

## BloomCore Stack Set

Rooted in Jingdezhen's millennium-old porcelain artistry, the set harmoniously blends Eastern natural philosophy with contemporary functionalism.

# Symbiosis of Aesthetics and Function: Bionic Stacking Design

Inspired by the organic structure of flower buds in Eastern aesthetics, the dinner plate fits snugly over the edge of the soup bowl, forming an eight-petal symmetrical silhouette that mirrors nature's growth logic, while the glaze exudes a soft, jade-like luster. With minimalist lines and natural motifs, the set seamlessly integrates into modern home settings.

Bowls x 4

Plates x 4

Cup x 1

Fruit tray x 1

Soup bowl x 1

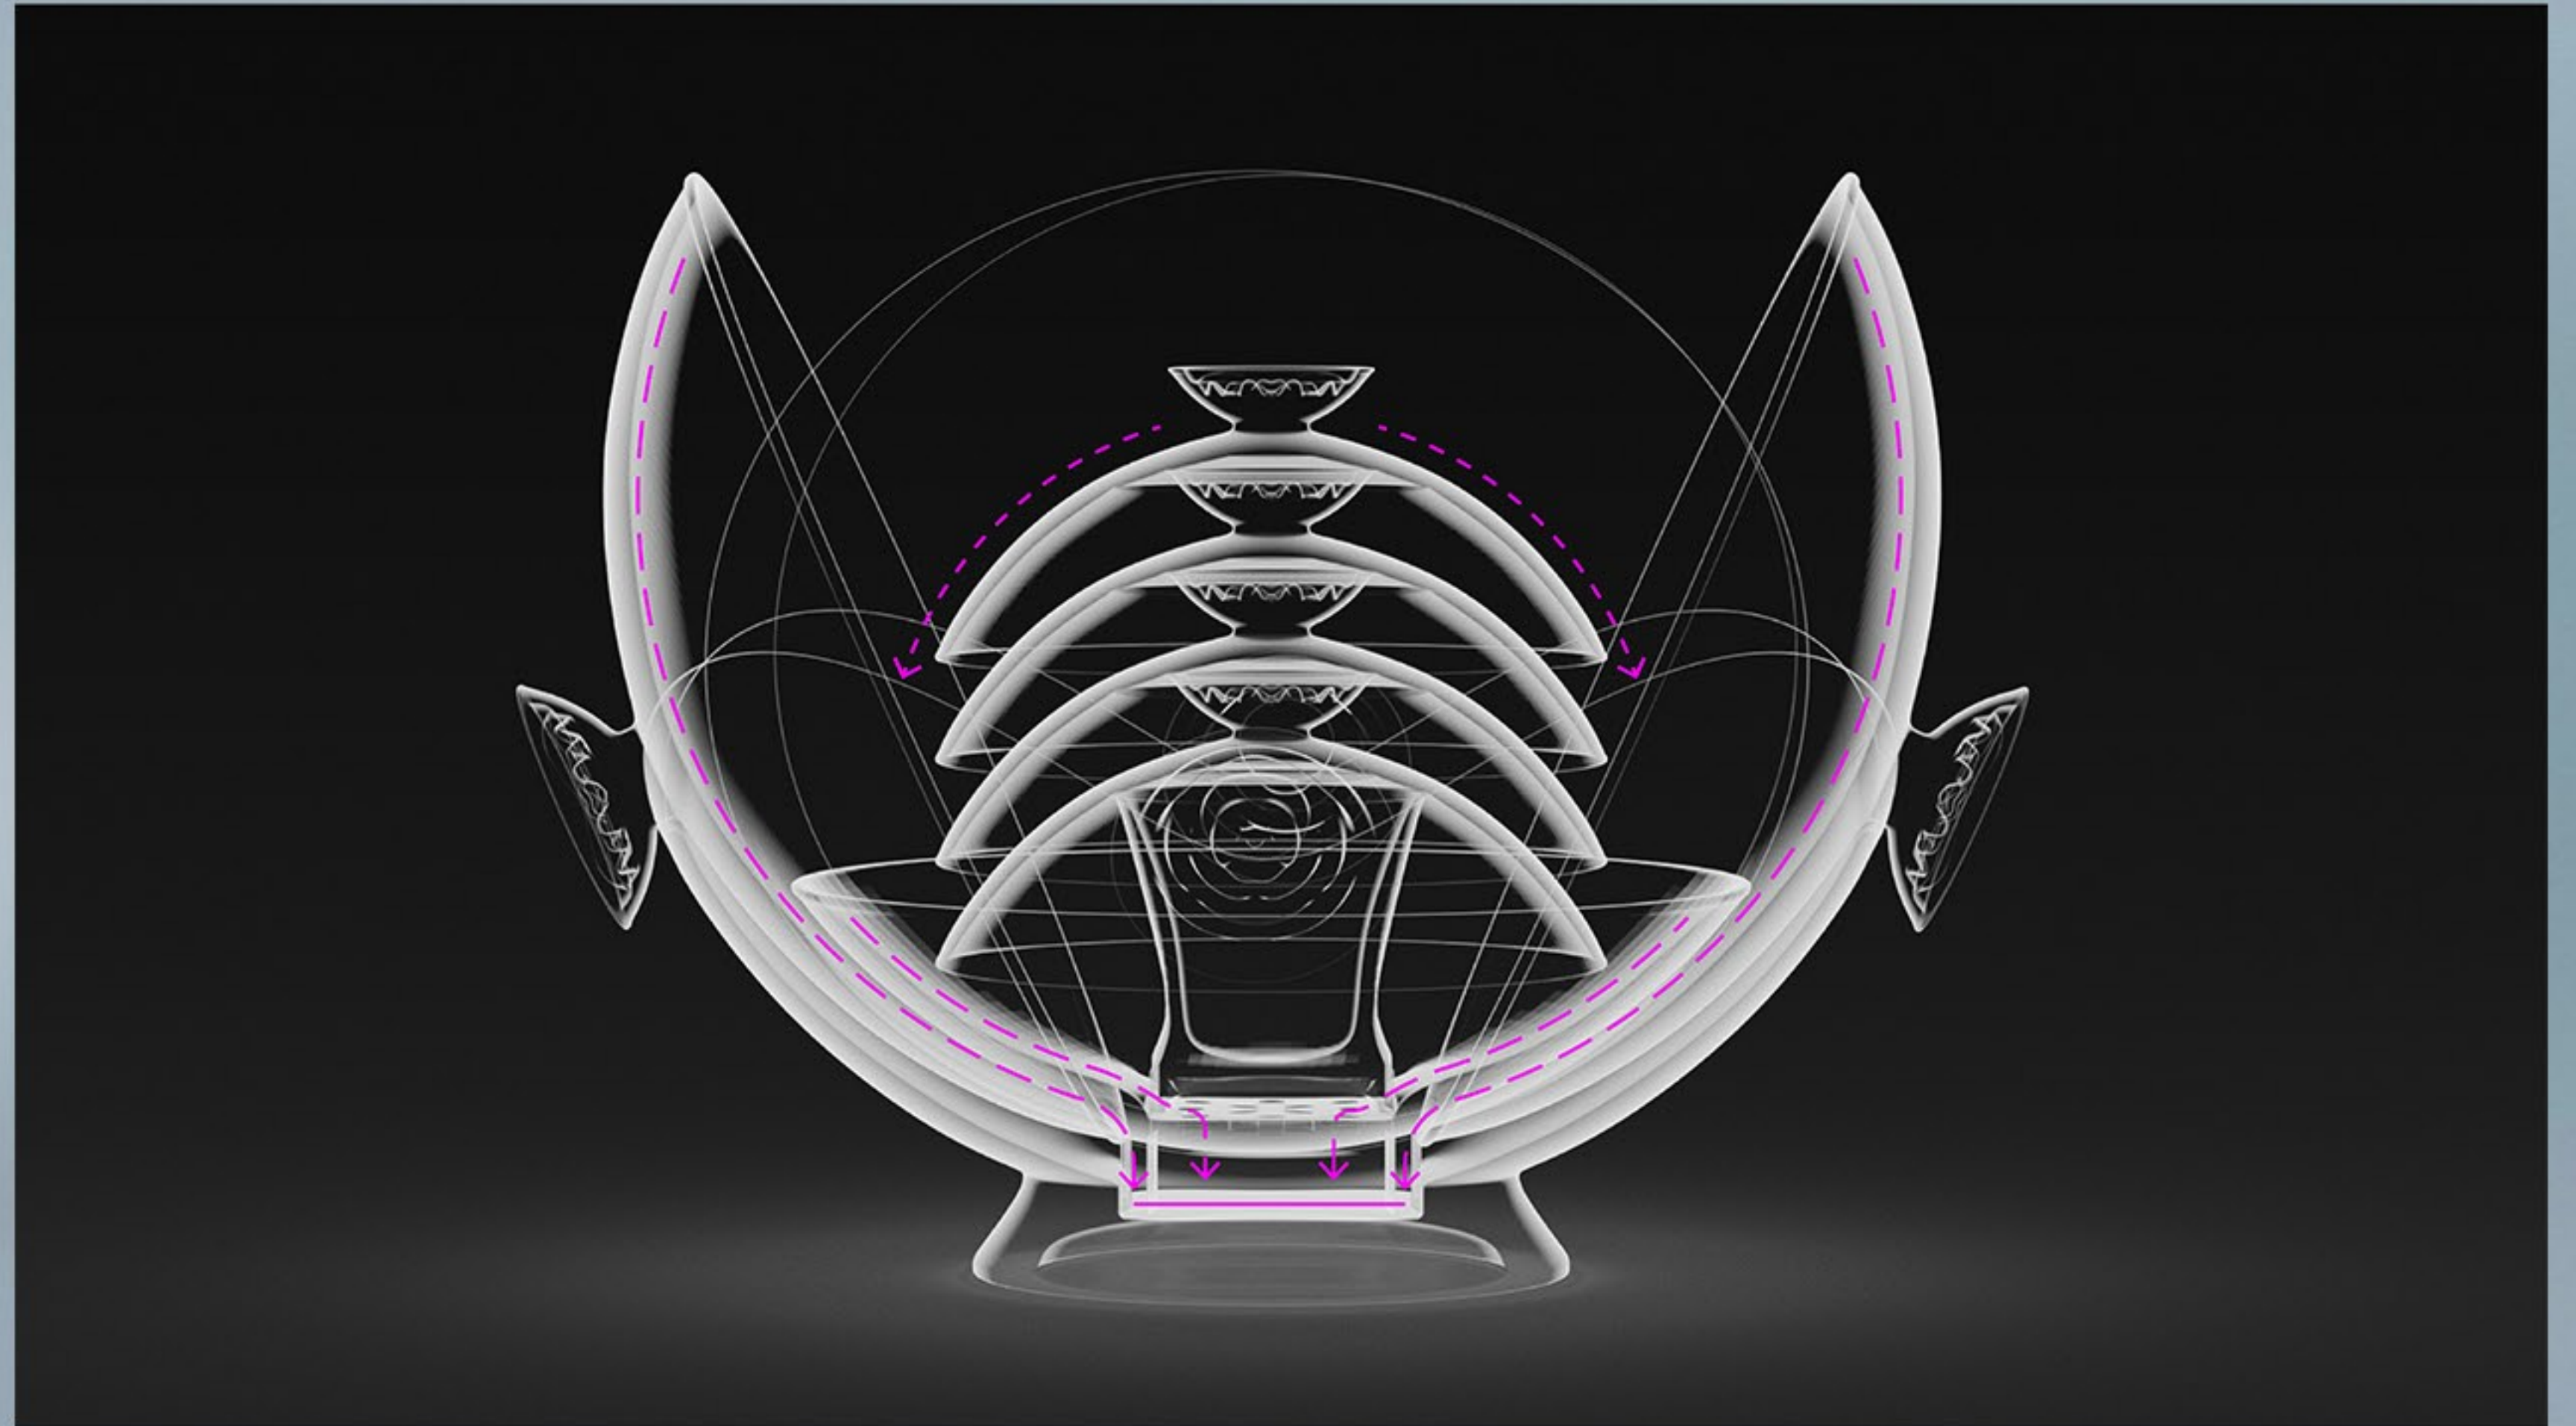

