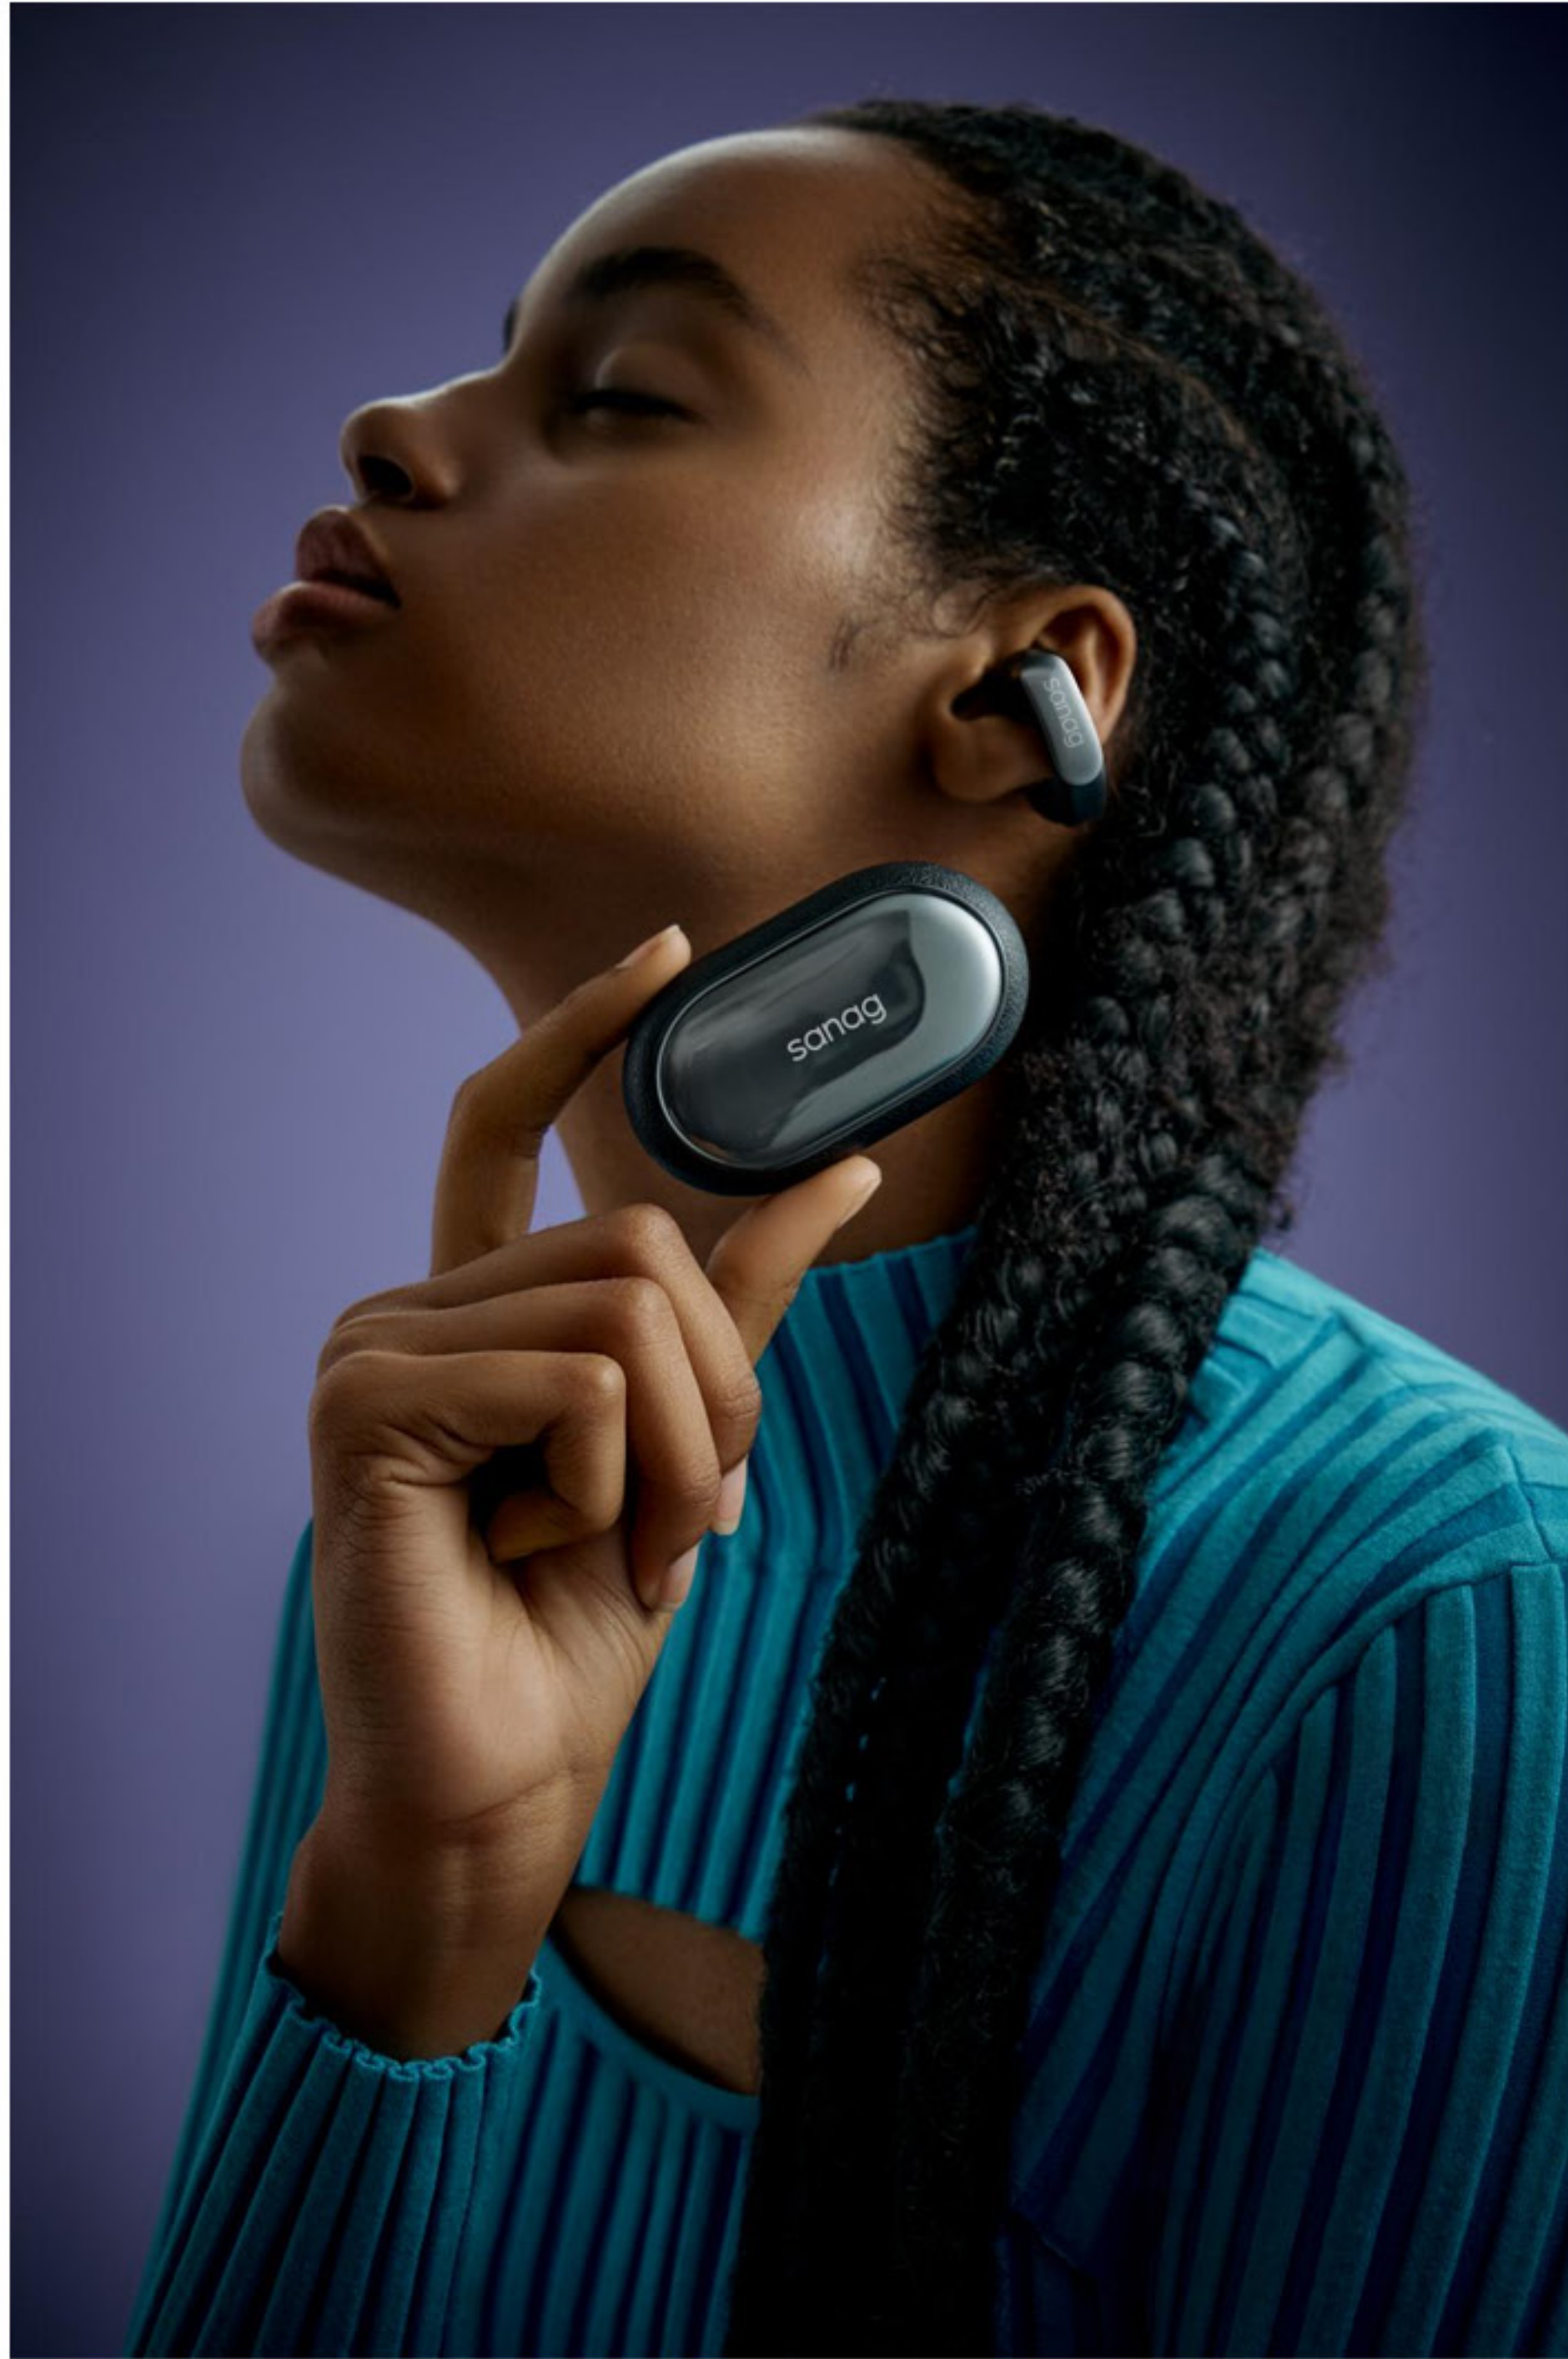

Innovative Design of Open Comfortable Headphones

- The Sanag S9S AI is an open non-in-ear headphone that combines comfort technology, acoustic technology, and high-quality materials to provide users with an all-day, comfortable wearing experience. The ergonomic design ensures comfort during extended use, allowing users to enjoy immersive audio while being aware of their surroundings, enabling them to move, live, and enjoy music freely.

Futuristic and Personalized Design

-The innovative round ear-cuff design ensures that the headphones fit snugly against the ear and are not prone to slipping off. Additionally, they feature dynamic spatial audio, AI simultaneous interpretation, and support for over 140 languages. With patented panoramic acoustics and Bluetooth technology, these headphones deliver an immersive sound experience, blending technology and style seamlessly.

