

# Kocotree Empty Shawl Hat

Sun protection gear that seamlessly blends childlike charm  
with practical functionality.

## Pioneering KK Original Yarn System to Safeguard Children's Summer Adventures

Every child looks forward to outdoor summer adventures. To enhance their enjoyment during outings, the KK original yarn system is incorporated to deliver four key functions: sun protection, cooling, moisture-wicking, and antibacterial properties. This ensures that kids stay cool and comfortable while exploring nature.

## Yarn-Built Sun Protection for Enhanced Defense

The yarn fabric integrates TiO<sub>2</sub> UV-blocking factors spun directly into the yarn, maintaining a **UPF 83** rating even after **1,000** washes. The open-top design and full-coverage shawl boosts **125%** greater coverage than standard open-top hats while improving **17%** more breathability compared to traditional shawl hats, perfect for protecting children's delicate skin without the heat.

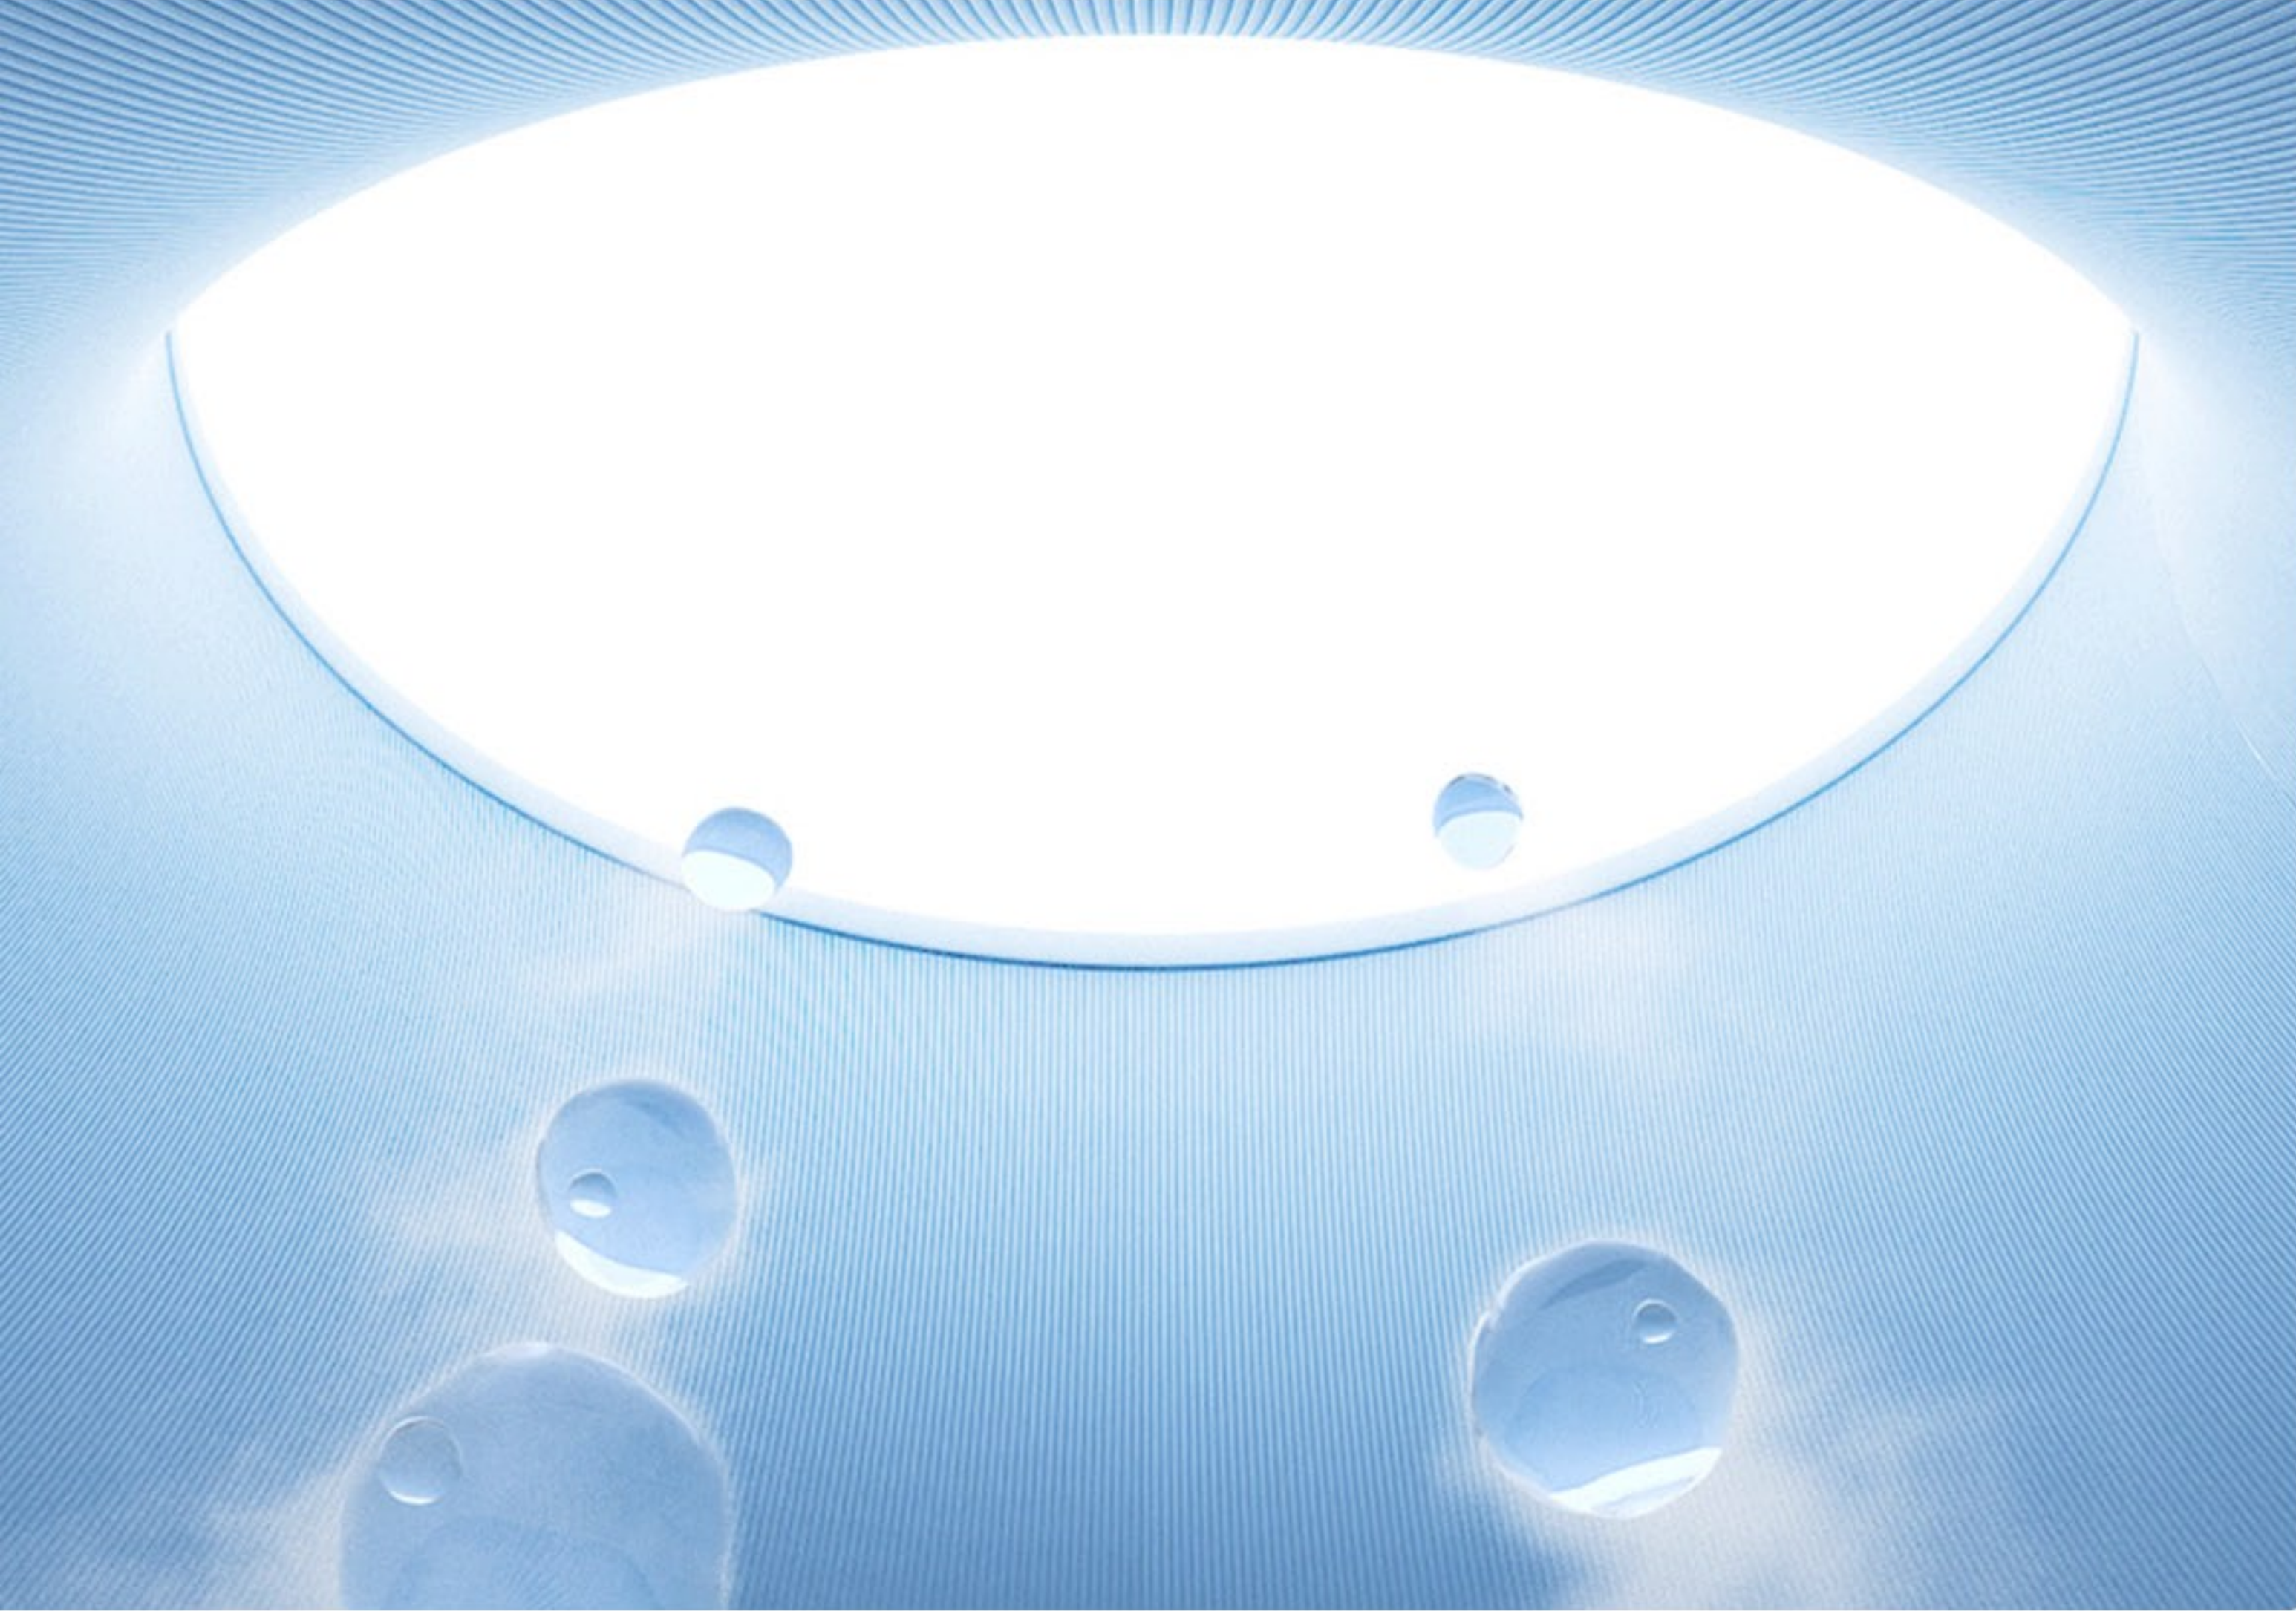

## Yarn-Built Cooling for Instant Refreshment

Cooling agents are spun into the yarn core, creating an intrinsically temperature-regulating fabric for rapid heat dissipation and temperature reduction. The cooling coefficient remains at **0.23** as verified after **1,000** washes. The **48%** heat-blocking brim reduces temperatures by **-11° C** underneath, keeping playtime fresh and breezy.