## Unique Modular Structure

This 11-piece set (bowls, plates, cups, etc.) redefines tableware storage with a no-accessory stacking system, compressing these pieces into a sculptural 24.2cm-diameter unit that saves 60% storage space.

# Innovative Vertical Water Drainage System

The 0.5-1mm drainage gaps between stacked pieces guide water along the high-density glazed surface, directing it vertically downward to the collection layer. The central cup acts as a "flower bud", supporting four bowls while accelerating post-wash drying through air convection principles.

# Jingdezhen Premium White Clay × Intangible Cultural Heritage Craftsmanship

The set is crafted from biodegradable Jingdezhen premium white clay and fired at 1200° C in a reduction flame, achieving a 98% vitrification rate on its glazed surface to create a natural physical antibacterial barrier. Through triple-dipping glazing techniques, the ceramic body acquires a jade-like luster and silken texture.

The 2mm ultra-thin arched foot, precision-fired with digital kiln control, delivers 8kg load-bearing capacity with a deformation rate below 0.3%.

## From Table to Storage: 6-in-1 Multifunctional Efficiency

**Lazy-Friendly:** This storage solution transforms into an art piece, designed for effortless one-handed assembly and disassembly while remaining quick to dry after washing.

**Material Safety:** Crafted from natural premium white clay, the set resists bacterial growth and remains biodegradable—with no heavy metal leaching for worry-free use.
