Selected Australian Merino wool is naturally softened with protein treatment, making it fluffy and soft while also resistant to pilling, providing a breathable and temperature-regulating experience. Japanese-imported metallic threads are woven into the wool with micron-level fineness, giving a subtle shimmering effect like stardust, exuding understated luxury. The fabric is crafted with a three-dimensional air-layer knitting technique, requiring multiple adjustments for every 2 cm of pattern, creating embossed French-style 3D floral textures with rich, layered tactile sensation. Imitation Australian crystals are precisely embedded along the patterns, securely set and reflecting dazzling light as you move. The direction of the floral patterns enhances the silhouette, while the air-layer structure keeps warmth without bulk, making it elegant whether worn alone or layered.

DENSE & LIGHT draws inspiration from French vintage style, shaping a graceful and elegant female image through refined silhouettes and delicate materials. The design incorporates elements of French noble attire, with meticulously arranged floral patterns and three-dimensional embossed textures that enrich visual layers and elongate the figure proportionally. The unique straight V-neck maintains a soft and sensual appeal while avoiding excessive exposure, showcasing restrained yet sophisticated feminine charm. The crisp short-cut design paired with an over-the-knee skirt effectively raises the waistline; the fit is close but not tight, effortlessly suitable for daily wear, the workplace, and formal occasions, presenting a subtle sense of high-end sophistication.
