

The first kids bike
with apps
designed for both
parents and kids,
for safety and fun.

Weight

SMART 16

Still the lightest
kids bicycle.
Under 6 kg.

BIKY.

Setting new standards in kids bike design.

Brakes moved
inside the frame
for a clean look.

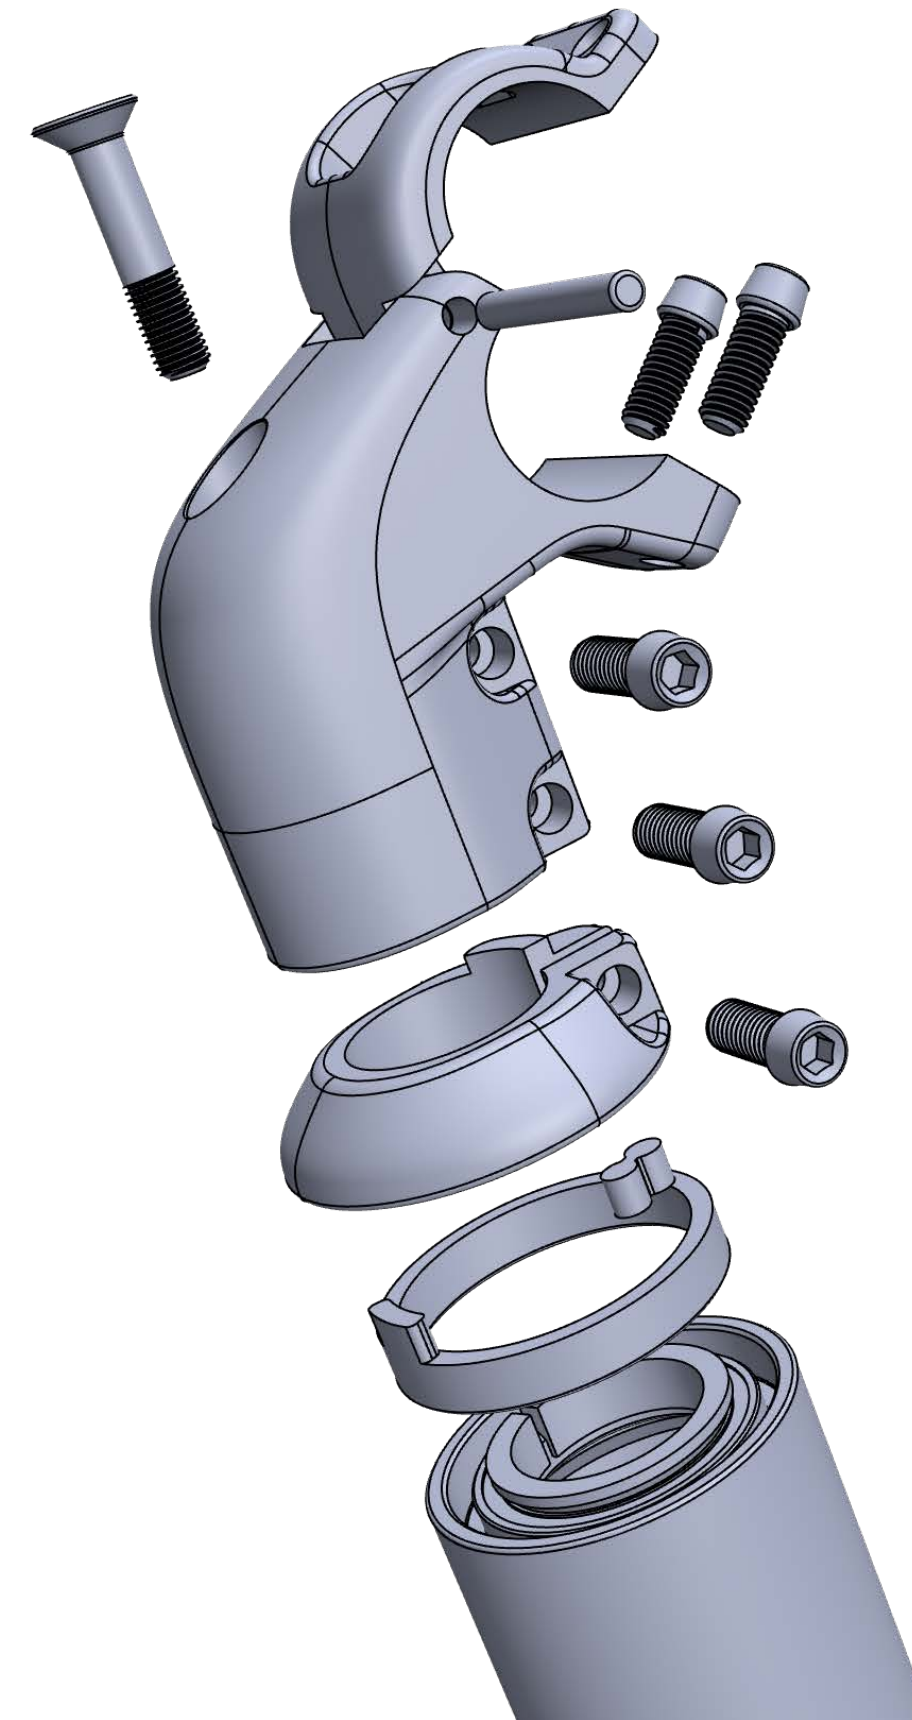

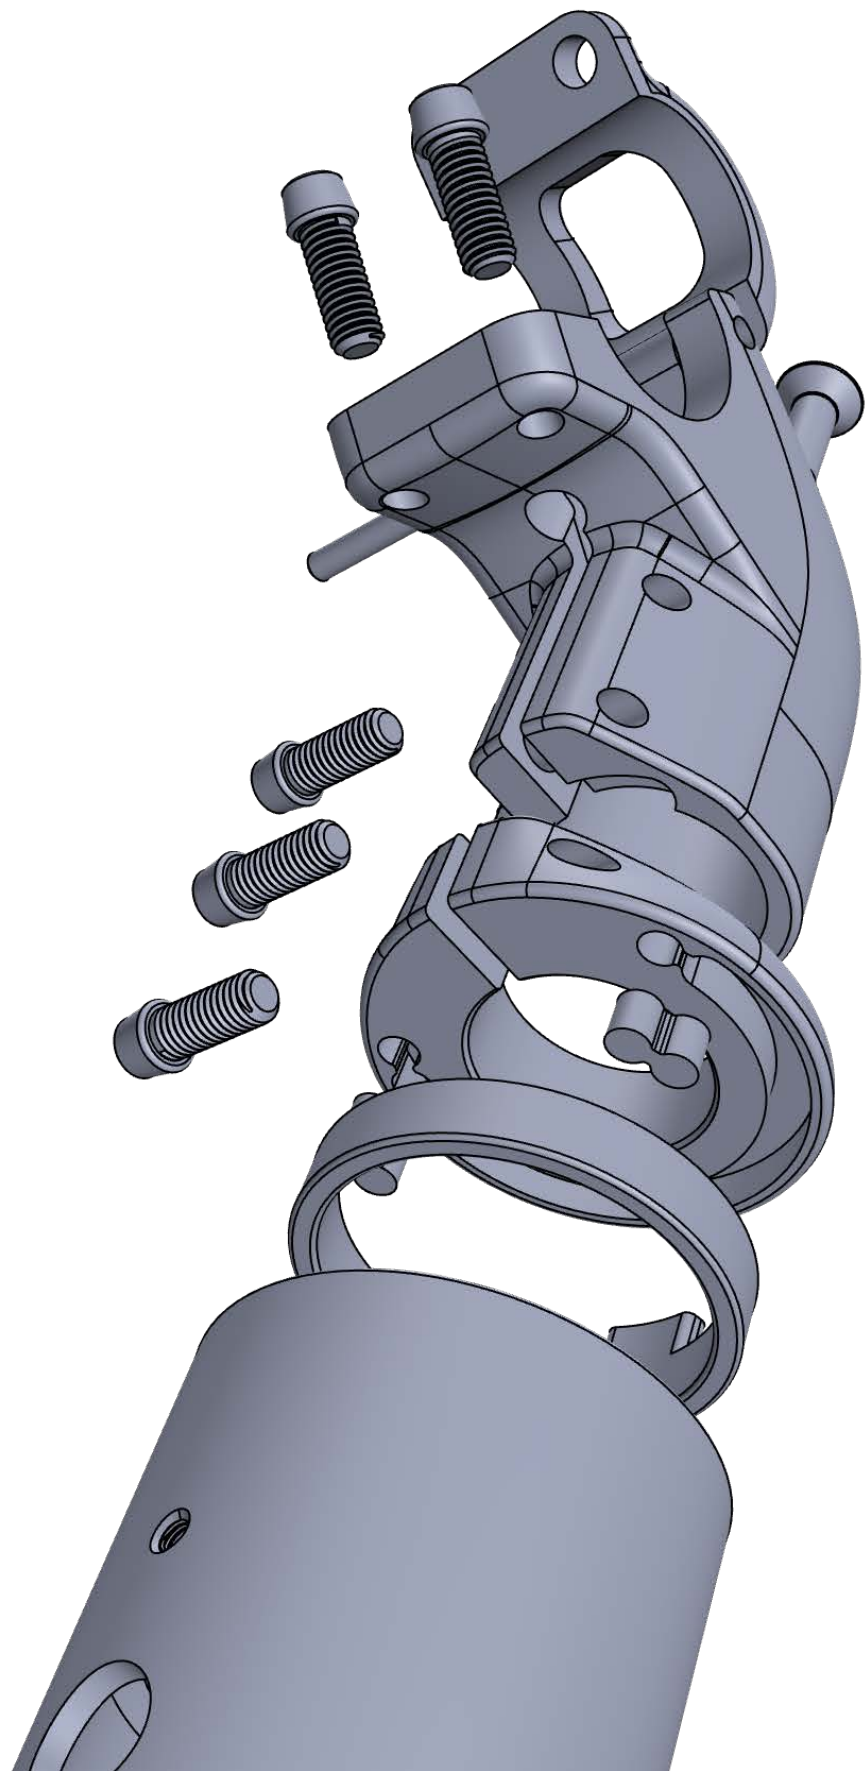

Light controls, side lights in the grips, and ergonomics designed for kids.

Front light combines DRL, side strobe lights, and beam light.

