

Savage by KANTTARI – Where Wild Beauty Meets Sculptural Luxury

Meet SAVAGE, the one-of-a-kind luxury bar cabinet by KANTTARI — an audacious blend of primal power and refined craftsmanship. Winner of the London Design Award 2024 and Rome Design Award 2025, this extraordinary piece reimagines what a bar cabinet can be: a sculptural statement, a functional showpiece, and a collector's dream.

SAVAGE makes its mark with a bold exterior inspired by the texture of alligator skin, recreated through a complex process of sculpted and patinated darkened brass. The result is a tactile façade that feels alive — wild, elegant, and magnetic. Its commanding presence transforms any space into a gallery of conversation and style.

Open the double doors and the interior comes to life: soft lighting reveals a luxurious composition of natural marble, glass shelving, and green leather-lined drawers. Each element is thoughtfully designed — from the elevated glass shelves that appear to float in front of the stone backdrop, to the marble surface that invites the ritual of cocktail making. This is not just a bar cabinet — it's an immersive experience.

Behind its artistic form lies cutting-edge craftsmanship. The textured brass surface was achieved through innovative 3D modeling, then brought to life by master artisans who merged technology with traditional hand-finishing techniques. Every element — down to the custom brass hardware — is bespoke.

SAVAGE is designed for those who seek more than furniture. It's for those who want emotion, intention, and a bold narrative in their interiors. With only one piece ever created — now owned by artist Adam Lambert — SAVAGE is a rare fusion of design and identity, a celebration of individuality in its most unapologetic form.

From its fierce silhouette to its refined interior, SAVAGE redefines what it means to live with luxury.
