

DR Heart Love & Freedom Set

A set of rings to interpret modern women's perspective on love—true love should balance love and freedom.

All-new Stacking Structure, More Possibilities for Stacking Rings

Unlike traditional inorganic stacking methods, the set allows the auxiliary ring and the main ring to integrate through lateral sliding, enhancing overall integrity and aesthetics. Besides, two pieces can be united in harmony or shine solo to adapt to various scenarios, showcasing the set's practicality.

The innovative stacking structure embodies the essence of freedom that modern women pursue in love— "the autonomy of choice" and "the right to self-definition".

Combo Wearing for Conscious Choice in Love

When worn together, two rings fit together with precision through the innovative lateral sliding mechanism, embracing and interlocking tightly, which implies the unspoken understanding between lovers. This ritual-like act of wearing not only reflects women's conscious choice in love, but also conveys a value that love is mutually dependent and empowering, creating a "1+1 > 2" miracle of serendipity.

Separate Wearing for Personal Expression

When worn alone, each ring shines to express personal style and independent value. Through the patented free-inlaying technique, the drop-shaped diamond on the auxiliary ring can be rotated flexibly to switch between central and side positions. Separate wearing means no need for dependence and no requirement for compromise, embodying the confidence and charm of modern women who remain true to themselves even in love.

The visually floating diamond design lends the piece a sense of dynamism and lightness.

Patented Gap Milgrain Technique, Dazzling and Striking Main Diamond

The main diamond is processed through the patented gap milgrain technique, paired with precision-engineered structure and unique facet machining, enhancing the brilliance and beauty of the main diamond to let love sparkle from the fingertips.

Witnessing Every Defining Moment with the Artistry of High Jewelry

The set redefines the jewelry-user interaction and emotional expression through an innovative structure. Centered around the core concept of "love and freedom", it helps women express their confidence, courage, and inclusiveness in love.
