

Flexible Sharing

Scan the QR code post-meeting to get a handy summary and recording, with the option to share publicly as needed.

Export Options

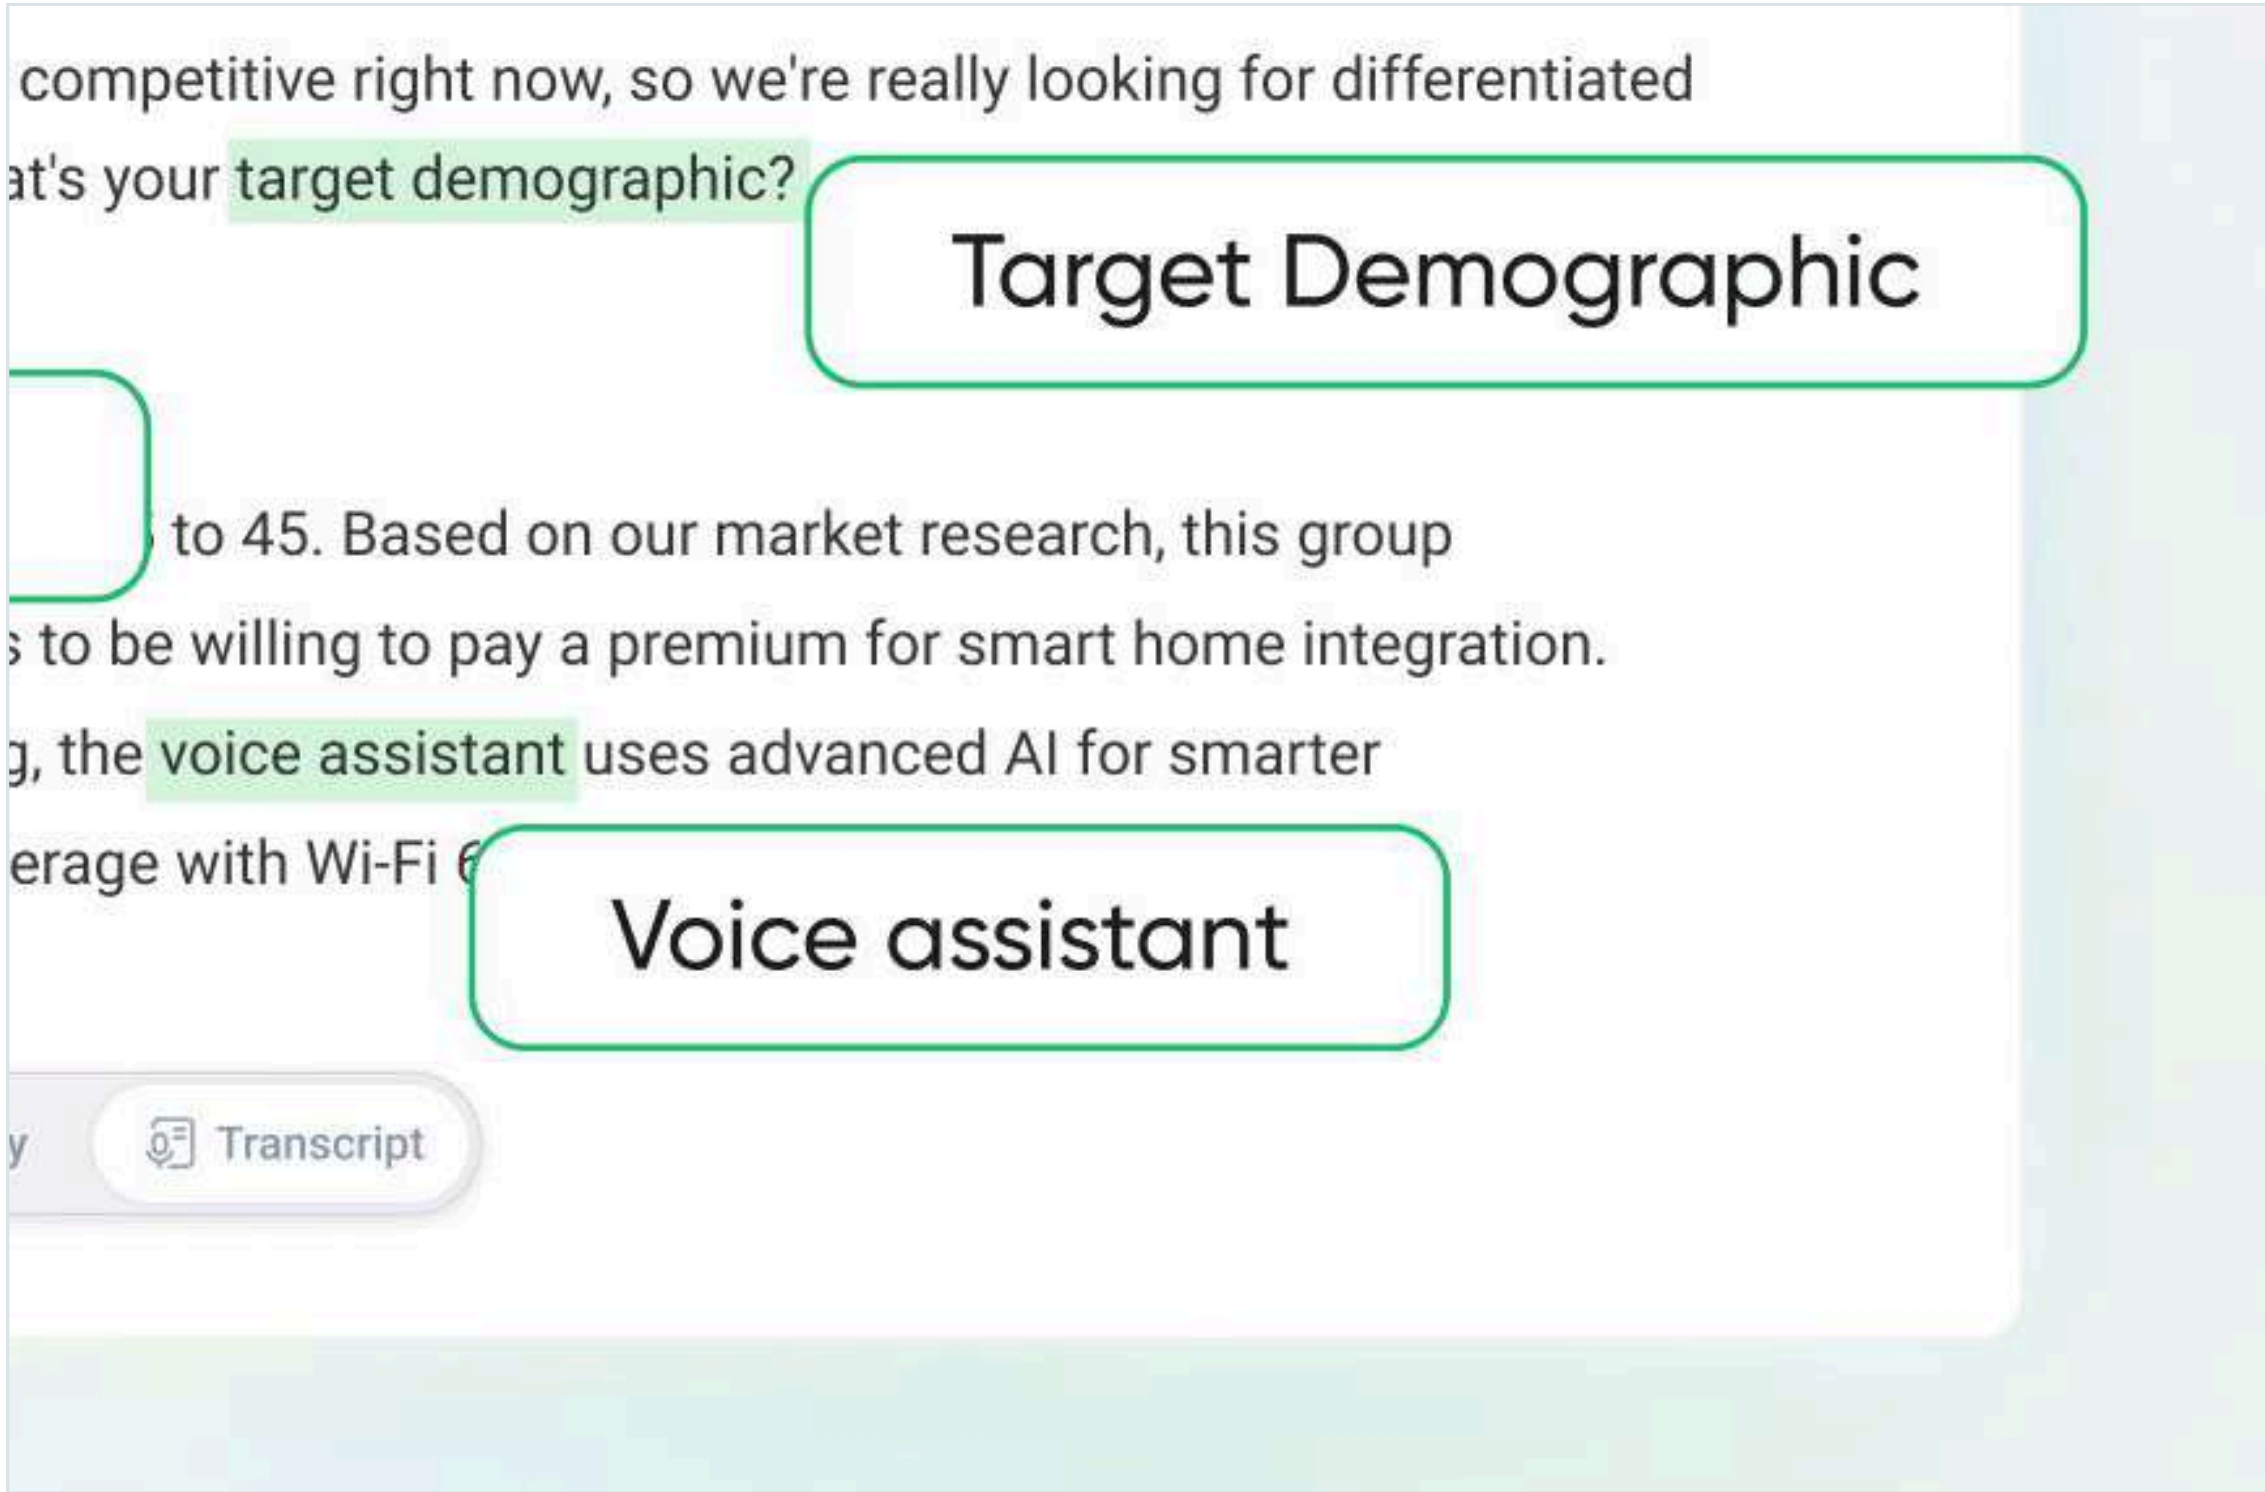

Exportable audio and transcription for seamless sharing.

AI Transcription Convey your message faster.

An advanced AI chip and intelligent cloud processing work in tandem to transcribe your speech with incredible speed and accuracy. Ensure your message is delivered and conveyed with exceptional quality.

- Voiceprint labeling: Speakers are auto-identified and can be tagged in transcripts. Voiceprints are stored locally for future automatic speaker labeling.
- Custom glossary: Define and manage specific keywords that are important to you, ensuring AI accurately detects and prioritizes relevant terms across your conversations.

Unsorted / Business Meeting: Insta360 InSight Guide Session

Training Session: Insta360 InSight Guide Session

2025-07-12 16:20 21m 30s

Summary

The meeting introduced the AI Recording Suite – Insta360 InSight, showcasing its core functions such as AI transcription, speaker label, AI summaries and AI Chat. The aim of this guide session is to improve daily meeting workflows.

Key Highlights:

Feature Deep Dive:

AI Transcription: Supports 99 languages and speaker labels.

AI Summary: Provides professional templates for organized summary.

AI Chat: ChatGPT & Gemini intergrated. Ask AI anything about the meeting and get an insightful answer.

Best Practices & Tips...

AI Assistant

Can I share a meeting summary with my team?

On Insta360 InSight, you can share the summary via:

A public link to your team members. You can also share the recording and transcript together.

Exporting as a text document

You can also share your summary through on-screen QR code. Let participants scan the QR code right after the meeting.

Pro tips:

Add AI chat history to summary and share with your teammates.

The share link is valid for 7 days.
