

Small Bust Push-Up and Lift Bra 728

Guided by the design philosophy of "sensuality in simplicity," the Small Bust Push-Up and Lift Bra 728 is specially designed for women with petite or flat busts.

Natural Lifting and Sculpting

The bra features W-shaped soft support technology and anti-gravity lifting craftsmanship, combined with a three-quarter cup design and heightened side support, to achieve natural lifting and shaping effects, breaking away from traditional petite bras that require compression to create the illusion of fullness. It ensures perfect conformity to the bust shape, seamlessly adapting to the female body's contours.

Perfect Fusion of Comfort and Durability

The bra incorporates **1.8 cm** memory foam into cups, enhanced by built-in non-slip strips to ensure a secure fit without shifting. Thanks to its **360°** anti-deformation design, it is machine-washable, providing long-lasting durability and practicality without sacrificing comfort.

Subtle yet Sophisticated Allure

The bra is available in fashionable shades such as foundation beige, wine red, and coffee brown, along with a delicate central cut-out detail to create a subtle yet sophisticated allure. Through meticulous color treatment, it remains invisible under lightweight clothing, preventing any visibility embarrassment.

Personalized and Confident Wearing

The bra embraces the cloud-like breathable technology, delivering outstanding breathability and comfort. Its straps are highly elastic and widened by **0.3 cm** to minimize pressure and shoulder strain, with the fixed padding and matching extenders to offer customizable comfort, empowering women with confidence and ease.