## Yarn-Built Quick-Dry & Moisture-Wicking for All-Day Comfort

The high-performance sweatband uses porous hollow yarn to instantly wick sweat to the surface, keeping the forehead dry and comfortable for an extended period. Even after undergoing **1,000** wash cycles, it still attains a **Level 4** water absorption rate.

## Yarn-Built Antibacterial Protection for Worry-Free Wear

To deliver safer and purer antibacterial performance, this hat utilizes photon broadband irradiation technology to permanently alter the yarn's molecular structure. This creates a "super-powered antibacterial shield" that far exceeds **7A-grade** antibacterial standards even after **1,000** washes. Unlike traditional chemical-treated antimicrobial solutions, this innovative approach ensures absolute safety for even infant skin contact.

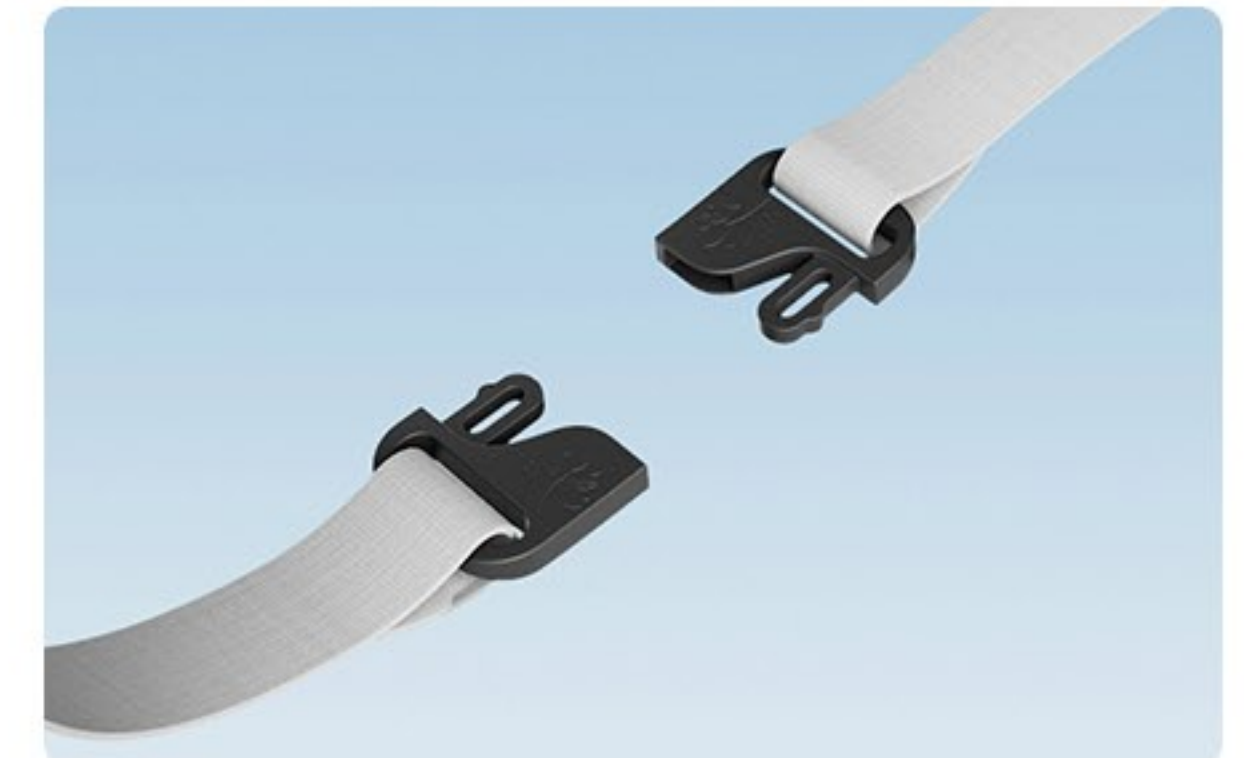

## Smart Safety Details for Peace of Mind

The windproof strap features a safety smart-release buckle that automatically detaches when excessive force is applied (e.g., during strong winds), eliminating choking hazards. The safety whistle enables parents to quickly locate their child in critical situations, ensuring safer outdoor adventures.
