# CAMELLIA SCENTED SILVER-STRAP BRA

Embark on a journey of mind and body restoration tailored to modern women with our five-sense healing system.

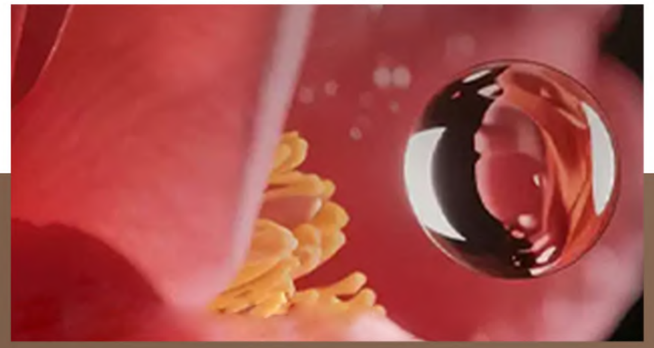
*Strap Bra*

# Five-sense Healing System, Mental and Body Restoration

Modern women also pay great attention to aesthetics when purchasing lingerie instead of solely focusing on function. The Camellia Scented Silver-Strap Bra unveils “Sensory Aesthetics”, engaging your sight, smell, and touch in a harmonious experience. It aims to bring an elegant wearing experience from the inside out, unlocking innate confidence with every wear.

# Visual Charm- Sliver Straps

The straps are adorned with shimmering silver threads, using flowing luster to accentuate the gentle curve of a woman's shoulders. This makes the bra seamlessly blend with off-shoulder tops, cami tops, or other revealing outfits, showcasing distinctive visual charm.



# Pleasing Aroma-Nano-level Microcapsule Fragrance Technology

Nano-level microcapsule fragrance technology infuses camellia essence into the fabric, making the bra release a natural and long-lasting fragrance during wear, which helps elevate women's grace.