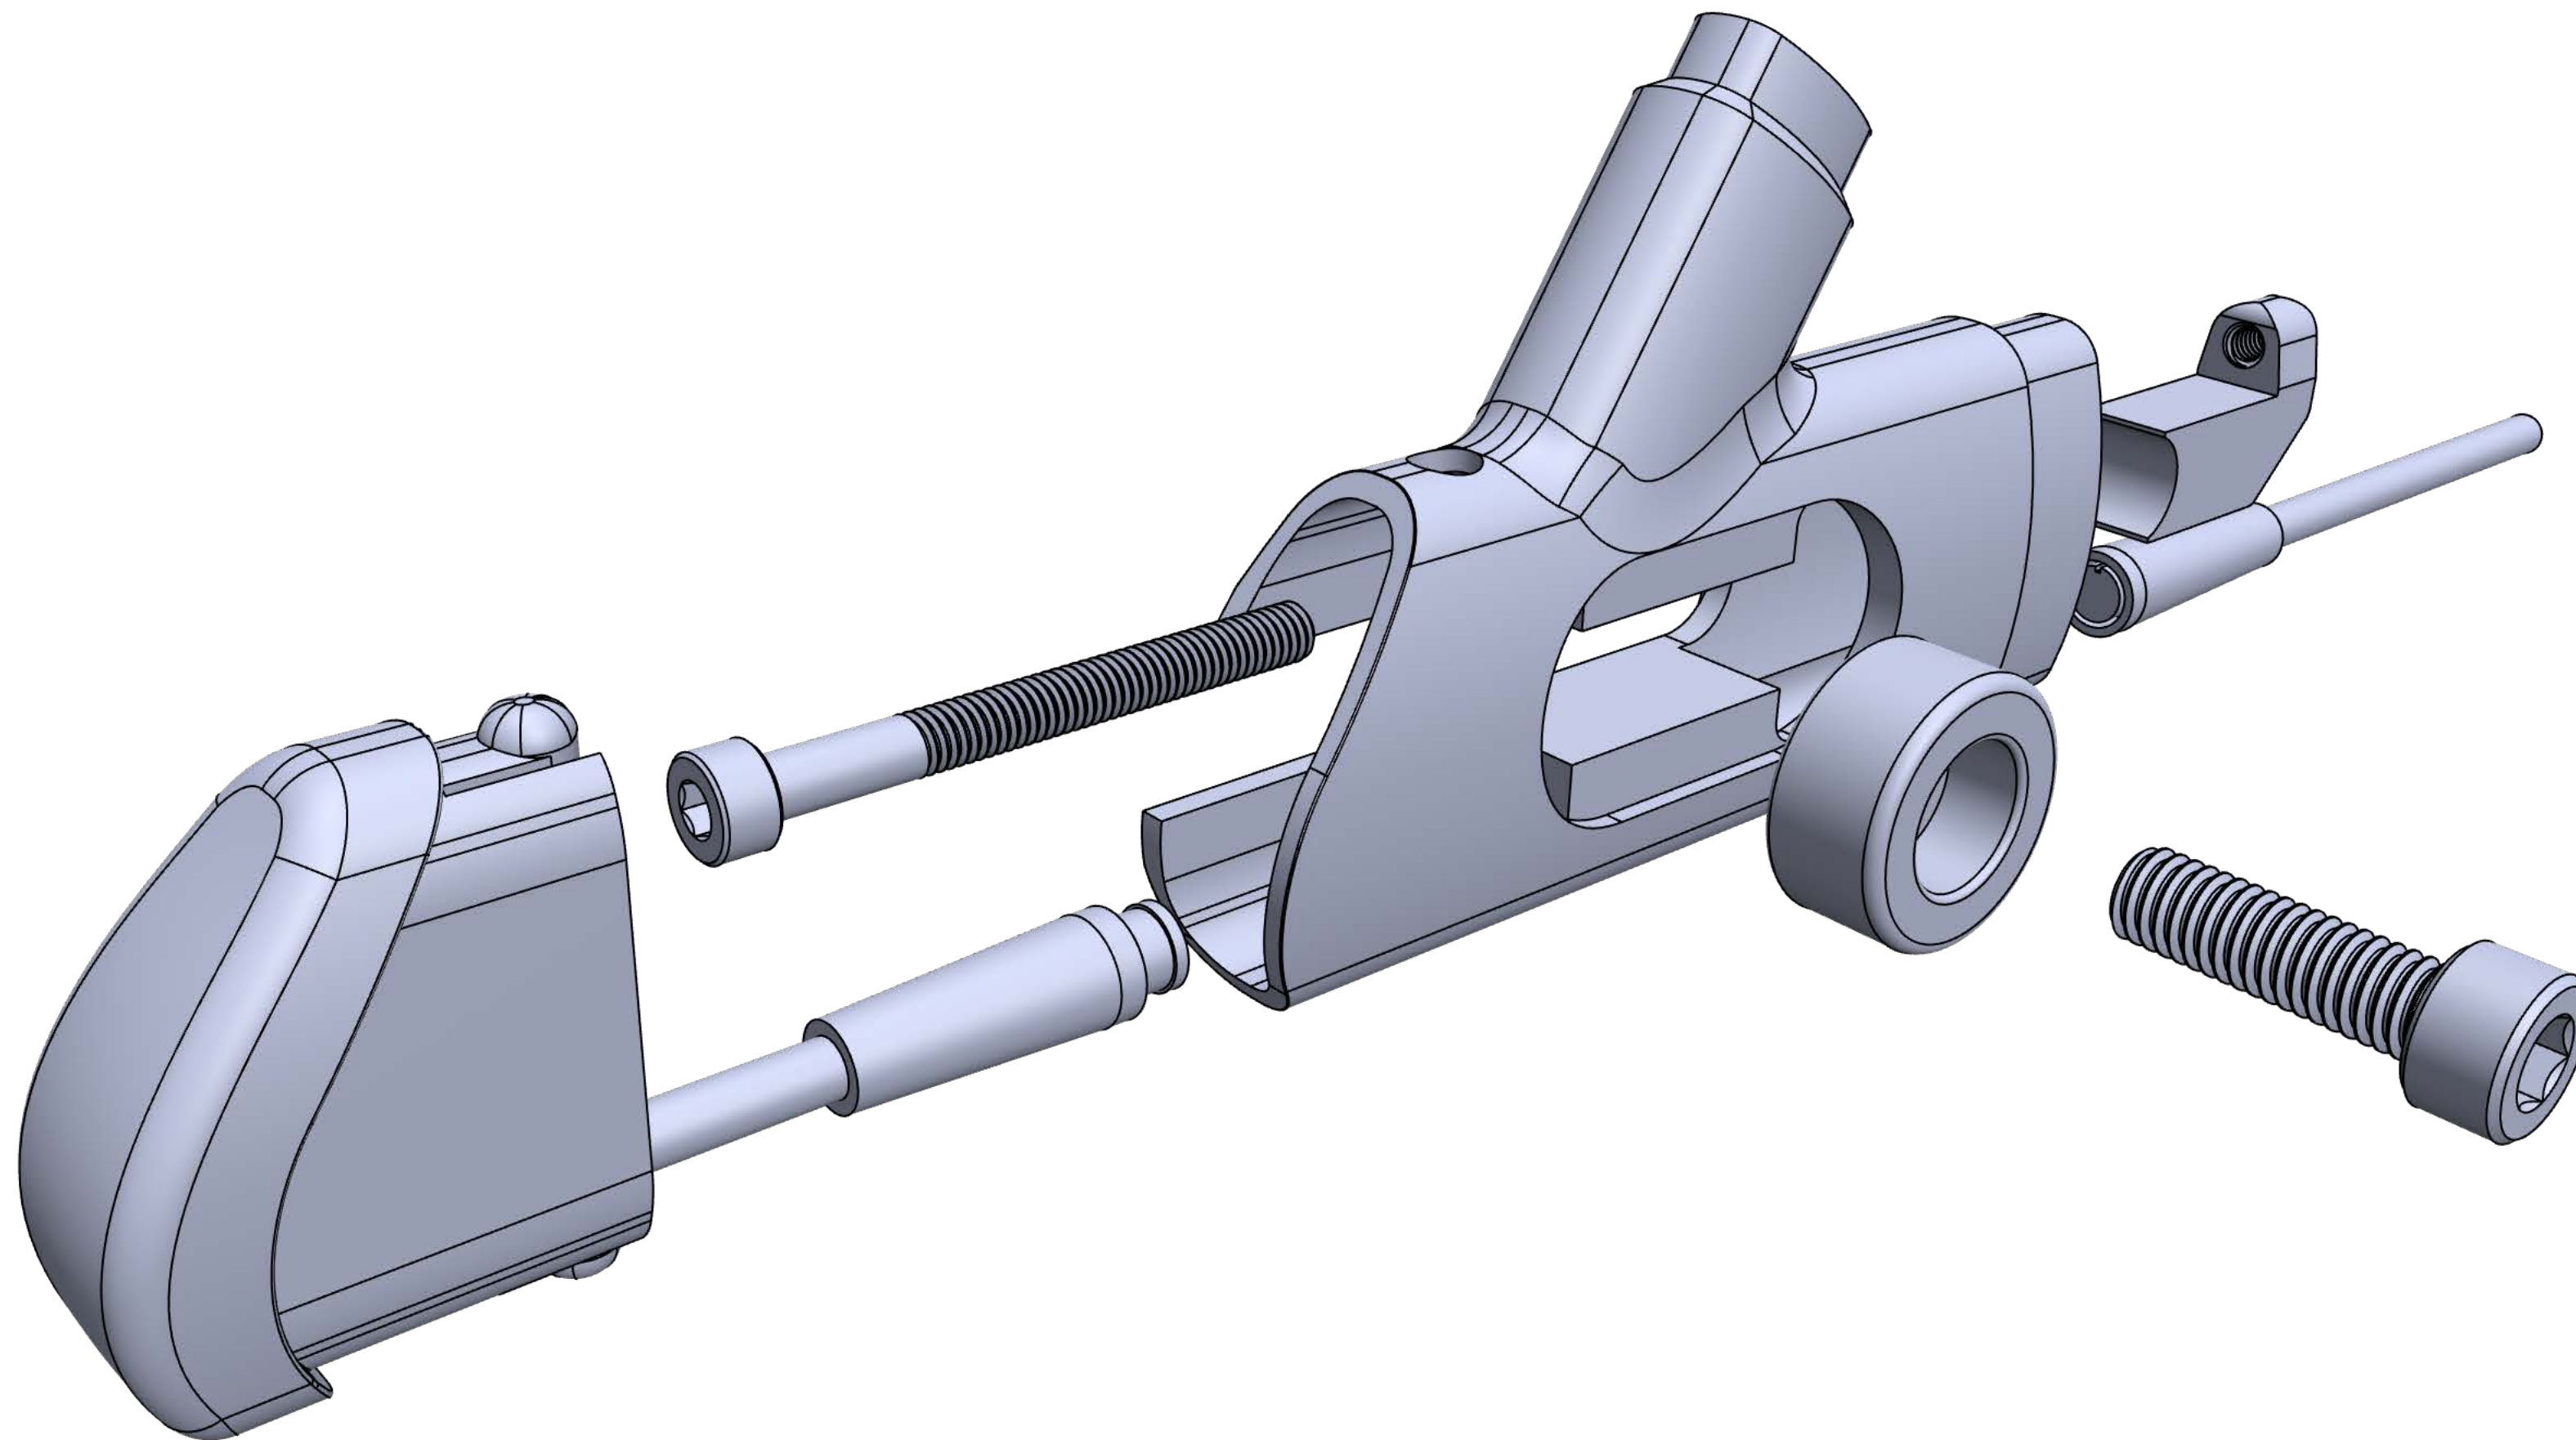

Dynamo hub in the front wheel reduces the need for frequent recharging.

Integrated lights in the front and rear dropouts enhance visibility and safety.

Our goal was to add a clamp for faster and easier assembly, move the bolts of the stem and clamp to the opposite side of the steerer tube for safety, and integrate internal cables and steering limiter inside the headset.

Our goal was to add into this dropout the lighting and internal cable, wheel mounting, and a chain tensioner.