The Combination of Innovative Ear Clip Design and Smart Features

- The headphones feature an innovative open-ear cuff design, with a round ear cuff that not only fits snugly against the outer ear but also ensures stability during movement, preventing slippage. Users can adjust the center of gravity of the ear cuff for a more secure fit while achieving physical noise reduction.
- The headphones come equipped with built-in AI simultaneous interpretation and real-time recording-to-text functions, supporting over 140 languages to facilitate overcoming language barriers.
- The touch controls are simple and intuitive, combined with a smart feedback system, making them suitable for various scenarios, including business and learning.

Excellence in Innovative Audio Technology and Comfortable Design

- The Sanag S9S AI utilizes Active Panoramic Enhanced (APE) technology and Flash Link Bluetooth technology, along with the pending HearX Surround technology, to enhance panoramic sound and Bluetooth performance, providing an ideal audio experience. Additionally,
- The headphones integrate dynamic spatial audio technology, allowing for an immersive listening experience where sound moves with the ears. Compared to similar products, there are very few open ear cuff headphones that can achieve dynamic spatial audio;
- The Sanag S9S AI uniquely combines patented acoustic and Bluetooth technologies to ensure a high-quality audio experience.
- The adjustable elastic ear bridge structure enhances comfort and stability, adapting to the user's ear shape.