# Warm Touch- Ginger Extract for Thermal Effect

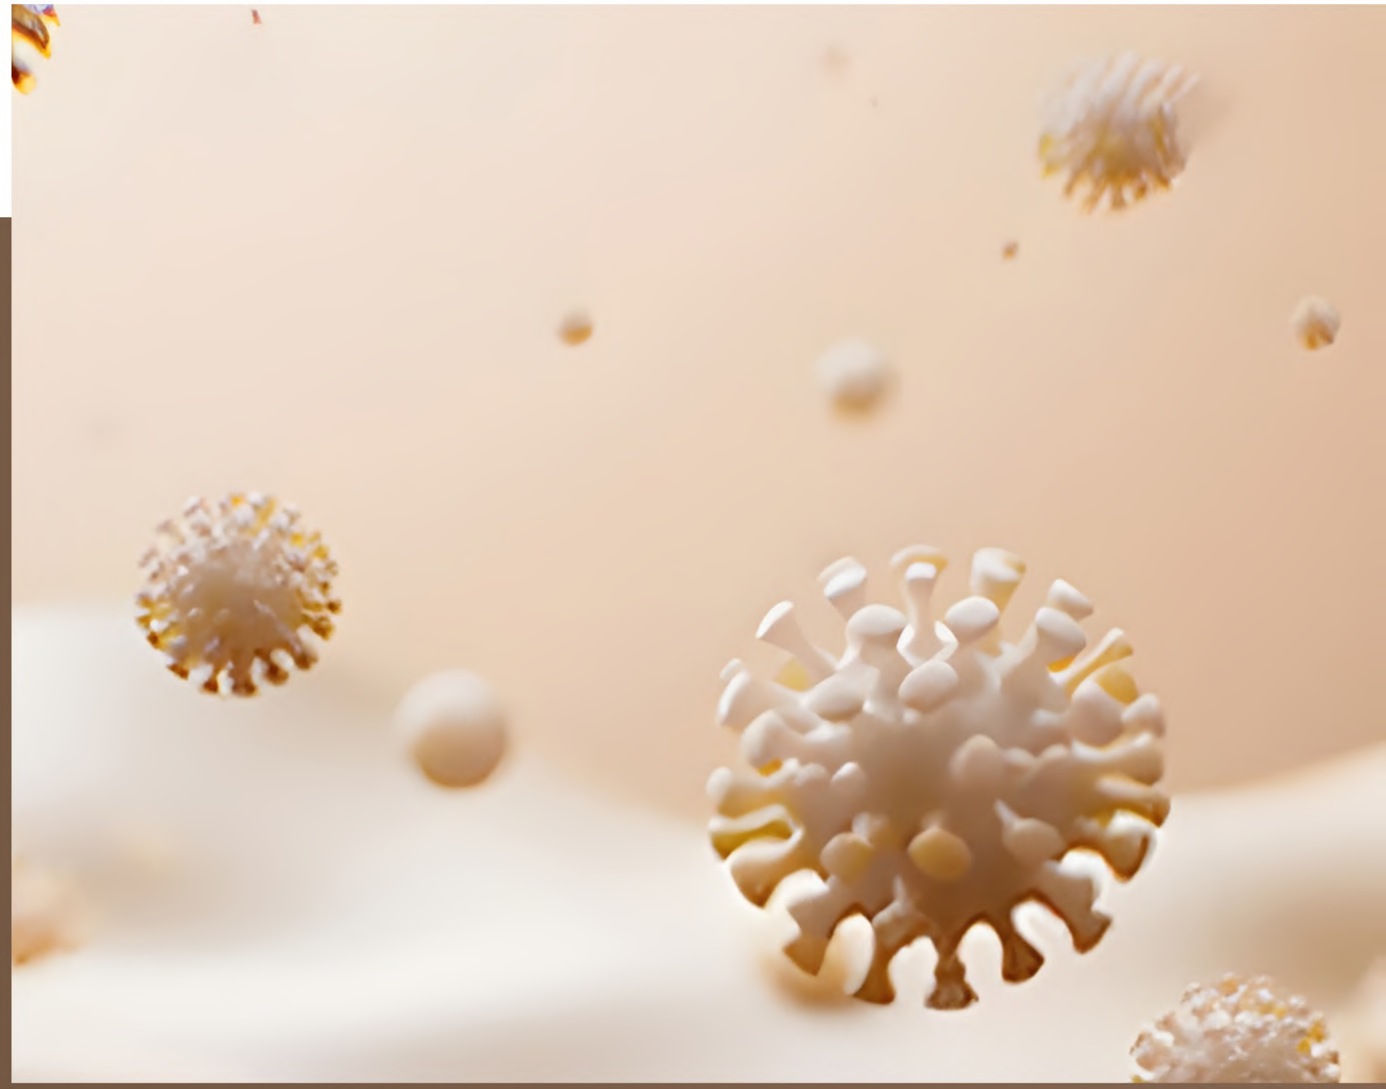
Moreover, ginger extract is incorporated into the fibers through microcapsule technology, promoting blood circulation and raising body surface temperature by 3 degrees Celsius to ensure comfort throughout the seasons.

# High-performance Fabric, Redefinition of Comfort

Globally leading Hyosung CREORA® EasyFlex ™ spandex offers enhanced stretch with a lower modulus, ensuring exceptional adaptability. This ensures the bra effortlessly adapts to your body, staying perfectly in place through every movement—from high-intensity exercise to everyday wear.

# Class 10A Antibacterial Standard, Health Protection

The bra meets the Class 10A antibacterial standard, achieving a 99% inhibition rate against common harmful bacteria, such as E. coli, Staphylococcus aureus, and Candida albicans. It maintains over 97% antibacterial efficacy even after 300 washes, offering ultimate wearing health protection.



# 3D sculpting,
# Better Support and Lifting

The jelly-soft underwires and teardrop-shaped cups enable three-dimensional support and lifting effects to shape a beautiful silhouette. Notably, the cup's ultra-breathable structure guarantees comfort and freshness throughout the day.
