

# ZLX NaturalCanvas Series

The perfect integration of natural genes and extreme aesthetics, ushering in a new era of water sports.

## Design Philosophy: "Zero Limits X"

The ZLX NaturalCanvas Series is a set of stand-up inflatable paddleboards integrating functionality and artistry. It embraces the design philosophy of "zero limits x" that symbolizes zero boundaries and infinite possibilities, aiming to break the limits of sports and inspire users to challenge themselves.

## 3.5-Meter Board with Golden Ratio

The 3.5-meter-long board, proportioned by the golden ratio, features a streamlined edge that reduces water resistance and a widened board head for additional turning space, seamlessly bridging professional performance with daily scenarios. This ensures a seamless transition between water sports and daily life.

## Fin-Inspired Balance Wing

Inspired by fish fins, the balance wing is ingeniously embedded at the board's geometric center of gravity. This counteracts lateral torque from body movement and enhances longitudinal rigidity during navigation without compromising turning ability, completely redefining the stability logic of traditional paddleboards.

# Wonderful Sensation of "Balance in Water"

The ZLX NaturalCanvas Series maintains exceptional stability even in turbulent waves, allowing users to intuitively experience the wonderful sensation of "balance in water" while performing actions like standing and turning. This innovative design significantly lowers the learning curve, making it accessible for both children and adults.

# A Water Canvas Blending Natural Aesthetics

Each paddleboard in the ZLX NaturalCanvas Series resembles a canvas adorned with patterns of natural elements. The coating features a high-saturation, UV-resistant base layer, combined with geometric lines, natural wood-like textures and outdoor wave camouflage, enabling users to better blend into the natural landscape during their adventure.

## A Sense of Ritual Across Land and Water

One of the paddleboards in the ZLS NaturalCanvas Series features a coating that masterfully integrates primitive wood grain textures with premium composite materials. Leveraging unique biomimetic technology, it creates an immersive experience where users feel as though they are standing at the intersection of primeval forests and aquatic civilizations. This design achieves a harmonious coexistence and seamless integration of natural genes and extreme aesthetics.

# Expanding Multi-Scenario Applications

The ZLX NaturalCanvas Series ingeniously incorporates fishing features. The elastic rope at the tail holds ice buckets or tackle boxes, and the seat D-ring allows users to sit and glide or fish, catering to various outdoor scenarios.
