

# 2025 – Hyaluronic Acid & Curcumin Skincare Apparel

Guided by the core concept of "Empowering Daily Life through Technology," the skincare apparel elevates clothing functionality from passive warmth to active care, redefining the standard for thermal wear.

*Hyaluronic Acid & Curcumin Skincare Apparel*

## Intelligent Experience: "Skincare Benefits Through Everyday Wear"

This apparel ingeniously integrates skincare-grade bioactive ingredients into the fabric fibers. Using advanced textile engineering, it harmoniously combines the exceptional hydrating and moisturizing properties of hyaluronic acid, the soothing benefits of curcumin, and the soft, breathable qualities of 10A mulberry silk. Together, this triple-action formula not only delivers exceptional warmth but also functions as skincare, effectively addressing common issues with traditional thermal wear such as dryness, static electricity, and skin sensitivity.

## Ergonomic Tailoring

The skincare apparel series features ergonomic cutting that naturally follows the body's curves. Neither bulky nor restrictive, it ensures a snug fit and optimal comfort.

## Invisible Aesthetics & Unnoticed Wear

The foundation-skin tone style blends like a "second skin". Its seamless edges remain completely invisible under form-fitting clothes or tailored outerwear, delivering ultimate refinement and a touch of style whether worn alone or layered.

# Exquisitely Comfortable Details

Crafted from highly elastic fabric, the skincare apparel fits body weights ranging from 40 to 75 kg. Invisible seamless edges and tag-free labels eliminate daily micro-irritations and constant friction, meeting the nuanced needs of modern urbanites for both social elegance and lasting comfort.
