

7A Antibacterial Slimming Bra 518 for Fuller Busts

7A Antibacterial Slimming Bra 518 for Fuller Busts is a multi-functional bra designed specifically for modern women, setting a new benchmark for modern women's inner elegance.

One-piece 3D Cutting

This Bra adopts one-piece three-dimensional cutting, outlining the natural beauty of the body itself with smooth, seamless lines. It also incorporates high-elastic memory foam that rebounds in a second, returning to its original shape no matter how it is kneaded. This enhances durability, achieves a seamless fit and the convenience of machine washing, and delivers a comfortable wearing experience

Precise Shaping & Support

This Bra pioneers the combination of rabbit-ear cups and 3D shock-absorbing cups, achieving precise shaping and support for the breast curve.

The rabbit-ear cups instantly reduce the bust size by two cups, naturally shaping and holding the bust like an invisible underbust corset.

Combined with the 3D shock-absorbing cups, the Bra scientifically distributes breast pressure. Even in sports scenarios like running, it can keep the breasts stable and reduce jolting.

Comfortable & Elegant Wearing Experience

This bra features one-piece shoulder straps that flatten and contain side breasts, and widen and shape the shoulder and neck lines. Combined with tech-driven lifting straps, it uses anti-gravity lifting technology to easily address breast sagging.

It features widened side panels for better wrapping and containment of side breasts. It has a raised back panel that smooths out back fat, enhances the sleekness of the body curve, and eliminates indentations.

The jelly strip in the underband provides upward support.

Lightweight & Breathable

This Bra features a unique ultra-thin material that is lightweight, breathable, and silky to the touch, feeling like a second skin. Combined with 7A antibacterial technology, it can effectively inhibit bacterial growth even in high-temperature and humid environments, keeping the wearer dry and fresh while caring for women's health.

Customized Invisible Skin-Tone Bra

This Bra features a specially adjusted invisible skin tone based on Asian skin colors, achieving 99% invisibility. It is also suitable for pairing with white or light-colored clothing to avoid the embarrassment of show-through. Especially with thin and sheer summer clothing, this design allows the Bra to present a natural and elegant visual effect.
