

Soft Silicone Arch Trainer

An arch trainer tailored for foot health improvement.

30-Degree Crescent Shape

Its unique 30-degree crescent shape is inspired by the natural arch of the human foot, ensuring a precise fit to the toes and arch and effectively improving foot force distribution.

Scientific Mechanical Design

Through scientific mechanical design, this trainer effectively disperses plantar pressure during walking, standing, or exercise, alleviating discomfort caused by flat feet or high arches, helping rebuild a healthy arch, and improving foot collapse.

Rear: Hollow-out design

Front:
Shell-like texture

Dual-sided Anti-slip Design

This trainer features a shell-like texture on the front and a hollow design on the back, with a dual-sided anti-slip structure that increases friction, ensuring safety and stability during use.

Soft and Skin-friendly Silicone Material

Made from high-quality soft silicone, this arch trainer is soft, elastic, and closely conforms to the foot's natural curves, providing a comfortable wearing experience. Even with prolonged use, it does not cause any foot fatigue or discomfort.
