

AERIS SOAP VESSEL

• Minimalist Philosophy Meets Creative Aesthetics

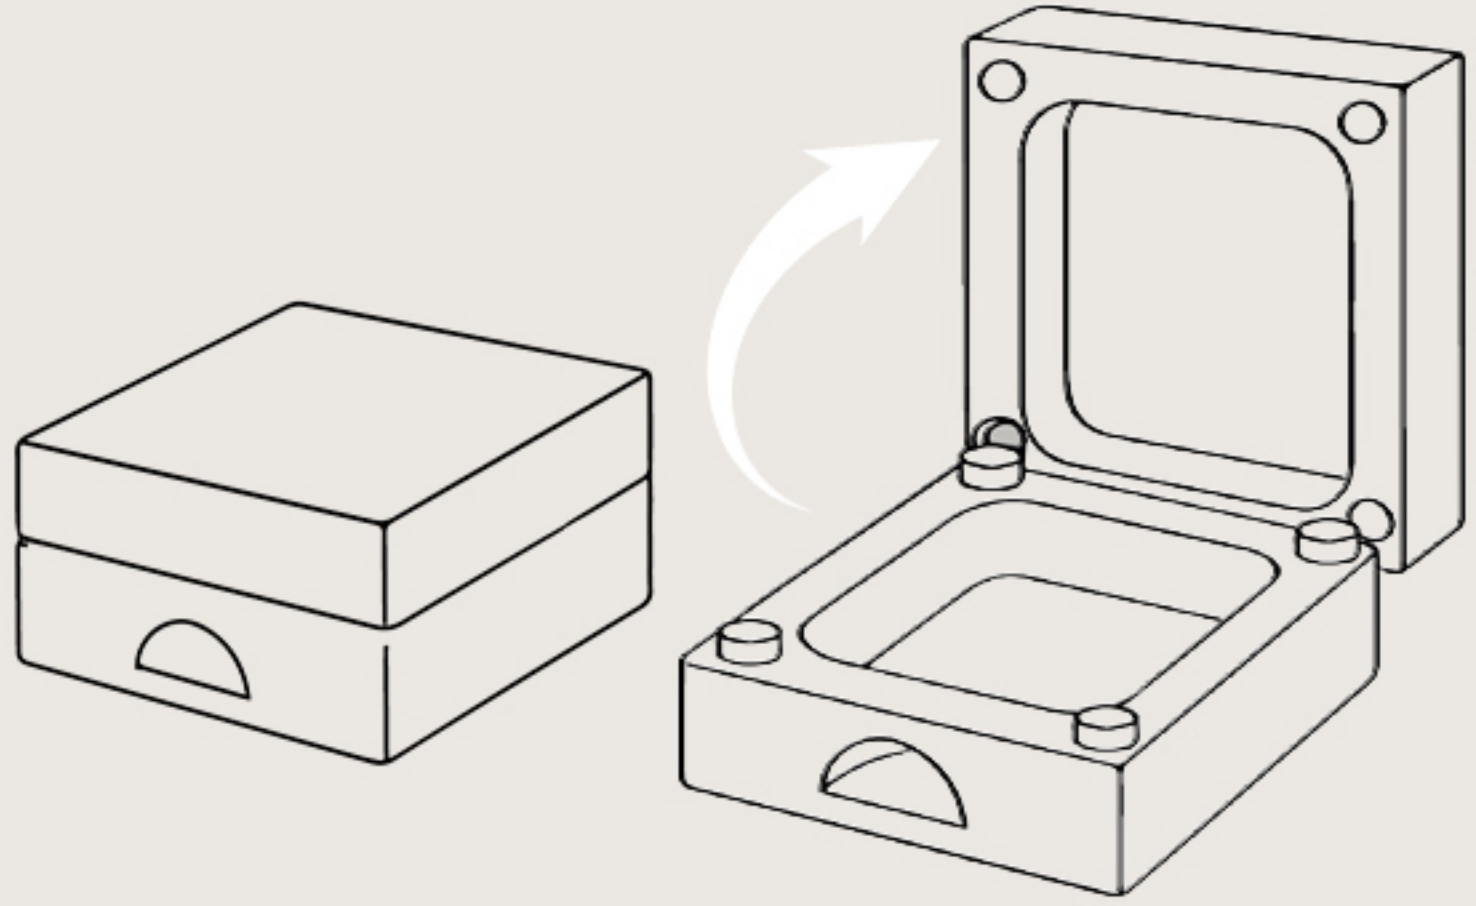

Minimalist Aesthetics: Back to Essentials

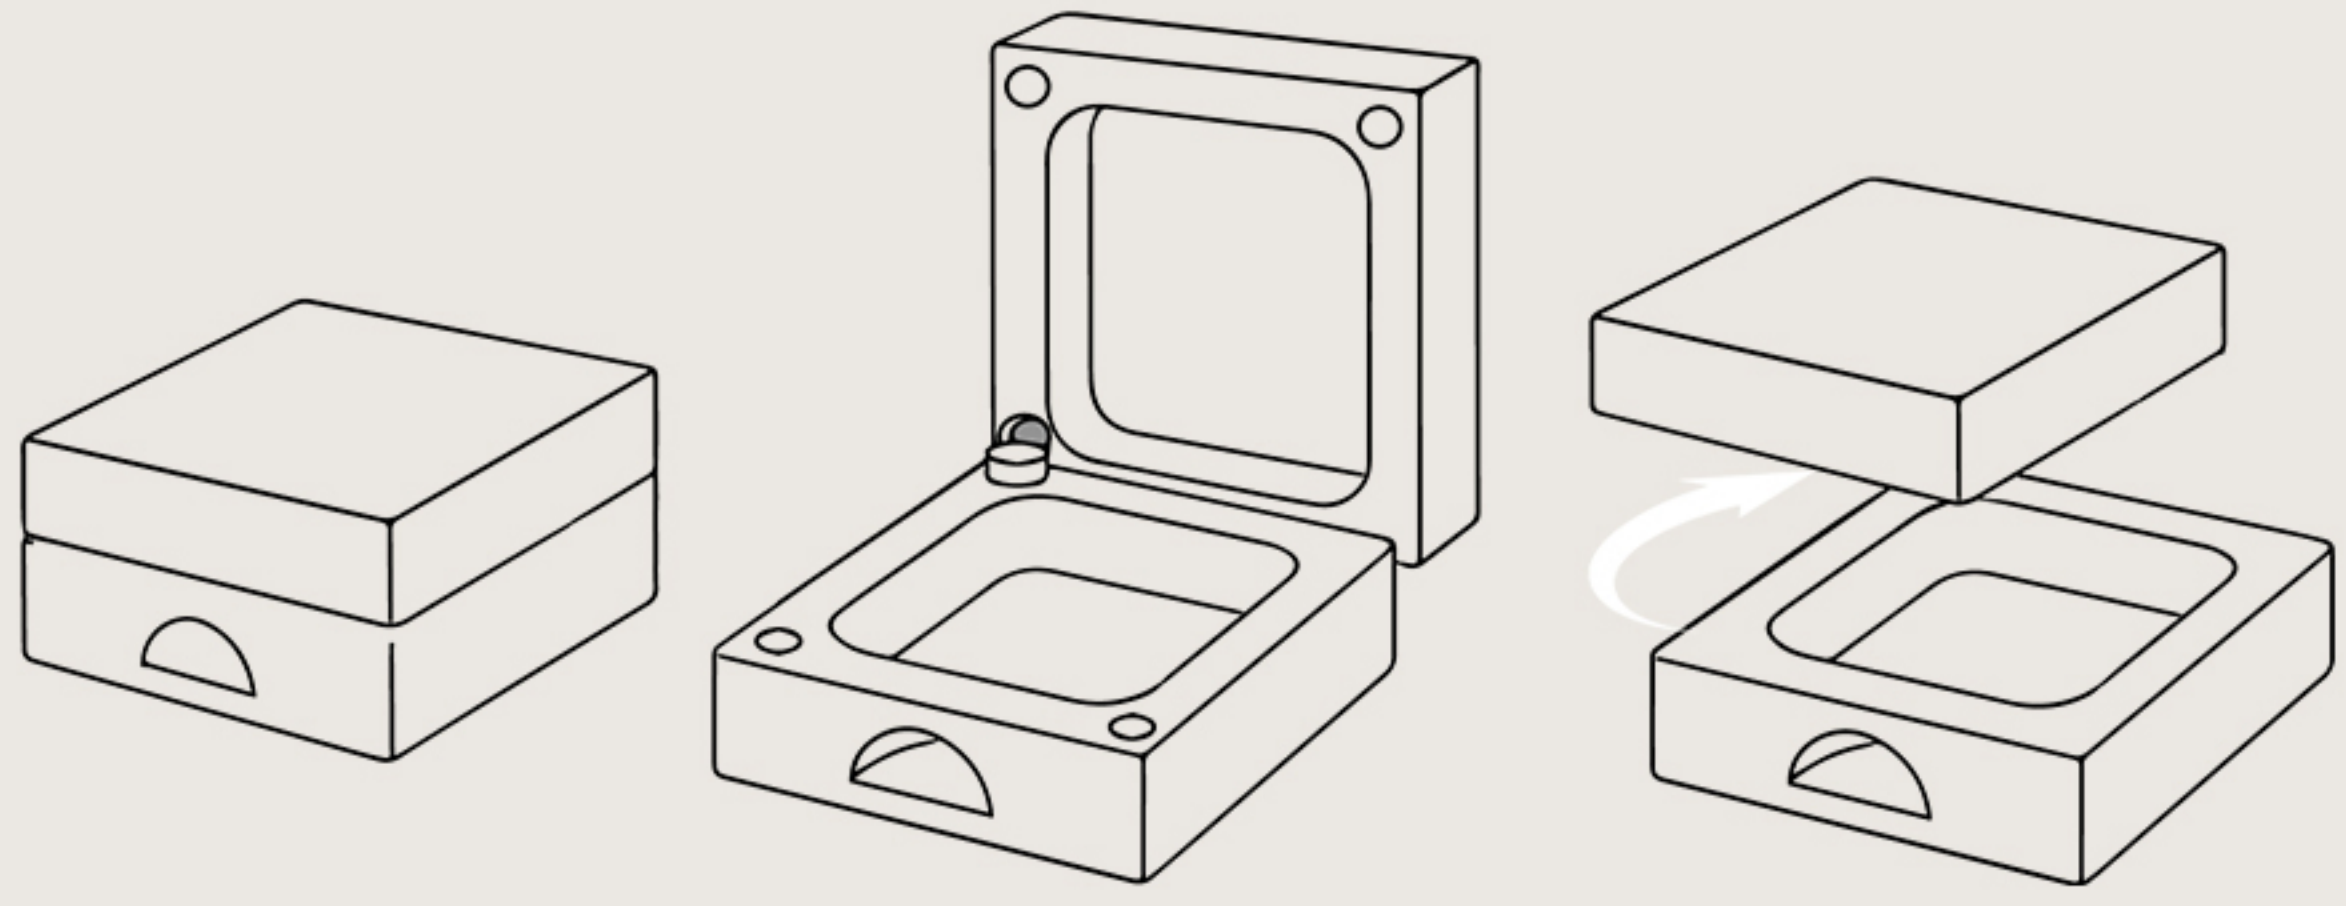

- Guided by the "Less is more" philosophy, the soapbox features a minimalist square silhouette that fits all soap shapes available on the market.
- It includes an innovative sloped drainage structure on the front—solving the water accumulation issue of soapboxes—while softening the rigidness of the square shape with its arched design.

- Snap-on closure

- Twist-lock closure

Effortless Opening: Embracing Simplicity

The soapbox offers two closure ways: snap-on closure and twist-lock closure, embodying the philosophy of "Less is more". With the magnetic rotation mechanism, the soapbox connects the lid and the base via a rotating axis at one corner, enabling easy left-or-right twisting to open, while the hidden magnets in the remaining three corners ensure a tight closure when the lid is closed.

Customized Soapboxes: Fitting Various Home Styles

The soapbox, with its minimalist design, pairs seamlessly with various materials and colors to convey distinct emotional tones. It also blends into diverse living scenes, satisfying multiple user needs.

Customized Soapboxes: Expressing Life Aesthetics

Notably, the soapbox allows for unique and creative customization, evolving into a lifestyle artwork that expresses personal taste and life attitude. It fosters an emotional bond with users, adding a touch of joy to daily grooming moments.
